

An Interagency Forum on Climate Activities and Needs

Panel Discussion – Sample Discussion Questions

1. What do you want to see from state agencies for climate change work? This could include the role of MICA in relation to other efforts throughout the state.
2. How do you see state agency resources being best utilized?
3. What would you like to see for information sharing from state agencies on climate change? This could include for capacity building or for filling information gaps.
4. How should State level adaptation planning and recommendations be provided so they are most helpful to you?
5. What are you seeing that is needed for climate response strategies? Any specific actions?
