The Maine Aquaculture Innovation Center (MAIC), Maine EPSCoR and the University of Maine Aquaculture Research Institute (ARI) are partnering through the Innovate for Maine Fellows program to make available undergraduate internship opportunities with Maine aquaculture companies during the summer of 2016. The Innovate for Maine Fellows program connects the best and brightest Maine college students with Maine’s most exciting, growing companies and business leaders in an effort to help grow and create jobs across the state of Maine.

**Key Benefits:**

- Students can work on-site or at our facilities
- You can opt for full-time, part-time or even short-term intern projects
- Our students make real contributions because of their training in Innovation Engineering
- Our interns are student employees, so you don’t need to go through a length hiring process
- Our interns are matched with an Innovation Engineering mentor to supervise and ensure that both the company and the intern have a positive experience
