University of Maine Self-Study 2019

Institutional Characteristics Form

Date: 2/15/2019

- 1. Corporate name of institution: University of Maine
- 2. Date institution was chartered or authorized: 1865
- 3. Date institution enrolled first students in degree programs: 9/21/1868
- 4. Date institution awarded first degrees: 1872

5. Type of control:

Public	Private
X State	Independent, not-for-profit
□ City	\Box Religious Group (Name of Church)
Other (Specify)	Proprietary
	□ Other: (Specify)

6. By what agency is the institution legally authorized to provide a program of education beyond high school, and what degrees is it authorized to grant?

The University of Maine System of Trustees are authorized to grant bachelors, masters and doctoral degrees by acts of the Legislature of the State of Maine: 1865 P&S.L.C.532, and 1967 P&S.L.C.229, as amended, 1969 P&S.L.C.238.

7. Level of postsecondary offerings (check all that apply)

 \Box Less than one year of work

X At least one but less than two years (UMM)

- \Box Diploma or certificate programs of at least two but less than four years
- X Associate degree granting program of at least two years (UMM)
- **X** Four- or five-year baccalaureate degree granting program
- □ First professional degree
- X Master's and/or work beyond the first professional degree
- **X** Work beyond the master's level but not at the doctoral level (e.g., Specialist in Education)
- X A doctor of philosophy or equivalent degree
- □ Other doctoral programs
- □ Other (Specify)

8. Type of undergraduate programs	(check all that apply)
-----------------------------------	------------------------

- Occupational training at the crafts/clerical level (certificate or diploma)
- Occupational training at the technical or semi-professional level (degree)
- \Box Two-year programs designed for full transfer to a baccalaureate degree
- \boldsymbol{X} Liberal arts and general
- **X** Teacher preparatory
- **X** Professional
- Other_____

9. The calendar system at the institution is:

X Semester	🗌 Quarter	Trimester	Other
------------	-----------	-----------	-------

10. What constitutes the credit hour load for a full-time equivalent (FTE) student each semester?

- a) Undergraduate 15 credit hours/minimum of 12 credits
- b) Graduate 9 credit hours/minimum of 6 credits
- c) Professional N/A

11. Student population:

a) Degree-seeking students:

	Undergraduate		Graduate	
	UMaine	UMM	UMaine	UMaine/UMM Total
Full-time student headcount	8126	343	994	9,463
Part-time student headcount	735	137	679	1,551
FTE	8,463.3	374	1,016.1	9,853.4

b) Number of students in non-credit, short-term courses: 90

12. List all programs accredited by a nationally recognized, specialized accrediting agency.

16. Instruction offered through contractual relationships: For each contractual relationship through which instruction is offered for a Title IV-eligible degree or certificate, indicate the name of the contractor, the location of instruction, the program name, and degree or certificate, and the number of credits that may be completed through the contractual relationship. Enter more rows as needed.

Name of contractor	Location	Name of program	Degree or certificate	# of credits
N/A				

17. List by name and title the chief administrative officers of the institution. See table on p. VIII.

- **18. Supply a table of organization for the institution.** Supply a table of organization for the institution. While the organization of any institution will depend on its purpose, size and scope of operation, institutional organization usually includes four areas. Although every institution may not have a major administrative division for these areas, the following outline may be helpful in charting and describing the overall administrative organization: See tables on pages IX to XII.
- **19. Record briefly the central elements in the history of the institution:** The University of Maine was established in Orono in 1865 under the provisions of the Morrill Act. The Maine legislature passed a bill to create the state's land grant institution on Feb. 24, 1865. Gov. Samuel Cony signed it the next day. The first board of trustees, chaired by Hannibal Hamlin of Bangor, addressed the Maine people three months later, noting that "it is by the union of scientific knowledge with physical industry, that labor becomes most productive, and the laborer gains." The then Maine State College of Agriculture and the Mechanic Arts welcomed its first class of 12 students in September 1868; the first graduation was held in 1872. In 1897, the name was changed to the University of Maine. The University of Maine at Machias became a regional campus of the University of Maine on July 1, 2017.

As Maine's land grant and sea grant institution with a statewide mission of teaching, research and community engagement, the university applies the resources of its learning community to meet the educational, economic, cultural and social needs of Maine. For more than 150 years, the University of Maine has held a leadership role in the state. Because Maine's potential is our purpose, UMaine serves as the state's major research institution and as a culture hub, linking our resources with the needs of industries and businesses, schools, cultural organizations, state government and local communities.

The University of Maine has been accredited by NECHE since 1929.

June 26, 2014 and November 17, 2015	comprehensive approach to the	In 2015–2017, UMaine established a campuswide system of program assessment on a three-year cycle. Early outcomes from units completing an initial cycle and using assessment data to improve curricula and student learning are described in Standard Eight. In 2018, UMaine adopted a faculty-led plan for the comprehensive review of General Education. Data from the pilot assessment will be reported in spring 2019.	4, 8	33, 77–79 81, 86
June 26, 2014	Maintaining fiscal stability through the diversification of revenue and the achievement of our goals for enrollment and retention.	UMaine has achieved significant undergraduate enrollment growth through our Flagship Match program, and recent growth in graduate enrollment through UMaineOnline. To improve access to Nursing education for learners in Down East Maine (Washington and Hancock counties), we expect to launch a Nursing program at UMM in 2019–2020. Since 2016, we have seen steady growth in the number of students taking 30 credits or more per year in response to our Think 30 initiative; we project a corresponding improvement in retention rates and time-to- degree in the next 2–3 years.	7	5–6 10–11 35, 45–46 47–48

