Chemistry is a good major to combine with specialized interests in sub-disciplines such as medicine, pharmacy, education, environmental chemistry, nanotechnology, or business. For Concentrations or Tracks in a specialized field: choose 18 credits from a list of approved courses in a sub-discipline.

For students planning to go to graduate school in chemistry: it is recommended that students take additional upper level courses in chemistry, including graduate (500-level) courses.

Electives: 35 credits (used to fulfill the remainder of the general education requirements as necessary)

Total Credits = 120

* A grade of C or better must be earned in all required courses.
