

Graduate Faculty affiliated with the Aquaculture & Aquatic Resources Graduate Program

(Correct as of September 2022)

Robert Bayer, Ph.D. (Michigan State), Professor. School of Food and Agriculture. Lobster fisheries and aquaculture nutrition, management and physiology. (rbayer@maine.edu)

Brian Beal, Ph.D. (University of Maine), Professor. University of Maine at Machias. Shellfish aquaculture, estuarine biology, marine benthic ecology, and experimental design. (bbeal@maine.edu)

Kathleen Bell, Ph.D. (University of Maryland), Professor, School of Economics. Environmental and natural resources economics, spatial modeling and analysis, human-environment interactions, and marine policy. (kpbell@maine.edu)

Tim Bowden, Ph.D. (University of Aberdeen, UK), Associate Professor, School of Food and Agriculture. Aquatic animal health, environmental impacts on animals, seasonality and circadian rhythms. (timothy.bowden@maine.edu)

Deborah Bouchard, Ph.D. (University of Maine), Associate Extension Professor, University of Maine Cooperative Extension. Aquatic animal health specialist. (deborah.bouchard@maine.edu)

Damian Brady, Ph.D. (University of Delaware), Associate Professor, School of Marine Sciences. Spatial and temporal dynamics of water quality and organism behavior. (damian.brady@maine.edu)

Ian Bricknell, Ph.D. (University of Lancaster, UK), Professor. School of Marine Sciences. Aquatic animal health, especially parasites such as sea lice. (ian.bricknell@maine.edu)

Laurie Connell, Ph.D. (University of North Carolina), Research Professor, School of Marine Sciences, Marine algae, shellfish toxins and shellfish health. (laurie.b.connell@maine.edu)

Chris Davis, Ph.D. (University of Maine), Maine Aquaculture Innovation Center; Adjunct Assistant Professor, School of Marine Sciences, shellfish biology, aquaculture. (christopher.v.davis@gmail.com)

Keith Evans, Ph.D. (Iowa State University). Associate Professor. School of Economics and School of Marine Sciences. Marine resource economics, marine development, non-market valuation, and marine policy. (keith.evans@maine.edu)

Michael Habtetsion, Ph.D. (Nanjing Agricultural University). Assistant Extension Professor and Fish Nutrition Specialist. Cooperative Extension and Aquaculture Research Institute. Aquatic Animal Nutrition, Immuno-nutrition and Nutrigenomics. (michael.habtetsion@maine.edu)

Heather Hamlin, Ph.D. (University of Florida). Professor. School of Marine Sciences. Reproductive biology and endocrinology of aquacultured animals. (heather.hamlin@maine.edu)

Matt Hawkyard, Ph.D. (Oregon State University). Assistant Extension Professor and Fish Nutrition Specialist. Cooperative Extension and Aquaculture Research Institute. Fish and shellfish nutrition, microencapsulation and feed technology. (matt.hawkyard@maine.edu)

Kim Huguenard Ph.D. (University of Florida). Associate Professor of Civil and Environmental Engineering (CIE). Coastal and ocean engineering, estuarine hydrodynamics, nearshore processes, turbulence and mixing, including aquaculture engineering. (kimberly.huguenard@maine.edu)

Sue Ishaq, Ph.D. (University of Vermont), Assistant Professor of Animal and Veterinary Sciences, School of Food and Agriculture. Animal microbiomes. (sue.ishaq@maine.edu)

Heather Leslie, Ph.D. (Oregon State University). Professor and Director of the University of Maine's marine laboratory, Darling Marine Center. Drivers of ecological and social processes in marine systems, and how to more effectively connect science to policy and management. (heather.leslie@maine.edu)

Jean MacRae Ph.D. (University of British Columbia Vancouver, B.C., Canada). Associate Professor. Civil and Environmental Engineering (CIE). Aquaculture waste management, and nutrient recovery; testing methods. (jean.macrae@maine.edu)

Caroline Noblet, Ph.D. (University of Maine), Associate Professor. School of Economics. Consumer choice, sustainable behavior, labeling. (caroline.noblet@maine.edu)

Lewis (Brian) Perkins, Ph.D. (University of Maine), Associate Research Professor. School of Food and Agriculture. Analytical method development for bioactive compounds, naturally occurring toxins and pesticide residues in food and environmental matrices. (bperkins@maine.edu)

Jen Perry Ph.D. (Ohio State University), Associate Professor of Food Microbiology. Investigation of the effect of probiotic supplementation and dietary modulation on the composition of the bacterial and fungal communities in the GI tract, evaluation of differences in genomic and transcriptomic profiles. (jennifer.perry@maine.edu)

Paul Rawson, Ph.D. (University of South Carolina), Professor of Marine Science. School of Marine Science. Ecological genetics of marine invertebrates and marine bivalve aquaculture. (prawson@maine.edu)

Laura Rickard Ph.D. Associate Professor, Department of Communication and Journalism. Communication in the context of science, health, environmental, and risk-based issues, with a strong focus on aquaculture and working waterfronts. (laura.rickard@maine.edu)

Denise Skonberg, Ph.D. (University of Washington), Professor. School of Food and Agriculture. Seafood by-product utilization, seafood processing, quality evaluation of aquaculture products. (denise.skonberg@maine.edu)

Joshua Stoll, Ph.D. (University of Maine), Assistant Professor, School of Marine Sciences. Ocean governance, fisheries and aquaculture policy, social-ecological systems. (joshua.stoll@maine.edu)

Peter Van Walsum, Ph.D. (Dartmouth College), Professor. Department of Chemical and Biomedical Engineering. Seaweed processing, process engineering. (peter.vanwalsum@maine.edu)

Gayle Zydlewski, Ph.D. (University of Maine), Professor, School of Marine Sciences. Director Maine Seagrant. Environmental impact on behavior, population dynamics and physiology. (gayle.zydlewski@maine.edu)

External Graduate Faculty

Carrie J. Byron, Ph.D. (University of Rhode Island), Assistant Professor. Department of Marine Science. University of New England. Food web ecology, trophic dynamics and carrying capacity of ocean foods production. (cbyron@une.edu)

Brian Peterson, Ph.D. Center Director, The National Cold Water Marine Aquaculture Center, USDA, Franklin, Maine. Research program areas address: Genetic Improvement, Growth and Development, Health, and Sustainable Production Systems for Atlantic salmon and for cold water marine finfish species. (brian.peterson@usda.gov)

Joseph Zydlewski, Ph.D. (University of Massachusetts), Assistant Unit Leader-Fisheries U.S. Geological Survey, Maine Cooperative Fish and Wildlife Research Unit, Ecology & Environmental Science. Migratory behavior, ecology and physiology of fishes. (josephz@maine.edu)