Continued implementation of the Maine Business School reorganization, including a) engaging faculty in the work of implementation b) ensuring that the reporting relationships of the undergraduate and graduate faculty at the University of Maine and the graduate faculty at the University of Southern Maine are clear and productive c) further developing an implementation plan, including the identification of realistic priorities to advance the institution's agenda for innovation and greater service to the Maine business economy, and foster productive relationships between MBS, the University of Southern Maine Law School, and the Muskie School of Public Service; and d) further developing a financial plan for the Maine Business School, taking into account realistic projections for multiple sources of funding.	UMaine and University of Southern Maine graduate business faculty have jointly developed and agreed, in principle, to a governance document for graduate faculty and instructor appointments; rules of order; voting; and related points of operation. The agreement establishes committees addressing coordination (to deliver the graduate and undergraduate programs); steering (faculty advising the Graduate Dean on matters of budget management, course scheduling, faculty teaching assignments, and accreditation); and graduate curriculum and learning ("devises a formal process for planning, evaluating, and revising the graduate curriculum"; reviews admissions policies; and ensures that the Graduate School has a "well-documented and systematic process for determining, revising, and assessing degree program learning goals"). The agreement affirms that the graduate faculty are the unit's policy-making authority with respect to curriculum. Amendments to the body of the document are under discussion as of February 2019. See Standard Three. Detailed information about further implementation plans and financial planning is provided in Standard Six.	3, 6	20 65–66
Provide an update on the contractual arrangement with Eagle Hill Institute, with particular emphasis on the University's success in achieving the financial goals of the program.	UMM faculty and administrators are pursuing a plan responsive to the Commission's directive and expect to identify next steps during the spring 2019 semester.	4	42

Introduction: The Self-Study Process

e seek to present a clear and comprehensive picture of the University of Maine (Orono and Machias) demonstrating self-reflection, identifying outcomes and areas of concern, and documenting our use of results for the continuous improvement of what we do.

We began the self-study process in December 2016 as our five-year strategic plan was drawing to a close: an opportune moment to review outcomes and prepare a foundation for ongoing planning. The self-study has taken shape during a unique transition for the University of Maine (UMaine) and the University of Maine at Machias (UMM). Shortly after UMaine began initial work on the self-study, the University of Maine System Board of Trustees (BOT) formally approved UMM's new status as a regional campus of the University of Maine, effective July 1, 2017. We notified NECHE of this change in March 2017 and provided a detailed progress report later that year. The Commission has offered welcome guidance about how we might best foster a thriving relationship between the two campuses. UMM has been accredited under UMaine's accreditation since July 1, 2018.

In April 2017, more than 50 Orono faculty, administrators, and staff were recruited to examine and discuss the Standards for Accreditation. Dividing into nine writing teams, these members of the university community collaborated in drafting thoughtful, thorough narratives responsive to the standards. Care was taken to recruit a diverse pool of participants and, thereby, engage a wide range of perspectives and knowledge about campus functions, processes, and outcomes. Team chairs worked closely with Assessment staff at the direction of the Senior Associate Provost for Academic Affairs (our NECHE Accreditation Liaison Officer).

The writing teams submitted their drafts between September 2017 and March 2018. A full initial narrative was woven together from those drafts in April–May 2018, with further revisions made across multiple iterations of the document through the summer and fall, including incorporation of material addressing the University of Maine at Machias drafted by a group of UMM faculty and administrators. The Data First Forms and related data; documentation for the electronic workroom; in-text graphs and tables; and additional revisions to the narrative were produced between late spring 2018 and January 2019. A three-member Steering Committee comprising the Senior Associate Provost, the Assessment Coordinator, and the Assistant Provost for Institutional Research and Assessment formed in spring 2018. That group was expanded in early fall 2018 to include two Orono faculty and UMM's Vice President for Academic Affairs and Head of Campus.

In September 2018, NECHE Vice President Carol Anderson reviewed the narrative in draft and provided invaluable feedback. A subsequent draft was shared with the university community in Orono and Machias for comment and feedback in December 2018. The university filed its Notice for Public Comment in the state's seven largest newspapers in November 2018, and also posted the Notice on the UMaine and UMM websites on pages devoted to the Self-Study process.

President Ferrini-Mundy, UMaine Provost Hecker, and UMM Head of Campus Egan engaged in multiple conversations about the self-study process with the Steering Committee chair, read the penultimate draft, and supplied key clarifications and additions throughout. University of Maine System Vice Chancellor for Academic Affairs Robert Neely, and UMaine Dean of Liberal Arts and Sciences Emily Haddad also read the penultimate draft and provided valuable feedback.

While the Self-Study has been the work of many hands, the following members of the university community played specific roles in its design, development and completion:

The draft writing teams

Standard One: Mission and Purpose

Valerie Ireland	Division of Marketing and Communications
Mike Kirby	Division of Marketing and Communications
Margaret Nagle	Division of Marketing and Communications

Institutional Overview

As the land grant, sea grant institution of the University of Maine System, the University of Maine has played a leadership role in the state of Maine for over 150 years, and we have continued to build on that role since our last comprehensive review in 2009. Focused strategic planning and corresponding investments in our students, faculty, and facilities have led to demonstrable gains in teaching, research, and service outcomes. We have sought at all times to sustain excellence in the fulfillment of our core mission while capitalizing on opportunities to break new ground as a leading educational, cultural, and economic engine for the state of Maine.

At UMaine, we recognize and are actively engaged with the shifting regional and national context in which we operate. We seek to embrace constructive change and produce leaders who respond to pressing challenges in Maine and beyond. To continue advancing excellence, we have undertaken a number of significant changes since our last comprehensive review.

Partnering with the University of Maine at Machias

As noted above, the University of Maine at Machias (UMM) became a regional campus of the University of Maine in 2017, a move aimed at ensuring continued access to public higher education in Down East Maine, promoting enrollment growth, increasing operational efficiencies, and strengthening academic and research opportunities for students, faculty, and the communities served by both institutions. In the year and a half since this relationship was forged, the two campuses have worked toward administrative integration, some curriculum and program alignment, and an effective governance structure. (For example, UMM faculty report to a Vice President for Academic Affairs who serves as the head of the Machias campus while also serving on the UMaine Cabinet, Deans' Council, and Provost's Council, and reporting directly to the President. In this way, UMM's chief academic officer is fully integrated in UMaine's leadership.)

Cross-campus collaborations have produced some shared courses, transfer programs to advanced degree pathways, and integration of enrollment management operations. Initiatives are underway to grow UMM engineering and nursing education, two fields facing workforce shortages in the Maine economy and in Down East Maine (Washington and Hancock counties), in particular. For graduate students, the UMaine-UMM partnership expects to expand teaching opportunities and engaged research in areas of existing strength, especially the marine sciences.

