

General Chemistry Spring 2018

From Syllabus and FAQs (below):

What are the policies about attendance and completion of lab assignments?

1. If more than 2 lab assignments are missed, for any reason, even if you have excused absences, you will receive an F in the course. For example, if a general chemistry lab course has 11 assignments during the semester, you must complete 9 or more of the assignments to pass the lab course.
2. Completion of assignments that require a lab report means timely submission of the lab report. Lab assignments more than two weeks late, in general, will not be scored and will be counted as a missed assignment.
3. If you have difficulties submitting lab work, it is your responsibility to get help and work out a solution with your TA. With the possible exception of the final assignment, lab work is never accepted past the end of classes.
4. There is limited access to make-up labs. To the extent offered, students will have the ability to make-up and complete an assignment that otherwise would result in a missed assignment. There is no guarantee that any lab can be made-up and the shorter time limits for submission of lab work (e.g. lab report) can be imposed on a make-up lab (see Making Up a Lab posted on the ICN Resources page).

If I decide to drop lecture (CHY 121, CHY 122, CHY 131) what happens to my lab?

1. For the CHY 123 and CHY 133 lab courses, if you withdraw from the co-requisite lecture course (CHY 121/131), you must drop the lab. Note: this is a change from fall 2017. There are no exceptions anticipated to this rule for spring 2018.
2. For the CHY 124 lab course, if you withdraw from the co-requisite lecture course (CHY 122), then you may stay in lab if your lab scores are above 70%, you inform your TA, and you contact the general chemistry coordinator, Mitchell Bruce, to verify your ICN scoring average.
