

You are invited to attend a unique

Workshop for Faculty in STEM Fields

Facilitating Climate Change for Female STEM Faculty and Students

Sponsored by

The University of Maine ADVANCE Rising Tide Center
The Diversity Committee of the Doctoral Program in Clinical Psychology

This workshop will provide an overview of research on experiences of sexism in STEM settings, as well as other social psychological factors associated with the underrepresentation of women in STEM. Workshop participants will focus on strategies for successfully confronting sexism and other bias, as well as providing student feedback that facilitates women's persistence in math and science disciplines.

Dr. Jessica J. Good, Ph.D.

L. Richardson King Assistant Professor of Psychology
Davidson College

Friday, September 25, 2015
Memorial Union Multipurpose Room
