

**University of Maine**  
**Surveying Engineering Technology Industrial Advisory Committee Meeting**  
**Donald P. Corbett Business Building, Room 100**  
**Friday, April 8, 2011**

Meeting Convened at approximately 3:30 PM EST  
Meeting Adjourned at approximately 5:00 PM EST

IAC Members Present

David Brandt	Knud Hermansen	Jason G. Racette
Dave Cook	Ray Hintz	Shep Sheppard
Carlton Brown	Joe McNichols	David Titcomb
Claire Kiedrowski	Louis Morin	Rich Vannozzi

The Surveying Engineering Technology Industrial Advisory Committee (IAC) convened its meeting in the Donald P. Corbett Business Building, Room 100, following a presentation by Scott Dunning, Director, School of Engineering Technology.

Ray informed the IAC that Carlton Brown earned his Ph.D. and received tenure this spring.

There are 21 students in the Capstone Program this semester.

Fifteen to sixteen students are expected to graduate this semester.

During the Fall 2011 semester, Carlton will be teaching Carlson software. Students who are seniors this year will be the last group of students using AutoCAD in the classroom. There was a long discussion about software and software licenses.

The Dean is encouraging recruitment of out-of-state students because of the additional revenue generated by those students.

Recruiting is slow, but students are still receiving job offers.

Respectfully submitted,

Jason G. Racette, PLS