Planning strategically for our future

In 2011–2012, a new comprehensive strategic plan was developed through a consensusdriven process led by former President Paul Ferguson. Organized around five pathways, the Blue Sky Plan was grounded in the following vision: The University of Maine aspires to be the most distinctively student-centered and community engaged of the American Research Universities. The plan continued to serve as the university's strategic guide under former President Susan Hunter, whose four-year tenure began in 2014 and encompassed most of the plan's lifespan. In 2017, President Hunter charged Provost Jeffrey Hecker with leading a year-long assessment of the Plan — its outcomes, its efficacy, its shortcomings — to prepare us for our next planning process. The Blue Sky Outcomes process mirrored the Plan itself in its transparency and inclusiveness, and succeeded in readying the university for our next strategic direction.

On July 1, 2018, Joan Ferrini-Mundy became the 21st president of the University of Maine. In November 2018, President Ferrini-Mundy and her leadership team introduced a Strategic Vision and Values initiative: Defining Tomorrow at the University at Maine. Its central goal is to engage the campus communities in a dialogue about our strategic values through a set of conversations and public fora addressing three core areas of our mission and work: Fostering Learner Success, Creating and Innovating for Maine and Beyond, and Growing and Stewarding Partnerships. The outcomes of these dialogues will be used in spring 2019 to articulate a set of goals, strategies, and benchmarks guiding UMaine into its future. A resultant strategic plan will be presented to the University of Maine System Board of Trustees in May 2019.

Shaping enrollment: initiatives and growth

Since 2015, undergraduate enrollment, followed by graduate enrollment, has steadily increased, in large measure because we have substantially strengthened our strategic and operational approach to enrollment management. In 2012, a Vice President for Enrollment Management was hired to lead a Division of Enrollment Management encompassing Admissions and Recruitment, Financial Aid, New Student Programs and Orientation, and Student Employment. The division shapes and leads university-wide efforts to grow enrollment through data-driven recruitment in alignment with the strategic priorities of the university and UMS BOT. This investment has borne fruit: total degree-seeking enrollment in fall 2018 was 7% higher than in fall 2012, representing a net increase of 650 degree-seeking students and 21,520 credit hours generated between 2012–2013 and 2017–2018. Further, we have seen increasing diversification of our student demographics. For example, the percentage of degree-seeking students from an underrepresented minority group increased from 5% in 2012 to 7% in 2018; the number of Hispanic students has more than doubled during this time.

UMaine is in the fourth year of a new campaign to grow first-year enrollment. Its centerpiece, the Flagship Match, is a competitive scholarship program guaranteeing that academically qualified first-year students from select states will pay the same tuition and fee rate at UMaine as they would at their own state flagship institution. The Flagship Match has produced a series of sizable incoming classes, including record-breaking ones in 2016 (2,230) and 2017 (2,299). All other incoming students receive a competitive grant to offset the cost of nonresident tuition and fees.

The Maine Top Scholars program, a four-year, full-tuition scholarship program, was launched in 2017 with the goal of attracting Maine's strongest academic performers. The program produced nearly twice the yield expected in its first year, with 38 of the state's highest academic achievers choosing to attend UMaine. Over the past two years, the mean SAT score for incoming first-year students has increased by 11 points, and the mean high school GPA from 3.2 to 3.3.

On census day in fall 2018, UMaine's total enrollment was 11,404 undergraduate and graduate students. Maine residents made up 7,351 of our overall student body (64%), while 4,053 students were nonresidents (36%). The resident/nonresident mix has notably changed since 2009, when 84% of our enrollment was from Maine.

Ensuring financial sustainability and transparency

UMaine has improved its financial position since the last NECHE accreditation review a decade ago. In fiscal year 2018, the university had an annual unrestricted operating budget, including auxiliaries, of approximately \$323.9 million. This includes \$83.9 million in budgeted unrestricted state of Maine appropriation. Tuition and fees comprise 49 percent of total revenue. In addition, the state legislature provides UMaine with \$12.3 million in restricted funding for the Maine Economic Improvement Fund (MEIF), a program promoting economic growth through research and development in seven key sectors of the Maine economy. As a percentage of total operating budget, state appropriation to UMaine has decreased 9.8% since 2009, while increasing 6.0% at UMM over the same span.

UMaine's budgeting process reflects the institution's commitment to transparent practices. The President, Provost, and Chief Business Officer hold an open forum once each fall and twice each spring to review the budget and our institutional planning process. The budget "build" is verbally and visually presented in considerable detail, and is followed by an open-ended Q&A with faculty, administrators, students, community members, and other attendees.

Each spring, UMaine's senior leadership, including the Chief Business Officer, begins meeting weekly to ensure that university budgeting for the following fiscal year is consistent with the institution's needs and priorities. The FY2018 budget was the first prepared under the University of Maine System's (UMS) unified budget plan process, and the impact on UMaine's budget planning was minimal. In 2017–18, UMS benchmarked the operating expenses of each of the universities against a set of external (non-UMS) peers to ensure appropriate, mission-driven budgeting.

Advancing research and learning

UMaine conducts nationally and internationally recognized research, and partners with private and public sector entities to stimulate and support the state's economic growth and development. The university contributes to Maine's quality of life through basic and applied research in venues from the Gulf of Maine and Maine's forestlands to high-tech campus laboratories. The university is consistently ranked among the top third of public universities engaged in research through the National Science Foundation (NSF) Higher Education Research and Development (HERD) Survey, and is classified as a Higher Research Activity Institution by Carnegie. Research at UMaine extends beyond departmental boundaries. Graduate students are encouraged to bring ideas from across academic disciplines to develop original, interdisciplinary work. Our students use forest bioproducts to help reinvent space travel; electrical engineering research complements neuropsychological research; climate change is visualized through the arts; and mechanical engineering research is leading to innovative medical treatment.

The university is committed to providing high-quality education at a cost within reach of families with college-bound students. In addition, we have made structural changes aimed at improving student success, including the re-introduction of Winter Session in 2016. Student can take a three-week online course delivered over winter break, taught by experienced online instructors. In 2018, 28 Winter Session courses were offered: 23 lower-division and 5 upper-division. Enrollment in Winter Session grew from 673 students the first year to 1,165 the second year, a 73% increase.

