Climate Change and Estuaries

Edited By Michael J. Kennish, Hans W. Pael, Joseph R. Crosswell

Climate change is having an increasing impact on estuarine and marine environments worldwide. This handbook provides state-of-the-art coverage of climate change effects on estuarine ecosystems from local, regional, and global perspectives.

Consisting of three sections, physical-chemical aspects; biological aspects; and management aspects, the book not only examines climatic and non-climatic drivers of change affecting estuarine environments but also their interactions and effects on populations of organisms, communities, habitats, and ecosystem structure and function.
