Instructions:

1. Create a document with the Project/Canvas/Workspace Size specifications for your template of choice
2. Place your desired template on your project file as your bottom layer.
3. Design your brochure on top of said template.
4. Export file as "PDF Print"

Bleed

Bleed

Bleed

Placing content against the Safe Line will prevent undesired cropping

Any content against the Bleed Line will be cropped down to the Design Boundary.

If you have a color or photographic background, we recommend extending it to the Bleed Line past the Design Boundary.

Bleed

NEVER place content against the Design Boundary. we would have to ask you to resubmit your design, or will have to shrink your entire design to the Safe Line