A growing number of students are using UMaineOnline to complete their 30 credits each year. UMaineOnline is the premier source for online education in Maine. Students may choose from over 500 courses each year. Recognizing a continued demand for online education at the graduate level as well, a new collaboration between the Graduate School

Institutional Overview

and Division of Lifelong Learning, UMaineGOLD (Graduate Online Degrees), was launched in 2018 to make high-quality online graduate programs available to adult and nonresidential learners.

Since 2009, the university has worked with UMS staff and the other UMS institutions to ensure congruence with NECHE standards for delivery and accountability for collaborative academic programs. A Systemwide administrative task force was created in early 2018 and charged with ameliorating obstacles to collaboration and ensuring integrity of academic offerings. In June 2018, that body preliminarily recommended: a) a two-level (governance and resources) committee structure for overseeing multicampus programs; and b) revision of BOT policy to effect a streamlined Intent to Plan process, and program approval process, for multicampus programs; and, a process for expedited program review. The task force includes faculty and administrators working at the direction of the UMS Vice Chancellor for Academic Affairs and the campus Chief Academic Officers in sub-teams addressing course cross-listing, tuition and revenue sharing; student policies and procedures; and governance. The task force will update the BOT on its progress in spring 2019.

Strengthening the student experience

UMaine is a student-centered institution committed to academic opportunity and community engagement. As part of the UMaine experience, undergraduates are involved in real-world enterprises that inform their academic work and provide contexts for growth. Opportunities include study abroad; Center for Undergraduate Research; lab, studio, and field research; Bodwell Center for Service and Volunteerism; co-ops and internships; and UMM's SAIL program. Among the newest student engagement opportunities is the UMaine Flagship Internship program, launched last year to introduce students to careers in a range of fields while cultivating young business leaders for the Maine workforce.

UMaine is active in badging and credentialing. An outgrowth of the Blue Sky Plan, the Engaged Black Bear program is a digital badging initiative with a fourfold mission: (1) to build a pipeline to higher education; (2) to capture and share learning experiences on campus not traditionally recognized on transcripts; (3) to develop a pipeline to employment opportunities; and (4) to assess impacts and learning outcomes. Through the program, badges create a verifiable record of student skills and engagement activities in a system of learning pathways formally aligned with Association of American Colleges & Universities learning outcomes. (See also Standard Eight.)

Student success is paramount and is a joint responsibility of Academic Affairs and Student Life. With leadership from Vice President for Student Life Robert Dana and other Student Life personnel, Provost Hecker launched UMaine's First-Year Student Success Initiative in September 2018 with a principal focus on first-to-second year retention and ongoing academic success. Ten working groups are leading data-informed investigations of key challenges to retention and student success, including preparation, first-year advising, math placement and first-year math outcomes, and early intervention. Their findings will culminate in a report used to guide resource allocation, administrative improvements, and improved communication in 2019–2020 and beyond.

Key findings

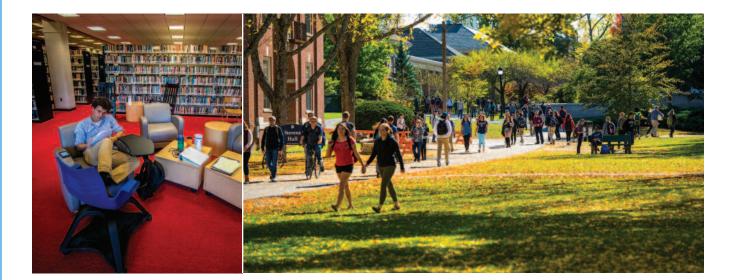

In preparing the Self-Study, we have identified four institutional goals reflecting areas NECHE has asked us to consider, along with other areas central to our ongoing mission and engagement with stakeholders — students, faculty, staff, alumni, legislators, donors, research and economic development partners, and community members:

- 1. We will continue to build relationships and alignments between the Orono and Machias campuses as we shape a unified University of Maine. We are focused on ensuring UMM's fiscal stability, integrating the campuses administratively and academically, growing enrollment at UMM, and fostering academic and community relationships between the two campuses to promote shared identity and shared purpose.
- We will continue to partner with the University of Maine System (UMS) and our faculty to achieve alignment with UMS priorities and clear, timely communication about academic programming, UMS and campus initiatives, resource allocation, and shared governance.
- 3. We will continue to assess UMaine's General Education program in work led by faculty with support from the administration. The outcomes of these assessments, and similar efforts at UMM, will inform curricula and programs on both campuses for the continuous improvement of student learning.
- 4. We will seek to continue UMaine's successes in undergraduate and graduate enrollment growth; in strategic expansion of program delivery through UMaineOnline; in fiscal and structural planning for the future of the Maine Business School; and in ongoing initiatives aimed at increasing retention and related academic outcomes while improving the student experience, particularly for our first-year and transfer students.

Taken together, measurable achievement in these areas will help to ensure that we appropriately diversify our sources of revenue, meet our goals for enrollment and retention, and expand avenues for partnering with and supporting UMM.

Moving forward

Fostering a culture of inquiry requires that the members of a learning community be willing to address and resolve challenges new and old. The honest and rigorous reflection encouraged by this Self-Study process has revealed some areas requiring improvement so that the University of Maine can maximize its potential. The process has also helped us see more clearly the things we believe we are doing well. We look forward to the feedback and insights of the review team and the Commission, and we trust you will enjoy learning about Maine's flagship university, and why we are so proud of it.

Standard One:

Mission and Purpose

Description

Mission statement

The current University of Maine mission statement was approved by the University of Maine System Board of Trustees in November 2010 and is available under the "About Us" tab on the home page of the university website. It reads:

The University of Maine advances learning and discovery through excellence and innovation in undergraduate and graduate academic programs while addressing the complex challenges and opportunities of the 21st century through research-based knowledge.

Opportunity for all members of the University of Maine community is a cornerstone of our mission. The university welcomes students, research partners and collaborators into an atmosphere that honors the heritage and diversity of our state and nation.

