

The School of Forest Resources Presents...

Gabrielle Sherman

Ph.D. Defense - School of Forest Resources

Socio-Economic Resilience of Natural Resource Dependent Communities

Gabrielle's dissertation examines the factors influencing the ability of Maine communities to recuperate following socio-economic disruption.

The manifestation of resilience is explored through the analysis of resident perceptions of community capitals, case studies of communities in transition, and the development of a data driven index of resilience.

Thursday, July 14th
Room 204 Nutting Hall
