

**SAFETY AWARD RECIPIENTS** — Mechanical Engineering Technology students at the University of Maine are designing products for persons with disabilities. Heidi Crosby of Orono, 12-year-old daughter of Hebert Crosby, UMaine professor of mechanical engineering, takes a turn on an exercise swing for a child with a learning disability. Curtis Cyr, left, and Sean Albert, both of Madawaska, are members of the team which designed the equipment. The swing won the Safety Award in the recent Senior Design Competition.
