Instructions:

1. **Create a document with the Project/Canvas/Workspace Size specifications for your template of choice**
2. **Place your desired template on your project file as your bottom layer.**
3. **Design your brochure on top of said template.**
4. **Export file as "PDF Print"**

Bleed

Bleed

Placing content against the <u>Safe Line</u> will prevent undesired cropping

Bleed

Any content against the <u>Bleed Line</u> will be cropped down to the <u>Design Boundary.</u>

If you have a color or photographic background, we recommend extending it to the <u>Bleed Line</u> past the <u>Design Boundary.</u>

NEVER place content against the <u>Design</u> Boundary. we would have to ask you to resubmit your design, or will have to shrink your entire design to the <u>Safe Line</u>