Founded in 1865, the University of Maine is a land and sea grant institution and the flagship campus of the University of Maine System. This vibrant and dynamic university serves the residents of Maine, the nation, and the world through our acclaimed programs in teaching, research, and outreach.

Inspiring and dedicated teaching propels students into new fields of learning and promotes interdisciplinary understanding. Our educational goals are to help students develop their creative abilities, communication, and critical thinking skills, and understanding of traditions in ethics and rationality within the arts, sciences, and professions.

Internationally recognized research, scholarship, and creative activity distinguish the University of Maine as the state's flagship university, where faculty and students contribute knowledge to issues of local, national, and international significance. As the state's doctoralgranting institution, research and education are inextricably linked.

Comprehensive outreach, including public service, Cooperative Extension, continuing education, and distance learning, engages learners of all ages in improving their lives and communities. Using research-based knowledge, outreach efforts promote sustainable use of Maine's abundant natural resources and build intellectual, cultural, and economic capacity throughout Maine and beyond.

Through integrated teaching, research, and outreach, the University of Maine improves the quality of life for people in Maine and around the world, and promotes responsible stewardship of human, natural, and financial resources.

Approved by the UMS BOT in July 2012, the mission statement for the University of Maine at Machias can be found under the "About UMM" tab on the university home page. It reads:

Through our Environmental Liberal Arts core, distinctive baccalaureate programs, and studentcentered community, the University of Maine at Machias creates enriching educational opportunities that prepare graduates for professional success and lifelong engagement with the world. UMM embodies an active community of diverse learners who share a commitment to exploration, leadership, collaboration, and interdisciplinary problem solving. Inspired by our unique coastal location, UMM's creative energy, applied research, and community engagement enhance the social, cultural, economic, and natural environments of the State of Maine.

Appraisal

The UMaine and UMM missions guide our academic programming, research and creative activity, and community-engaged service. Since UMaine's 2014 fifth-year interim report, the university has invested concretely with respect to two significant influences on our mission.

Advancing our strategic priorities

First, we have responded strategically to priorities identified in 2016 by the Board of Trustees: "(I)ncrease enrollment; improve student success and completion; enhance the fiscal positioning of the University of Maine System (UMS); and support Maine research and economic development." These priorities — updated and affirmed in the Board's December 2018 Declaration of Strategic Priorities — align strongly with our continuing land grant, sea grant mission: "Through integrated teaching, research and outreach, the University of Maine improves the quality of life for people in Maine and around the world, and promotes responsible stewardship of human, natural, and financial resources."

The addition of UMM as a regional campus of UMaine reflects University of Maine System Board of Trustees (BOT) priorities for enrollment and student success under the aegis of One University, a concept first announced in 2014. One University has never been explicitly defined. It has been invoked in cases where UMS-initiated centralization or partnerships among UMS institutions have lead to administrative efficiencies, cost reductions, or increased access for students pursuing coursework at two or more campuses. In its December 2018 Declaration of Strategic Priorities to Address Critical State Needs, the BOT described One University as a commitment to "making all UMS university resources available to support Maine families, businesses and communities regardless of location." The ongoing effort to align resources and opportunities for students, faculty, staff, and community partners at UMaine and UMM has been cited as a One University initiative, mostly recently in Chancellor Page's March 16, 2018 letter to NECHE.

UMaine now supports several core UMM administrative functions, including student financial aid and enrollment management, and the two institutions' faculties have developed a number of 1+3 and 2+2 agreements (and similar models), permitting students to begin their undergraduate studies at UMM and transfer to a desired UMaine program after one or two years.

Second, UMaine began redirecting a subset of applicants from its admissions funnel in spring 2018 to support a new partnership with the University of Maine at Augusta (UMA) called UMA Foundations. UMA admitted qualified applicants from that pool, and the two institutions jointly offered those students a four-semester term as UMA students taking UMA course while residing on the UMaine campus in Orono. Students meeting UMaine requirements may transfer at the end of the fourth semester and continue their education as UMaine students.

Thirty-four students matriculated in the fall 2018 UMA Foundations cohort. Our enrollment target for the fall 2019 cohort is 50. A joint UMA-UMaine oversight team meets each semester to review academic and student-life outcomes for Foundations students, and adjust communications, services, or academic support structures as needed.

Projection

The Blue Sky Outcomes Report identifies three lessons learned that will inform our next strategic plan. First, clearly defined goals and a firm understanding of our starting point(s) are imperative. Second, developing a strategic plan is only the first step in the process, and not the most important one; effective implementation and assessment are critical. Third, a strategic plan must be a living document, changing as needed to allow the institution to be nimble, responsive, and opportunistic.

UMaine and UMM will continue to review regularly our mission statements and our teaching, research, and service relative to mission fidelity, strategic planning, and our obligation to meet statewide needs. The statements continue to serve as UMaine's and UMM's primary guides as we pursue our distinctive yet complementary missions. The UMaine and UMM communities are jointly defining our strategic values and shaping our next strategic plan.

Planning and Evaluation

I. Planning

Description

The Blue Sky Planning Process

Since 2011–2012, UMaine has allocated significant resources to develop, implement, and (more recently) assess our 2012–2017 Blue Sky Strategic Plan. The plan has guided growth and has informed decision-making in all campus units.

In fall 2011, former UMaine President Paul Ferguson convened a 26-member leadership team of faculty, staff, students, alumni, and external stakeholders to develop a strategic plan. The planning group met weekly over the academic year. Ultimately, the planning process involved more than 30 public fora, where campus and external participants engaged with the planning group and provided feedback. Formally accepted by the UMS BOT in July 2012, the plan defined five pathways aligned with UMaine's mission and responsive to emergent opportunities and concerns emphasized in a November 2009 NECHE letter to former President Robert Kennedy.

Specifically, NECHE asked in 2009 that subsequent interim reports address our successes in (a) completing our strategic planning process, (b) implementing a comprehensive approach to the assessment of student learning, (c) implementing plans to address deferred maintenance and improve our physical facilities, (d) implementing a coordinated approach to enrollment planning and management, and (e) setting academic priorities consistent with our mission and purposes.

