

UMaine Undergraduate Majors
Fall 2013 – Fall 2022

UMaine Office of Institutional Research and Assessment
May 10, 2023

The table below is intended as a convenient ten-year summary of fall enrollment for undergraduate baccalaureate degree programs in the five colleges and the Division of Lifelong Learning (DLL). We also include the Honors College, Explorations and Foundations programs, Other programs, and Undeclared programs. For each, we report fall enrollment for the respective year, as well as these multi-year indices:

1. The trend line across the fall enrollment values;
2. The mean change in enrollment from one year to the next;
3. The percentage change comparing 2013 and 2022; and
4. The compound annual growth rate (CAGR) across the fall enrollment values.

Consider Ecology & Environmental Science (EES) as an example. We see EES fall enrollments increasing from 86 in 2013 to 203 in 2022, which is illustrated by an upwardly sloping trend line. The next value, 13, is the mean change in EES enrollment from one year to the next. On average, EES gained about 13 students annually over each of these years. The next value compares the number of EES majors in 2022 with that in 2013—a 136.05% increase. The final column shows an annual growth rate for EES of 10.01%. These measures are statistical abstractions, of course, and they typically will misrepresent the nature of change from any one year to the next. When considered with that caveat in mind, they should nonetheless be useful as one reviews the enrollment figures for the various majors.

UMaine undergraduate majors: Fall 2013 - Fall 2022

Notes.

- Discontinued programs and visiting students are excluded.
- The majors are based only on bachelor's degrees
- Where an earlier major (e.g., LHC – Landscape Horticulture) has been subsumed by a later major (e.g., ENH – Environmental Horticulture), the latter name is used for all years.
- A student having multiple majors is counted in each major but only once in the respective academic unit and only once in the respective college. If a student has multiple majors involving multiple colleges, the student will be included in each college's unduplicated count.
- For all years, majors are organized within colleges consistent with the present organization.
- Although Engineering Physics is listed in both ENGR (Other ENGR) and LAS (Physics and Astronomy), only ENGR college and Other ENGR department totals include Engineering Physics.
- International Affairs majors with a concentration in economics are listed under the School of Economics, which is part of NSFA college.
- As an interdisciplinary program, Ecology & Environmental Science majors are typically attributed to the academic unit of the advisor. For the present report, however, they are presented as a single total in NSFA.
- Honors College includes students simultaneously enrolled in the Honors College.
- The UMaine total undergraduate enrollment represents an unduplicated count of all undergraduate students at UMaine.

(UMaine Office of Institutional Research and Assessment, 5.9.23)
