Microscopy and Image Analysis CORE

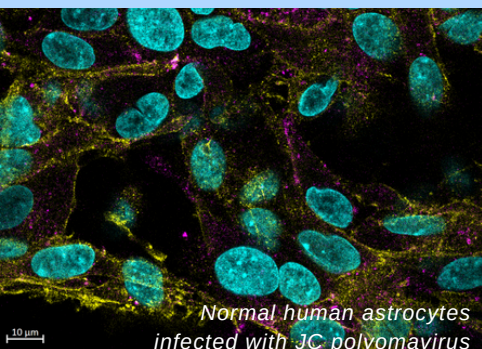

Curious about fluorescence microscopy or how imaging can support your research? Join us for our Lunch&Learn where we'll introduce the Microscopy and Image Analysis Core (MIAC). You'll get an overview of the equipment we offer - like confocal and stereo microscopes - and learn how tools like Imaris software can help you analyze your images. We offer hands-on training and support. Whether you're getting started or exploring new techniques, this is a great chance to see what's available and ask questions. Plus-

Lunch is provided!

MAINE

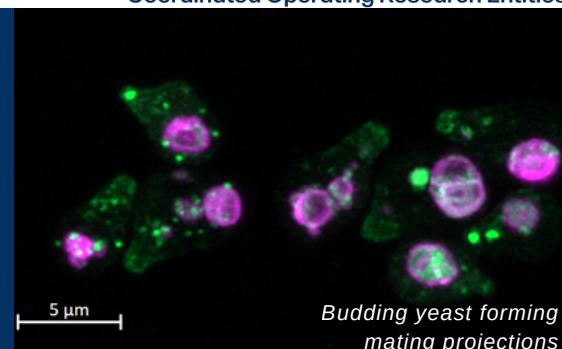

Coordinated Operating Research Entities

Normal human astrocytes
infected with JC polyomavirus

Zebrafish muscle fiber
structure quantified in Imaris

Budding yeast forming
mating projections
