

**ACSM - NEW ENGLAND SECTION SURVEYING ENGINEERING TECHNOLOGY (SVT)
SCHOLARSHIP FUND**

The American Congress for Surveying and Mapping (ACSM) - New England Section Surveying Engineering Technology (SVT) Scholarship Fund was originally established at the University of Maine in 1987 as the ACSM – New England Section Spatial Information Science and Engineering (SIE) Scholarship with a gift from the ACSM New England Section. The fund description was changed at the request of the Donor in 2003 to accommodate the move of the UMaine Surveying program from SIE to SVT.

The income from the fund shall be used to provide scholarship aid for deserving undergraduate students attending the University of Maine majoring in Surveying Engineering Technology (SVT). A first preference shall be given to incoming or existing students demonstrating high academic potential.

Should it ever become impossible or impractical to carry out the purposes of the Fund as described above, an alternative purpose which best fits the donor’s intent and wishes shall be designated by the Director of the School of Engineering Technology.

The Director of the School of Engineering Technology shall make selection of the recipient(s) in consultation with the (SVT) Program Coordinator. The Office of Student Financial Aid shall administer the income from the fund.

Peter S. Hoff
