Notes.

1. Prepared at the request of the Faculty Senate for the 4.17.13 members-only discussion with Provost Hunter.
2. Data for 2012-2013 will be added as soon as the Office of Institutional Research completes its 2012-2013 "faculty verification" process with the colleges.
3. College figures include full-time T/TE faculty having a partial appointment in a center (e.g., Climate Change Institute, Margaret Chase Smith Policy Center) or in Cooperative Extension Service. UMaine-wide figures include an isolated case or two (depending on the year) of T/TE professors whose entire appointment is in a center.
4. A faculty member having a joint appointment across two colleges is counted in each college. For this reason, any sum of college figures may slightly exceed the corresponding UMaine sum.

(UMaine Office of Institutional Research, 4.17.13)

UMaine faculty headcounts and courses taught

		2008-2009	2009-2010	2010-2011	2011-2012

number of part-time non-T/TE faculty		334	327	311	330
total non-T/TE faculty		410	398	389	420
number of courses taught by non-T/TE faculty	All courses			1,398	1,511
	Type 1	1,217	1,176	1,153	1,213
	Type 2			245	297

Notes.

1. Prepared at the request of the Faculty Senate for the 4.17.13 members-only discussion with Provost Hunter.
2. For the purpose of this table (given its course component), a "part-time" faculty member could be full-time with a joint appointment in a center (e.g., Climate Change Institute, Margaret Chase Smith Policy Center) or in Cooperative Extension Service. Excluded from this table is the isolated case or two (depending on the year) of T/TE professors whose entire appointment is in a center.
3. Faculty members having a joint appointment in two colleges are treated as part-time in each. Consequently, faculty headcounts across the six colleges do not sum to equal UMaine-wide headcounts.
4. As this table makes clear, each college includes among its part-time non-T/TE faculty the "number of part-time DLL faculty" who taught courses offered by the respective college. This accounting of a college's faculty, while appropriate for the present table, departs from OIR's standard practice of restricting faculty counts to those faculty members who are paid from the unit's E&G budget.
5. Type 1 courses comprise lectures, labs, and seminars; Type 2 courses comprise clinical/field/practica experiences, independent studies, recitations, and thesis/research. Because the attribution of sections to instructors was not consistent for some Type 2 courses in 2008-2009 and 2009-2010, Type 2 data and "all courses" data are not shown for those years.
6. Students with multiple majors involving different colleges are counted in each college. However, UMaine-wide student headcounts are unduplicated.
7. Course data do not include summer instruction.