UMaine's Blue Sky Strategic Plan organized institutional planning and priorities on the following model:

Pathway 1. Serving Our State: Catalyzing Maine's Revitalization Ensures UMaine teaching, research, outreach, and workforce and economic development are in close alignment with Maine's priority needs, and are developing initiatives to enable UMaine to enhance technology transfer and commercialization, and support use-inspired research for the public good of Maine.

Pathway 2. Securing Our Future: Ensuring Financial Sustainability Optimizes operating efficiencies and control expenditures in a financially sustainable business model, and seeks new and entrepreneurial revenue sources. Initiatives include new advancement and research, and a new enrollment management unit with a plan to potentially increase enrollment to 15,000, increasing the number of out-of-state and international students, and increasing academic partnerships with Maine's sister universities and community colleges.

Pathway 3. Embracing a Culture of Excellence: Promoting Spirit, Collaboration, and Community Invests in faculty and staff professional development, refreshes the UMaine brand, and improves communication among all constituencies. Initiatives include establishing consistent and high-quality brand standards to better promote UMaine, harnessing the goodwill of alumni for student internships and career networking, and promoting UMaine's role in athletics as the state's only NCAA Division I university.

Pathway 4. Transforming Lives: Strengthening the Student Experience Promotes undergraduate and graduate opportunities for student success, including valueadded residential life, research fellowships, internships, and more effective advising and learning environments. Initiatives include developing new models for learning to better prepare graduates for meaningful jobs and lives, establishing an outcomes-based assessment of all academic programs, and increasing the number of externally funded opportunities for student research.

Pathway 5. Restoring the Dream: Renewing Pride and Stewardship of Place Restores and creates UMaine's physical and technology infrastructure to ensure a vibrant place of learning and discovery. Initiatives include a Total Cost of Ownership approach to managing UMaine's \$1 billion in infrastructure and real estate, fully funding appropriate levels of campus upkeep and beautification, and continuing to implement campus sustainability initiatives.

Following adoption of the Plan, President Ferguson established an implementation Steering Committee comprising faculty, administrators, staff, and external constituents, along with individual working committees, to track progress in each of the pathways

through the 2013–2014 academic year. The President's Cabinet and the college deans led efforts to implement goals in each of UMaine's primary academic and administrative divisions. This work continued under former President Hunter and Provost Jeffrey Hecker. Between 2012 and 2017, the Blue Sky Plan was the guide and driver for all aspects of short-range and long-range planning, with successes defined in relation to the enactment of the plan's major and corollary goals.

As noted earlier, the Blue Sky Plan was evaluated in 2017–2018 through the Blue Sky Outcomes process, followed in turn by the Strategic Vision and Values process begun in fall 2018 (see Institutional Overview).

Appraisal

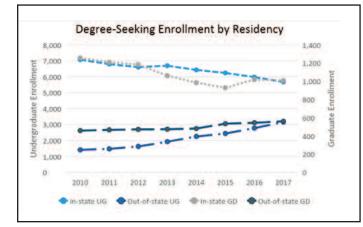

UMaine has achieved several major Blue Sky Strategic Plan goals since 2012. Notably, the identification and promotion of Signature and Emerging Areas of Excellence in research and education have catalyzed planning across the colleges, research centers, Academic Affairs, and the Office of the Vice President for Research and Dean of the Graduate School. An inclusive campus dialogue and proposal process (58 pre-proposals and 20 full proposal submissions) informed the selection of our Signature and Emerging Areas, representing existing and developing strengths in research and education where UMaine has achieved statewide, national, and, in some cases, global impact. The designation of these areas entailed a tangible commitment to align fiscal and human resource investments with our academic and research strengths.

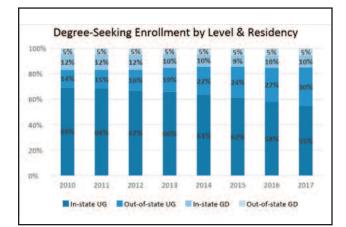

Retention and graduation initiatives

Consistent with objectives in Pathway 4 — Strengthening the Student Experience — Provost Hecker formed a year-long advisory/investigatory group on retention and graduation. Its work produced the 2014 Action Plan for Retention and Graduation and spawned a coordinated set of initiatives, including: the Think 30 campaign to encourage undergraduate student retention and degree completion (see also Standards Five and Eight); expansion of internship opportunities through the Flagship Internship Program (see also Standard Five); expansion of first-year success course offerings (see also Standard Four); creation of a first-year and transfer student center (see also Standard Five); expanded use of Maine Learning Assistants for supplemental instruction in high-demand courses (see also Standard Six); and the creation of the Engaged Black Bear Initiative (see also Standard Five).

Enrollment planning

UMaine has strongly prioritized integration of enrollment management and financial planning. Planning processes shaped by the Blue Sky Plan's Pathway 2 produced a number of strategies to ensure financial sustainability. Among the most important was

to increase enrollment among out-of-state students (see also Standard Five). UMaine's recruitment efforts have been significantly aided by enhanced marketing and branding activities (Pathway 3), and Division of Marketing and Communications policies and procedures, "paint and polish classroom modernization," and technology infrastructure upgrades on the Orono and Machias campuses and at UMaine's Darling Marine Center in Walpole, Maine (Pathway 5).

The development and launch of new online programs through the Division of Lifelong Learning (DLL), and expansion of student recruitment activities in the Office of International Programs (OIP) and the Graduate School have yielded clear growth, particularly in online enrollment. The UMaine community as a whole has increased its engagement in enrollment management-led student recruitment and yield activities, including weekend Open House and Accepted Student Day events staffed by faculty and professional advisors in the academic colleges.

Administrative restructuring

Since 2009, we have made several organizational changes, including some consolidations, and have revised our institutional budget process. The former Development Office and the University of Maine Foundation merged on July 1, 2016 to increase transparency and brand recognition for alumni and other donors seeking to support UMaine. In 2017, the university and the Foundation launched the Vision for Tomorrow comprehensive campaign, with \$121 million raised by the public launch date and \$161 million of the overall \$200 goal raised by January 2019.

The Offices of the Vice President for Research and the Graduate School were consolidated under a single vice president and dean in 2014 to align research and graduate studies, and with the twin goals of increasing research productivity and growing graduate enrollment. UMaine named a Vice President for Innovation and Economic Development in 2012 to commercialize university research and foster entrepreneurship among undergraduate and graduate students. In addition, back-office functions in information technology, facilities management, human resources, procurement and travel, and finance and budgeting have been centralized in the University of Maine System to reduce administrative costs.

