

Work and Reach your Career Potential

The Maine Business School Professional MBA recognizes the needs and experience of the working professional.

While we believe in the live classroom experience where you interact with quality students and top-level faculty, our classes are offered in a variety of formats and schedules—most are offered at night, some on weekends, and some in hybrid formats where you can attend the class via your computer or live on campus in Orono.

The Maine Business School Graduate Program prepares our MBA students to think in creative and innovative ways, to work with complex problems and issues in uncertain environments, and to lead, manage, and communicate. We emphasize an appreciation of diversity and ethics in domestic and global environments.

Why a UMaine MBA?

UMaine's MBA program emphasizes experiential, hands-on learning, teamwork, critical thinking and leadership while delivering a core set of knowledge in the traditional business disciplines. Our MBA program produces graduates with practical business skills and a global perspective, but more importantly, produces business leaders who think strategically and critically. Our graduates master the ability to adapt to and foster change, inspire and lead, and create and convey a vision, goals and strategies in dynamic environments.

AACSB-Accredited

The Maine Business School is accredited by [AACSB International](#)—The Association to Advance Collegiate Schools of Business. AACSB International accreditation assures stakeholders that business schools provide quality, high-caliber teaching and current curricula and produce graduates who have achieved specified learning goals. Only 5% of business schools world-wide have this accreditation, representing the highest standards in business education.

World Class Faculty

Our faculty include world-renowned scholars, winners of national and international awards in research, teaching and service.

The Program

36 credit hours (12 classes) that provide core business knowledge and leadership skills delivered in flexible formats with evening classes, some with online delivery.

Core competencies delivered:

- Fundamental business knowledge in finance, marketing, management, operations, accounting, business law, strategy and policy.
- Enhanced communication, problem solving and leadership development.
- Diversity, ethics and corporate social responsibility
- International business experience.
