

ACCREDITATION

To be accredited by SAF, academic programs leading to a Baccalaureate or Master's degree must prepare a self-evaluation report, host an onsite review by a visiting team, and undergo review by the SAF Committee on Accreditation, which determines that a degree program option meets SAF accreditation standards for mission, goals and objectives, program organization and administration, students, parent-institution support, curriculum, and faculty. The academic institutions listed below with accredited degree program options have completed the accreditation process.

CANDIDACY FOR ACCREDITATION

Academic programs leading to a Baccalaureate or Master's degree that are candidates for SAF accreditation have prepared a Report on Candidate Eligibility for the degree program options specified, which has been reviewed by the SAF Committee on Accreditation and found to meet the prerequisite criteria and to have the promise of meeting SAF accreditation standards. Candidacy does not guarantee eventual accreditation.

DEGREE PROGRAM OPTIONS

Many academic programs offer a diversity of degree program options within a program – *not all are accredited*. The listing below categorizes accredited degree program options according to the standard under which they are accredited and candidate degree program options under the standard under which they have candidacy status.