II. Evaluation

Description

Institutional Planning

Planning and evaluation at UMaine is informed by the work of the Office of Institutional Research and Assessment (OIRA). OIRA plays an important and ongoing role in monitoring the university's standing and progress in multiple arenas. In addition to completing external surveys (e.g., U.S. News & World Report, IPEDS), OIRA monitors and reports internally on student-related metrics: enrollment, student credit hours, admissions, and degrees conferred. Further, OIRA draws on National Student Clearinghouse data to conduct analyses of nonmatriculating admitted freshmen and members of the first-time full-time cohort who do not return for their second year. A comprehensive accounting of retention and graduation rates is provided for each cohort of first-time full-time students, reflecting UMaine statistics in isolation and in the context of benchmark comparisons. UMaine has also participated in the Student Achievement Measure (SAM) from the initiative's onset, providing us with a more inclusive and meaningful portrait of continuation and graduation rates than the federal definition affords (see also Standard Eight). OIRA also reports internally on faculty in a way that allows for monitoring of changes in faculty composition over time. These data contribute along with other factors to decisions about faculty hiring.

Much of the data above is disaggregated by academic unit and regularly used in the seven-year review of academic programs. That process entails a self-study by the unit incorporating data about student-learning outcomes and evidence of their use for program improvement, enrollment, credit hour production, degree conferrals, extramural funding of faculty research, and other considerations discussed more fully in Standard Four. The self-study is followed by an external review, the unit's response to the external review, the respective dean's evaluative report to the Provost, and the institutional report of the review (a summary by the Provost, approved by the President, and forwarded to the Chancellor's office).

OIRA regularly conducts enrollment and credit-hour projections that inform UMaine's annual budgeting process and its Multi-Year Financial Analysis. OIRA also conducts course-enrollment projections, allowing for more efficient scheduling decisions. The Senior Associate Provost and the college associate deans use these projections each summer to ensure that sufficient seats exist in high-demand fall courses (e.g. Calculus, introductory Chemistry, introductory Biology) to meet the needs of incoming STEM students and other students campuswide.

Institutional assessment

UMaine and UMM have occasionally participated in the National Study of Student Engagement (NSSE), the survey designed to assess undergraduate students' views of their educational experience, including the quality of their education and how they spend their time. UMaine and UMM most recently administered NSSE in 2017 as part of a Systemwide initiative. Earlier NSSE administrations for UMaine were in 2005, 2007, and 2011, and in 2008, 2010, 2012, and 2014 for UMM. Future regular participation in NSSE will occur as part of UMaine's and UMM's participation in an ongoing system-wide initiative.

A related UMS initiative was UMaine's 2018 participation in the Delaware Cost Study, which allows for benchmarking an institution's instructional costs, research, and public service expenditures at the academic discipline level. UMaine will use the Delaware data to improve its processes for academic resource allocations at the college level.

In 2015, UMaine contracted with EAB to implement the Academic Performance Solutions (APS) platform, which provides administrators ready access to institutional

data on enrollment, credit hours, faculty workload, course capacity, and completion rates. The UMaine platform has been rolled out to deans, associate deans, and a subset of department chairs and professional advisors. Campuswide training and adoption are planned for 2019.

Appraisal

UMaine academic program assessment

While data collection and tracking for strategic institutional planning purposes are regular and effective, UMaine's implementation of the review cycle for academic program assessment has been uneven. Externally accredited programs and some nonaccredited programs remain on a consistent schedule of review, but some programs that do not respond to an external accreditor are behind schedule. There are reasons for this: The process is relatively new to some faculty; UMaine currently lacks (and is pursuing) a centralized data storage system, accessible to departments and administrators, for the collection of program review data; and information about program review is not yet communicated through a consistent, centralized channel, thus allowing some elements of the process to be overlooked or redirected improperly.

Solutions for challenges in UMaine program assessment

The university is responding concretely to each of the three challenges. First, UMaine merged its offices of Institutional Research and Assessment in January 2019 under the leadership of a new Assistant Provost. The merger comes with resources for hiring additional assessment staff in spring 2019 and refocusing the work of existing assessment staff on program and General Education review/assessment (in partnership with Faculty Senate and faculty in academic units).

Second, we anticipate resolving data storage and communication concerns over the coming year through the adoption of a software system capable of streamlining our management of program review data, and improving attendant communication with deans, faculty, and academic unit staff.

UMM academic program review

In addition to regular program evaluation similar to UMaine's model, UMM develops an annual profile for each academic program and engages in an annual program assessment process that guides planning efforts for the next academic year. The data gathered feed into the Head of Campus' annual report (akin to UMaine's annual academic reporting as outlined below).

UMaine academic and campus climate reporting

The Provost's Annual Report is data-informed, reflecting enrollment data, student credit hour production, retention and graduation rates, and degrees conferred, and other areas of academic output. So, too, are the annual reports provided by each dean. We expect the deans' annual reports and planning processes to be enhanced by data incorporated from the Delaware Cost Study and by increasing use of the Academic Performance Solutions platform campuswide. These data streams should prove helpful in decisions about strategic resource allocation, course scheduling, and hiring, particularly with respect to high-demand and/or gateway courses.

Another example of data used to monitor and support institutional progress is found in the work of the Rising Tide Center, the outgrowth of an NSF ADVANCE grant promoting gender equity with a focus on STEM and the social-behavioral sciences. Among other activities, Rising Tide staff annually examine faculty data for gender disparities by discipline, rank, time in rank, and tenure/tenure-eligibility. They also collect and evaluate data about new hires and attrition. The center's director reports to the Provost, who applies Center data to academic resource decisions in tandem with guidance and recommendations from the Center Director and the Provost's Council on Advancing Women Faculty, a group with campuswide faculty and administrative representation.

