

CLAS Guidelines for Chairs: Sabbatical and Leave of Absence *[rev. 7-23-21]*

Timelines and Funding

- The application process for central University sabbatical funding occurs once per year, with a deadline in late February.
- While the AFUM bargaining agreement stipulates only a six-month notice for sabbatical requests, you should work with faculty members to encourage prompt notice of the intent to apply for a leave.
- There will be no central funding for spring-semester sabbatical requests that miss the February deadline, even if the request meets the AFUM deadline.
- Central funding typically covers a fraction of the cost of replacement teaching during a sabbatical. Additional funding may be supplied by the College.
- Sabbaticals are not an entitlement and may be denied. To facilitate approval, ensure that the statement submitted addresses every question (a-e) on the request form (<https://gojira.its.maine.edu/confluence/display/HumanRes/Forms?preview=/63688560/86674897/Sabbatical%20Educational%20Leave.pdf>).
- Faculty and salaried staff in the UMPSA unit are eligible to request unpaid leave for educational purposes. The request form is the same.
- A written report of sabbatical activities and accomplishments is required after return from a sabbatical.

Process and Approvals

- Providing a detailed plan for coverage of the faculty member's responsibilities is crucial to the support of the leave. Use the Proposed Leave Coverage Plan Form for this purpose. It is your responsibility as chair to complete this form. A separate chair's letter is unnecessary. The form is posted on the CLAS faculty/staff resources website at <https://umaine.edu/las/faculty-resources/human-resources/>.
- A peer committee recommendation is required for sabbatical requests. It is not required for unpaid leaves or for paid administrative leave awarded at the end of a chair's term.
- Funds needed to replace faculty members on sabbatical should be included on the department's section funding request for the semester at issue.
