The B.A. in Chemistry is a good degree to partner with another degree in a non-science field. The B.A. degree offers maximum flexibility in schedule so that the requirements of two significantly different programs may be met. The B.A. also is suitable for students who already have a degree and who want to gain knowledge in a physical science to meet career goals.

A minor or double major is required to earn a B.A. degree at the University of Maine.

**Electives: 44-46 credits** (used to gain significant background in another field and to fulfill the remaining general education requirements as necessary)

**Total Credits = 120**