Using data to improve UMaine research administration

To benchmark its research administration infrastructure against national standards, the Office of the Vice President for Research and Dean of the Graduate School commissioned the National Council of University Research Administrators (NCURA) to carry out a comprehensive peer review. In July 2014, a three-member NCURA team conducted a site visit and issued a report the following September. The report comprised 86 recommendations across eight themes: role of research, organizational structure, roles and responsibilities, communications, policy, functional training, electronic tools, and miscellaneous.

The Vice President for Research and Dean of the Graduate School developed a comprehensive strategy to prioritize these recommendations, formulate appropriate actions, and implement them. Significant improvements in research administration infrastructure and function made since 2014 include:

- Complete overhaul of the sub-recipient award process to ensure proper oversight and reduced institutional risk.
- Assignment of additional personnel to award review and negotiation, such that the time needed for review and setup has been dramatically decreased.
- Improved communication among the offices of Research Administration, Research Compliance, and Grant Development through weekly managers' meetings and biweekly all-staff meetings.
- Establishment of the Research Administrators' Network, an initiative aimed to improve communication between the central office and local research administrators to provide a means for sharing expertise and best practices.
- Improved cross-training of ORA staff to ensure that backup support is available for work overloads and/or staff absences and/or temporary vacancies.
- Development and wide dissemination of a Proposal Submission Policy and Timeline.

Using data to support UMaine and UMM academic and student success initiatives

In addition to monitoring institutional progress, data regularly are used to assess the impact of new initiatives. For example, UMaine is assessing early outcomes of the Think 30 initiative by monitoring average debt levels, as well as the credit-hour-taking behavior of students in their first year, before and after the start of Think 30. We have taken a similar approach in evaluating UMaine's Winter Session (reintroduced as a three-week, wholly online academic term). Initial results are encouraging in both cases: enrollment in Winter Session increased 73% between the first and third years, and the percentage of returning first-year students who earned 30 or more credits during their first year increased 12 percentage points since the beginning of the initiative in 2015.

In 2017, UMaine and UMM each identified a set of peer institutions to be applied in the UMS Appropriation Allocation Model (see also Standard Seven), and included in benchmark analyses of academic programs and other areas of operation.

UMM also undertook an extensive assessment of its strategic plan in spring 2018 and produced a set of strategic recommendations for UMaine's incoming President and UMM's incoming Vice President for Academic Affairs and Head of Campus to guide them in UMM's and UMaine's Strategic Vision and Values planning process.

Projection

Sustaining and growing enrollment in the Northeast present manifold challenges. Numbers of high school graduates are declining and are projected to drop precipitously in the mid-2020s. In addition, the New England states are in increasingly fierce competition (and under increasing political pressure) to persuade their own high school graduates to remain in state for college, while encouraging other states' student to come to their respective institutions.

Achieving enrollment targets

Despite these challenges, UMaine's five-year enrollment projection for fall 2023 is 3% higher than fall 2018, due principally to planned increases in undergraduate (including out-of-state) and graduate enrollment. Just as the Blue Sky Plan called for identification of new revenue streams, the projected enrollment growth will depend on

the diversification of student pipelines to include more international students, more online students, and more professionally focused graduate students. To achieve these goals, UMaine will need to make additional investments in growing high-demand academic programs, and in the recruitment, admissions, and advising functions that support them.

The recently launched UMaineGOLD initiative will enhance efforts to provide graduate online education; it reflects this adaptation in enrollment management strategy. UMaineGOLD is projected to increase online enrollment by at least 25% by FY2020.

Investing in student success

UMaine's ongoing First-Year Student Success Initiative will culminate in a comprehensive action plan to improve the first-year student experience. Ten working groups will recommend actions addressing living-learning communities, faculty development for first-year course instruction, improving first-year success courses, placement exams, new student orientation, student services, and summer preparation. Final working groups will be submitted to Provost Hecker in May 2019. Investments and structural improvements tied to goals in the comprehensive plan will be implemented over the next five years.

UMaine and UMM academic collaboration and program integration

Active academic program collaborations between UMaine and UMM include efforts to bring engineering and nursing education to UMM, as well as continued development and approval of 2+2 agreements for eligible students to begin their careers at UMM and transfer to UMaine after four semesters. University of Maine System (UMS) academic initiatives, particularly efforts to establish multicampus degree programs, will influence UMaine and UMM planning and evaluation: specifically, where we invest academic resources, how we deliver programs, how students engage in our courses and programs, and how student learning will be evaluated. The partnership between UMaine and UMM reflects a new model of academic and administrative cooperation and collaboration with important implications for both campuses and, ultimately, for UMS. Strategic development of academic ties between UMaine and UMM will present opportunities and challenges for both campuses, and will likely serve as a model for future collaborations and partnerships elsewhere in UMS.

Expanding access to data

OIRA, which began providing institutional research services for UMM in fall 2018, has three goals for the next two years:

- Collaborate with the UMS Data Analytics and Report Technology Services group to develop an expanded set of data extraction and reporting tools to create efficiencies for standard reporting. This will, in turn, provide OIRA the opportunity to allocate more resources for modeling and other comprehensive analyses.
- Supplement the data offered in the APS platform with additional dynamic reports to give deans, associate deans, chairs, and other stakeholders ready access to broader sets of data.
- Expand retention and graduation rate reporting for graduate and online students.

Standard Three:

Organization and Governance

I. Governing Board

Description

UMS and campus governance structures

UMaine is the largest of the six universities in the University of Maine System (UMS). The state of Maine chartered UMS to govern and administer the universities through a Board of Trustees (BOT) and a Chancellor. The BOT has adopted policies and bylaws defining its governance authority, responsibilities, and procedures. Each university has a president who reports to the chancellor. The structure of UMaine is supplied in organizational charts that display the working order of the institution. The President oversees the university's academic, research, administrative, finance, and development functions. The UMaine Faculty Senate represents the faculty in the development of university-wide policies and elects a BOT faculty representative. The Associated Faculties of the University of Maine (AFUM) bargaining unit negotiates salaries and other considerations for faculty Systemwide. Academic departments develop tenure and appointment criteria, which are approved by Academic Affairs. The UMaine Student Government and Graduate Student Government elect representatives to the UMaine Faculty Senate and to the BOT.

The UMM Vice President for Academic Affairs and Head of Campus serves on the UMaine's President's Cabinet and is the primary UMM administrator. There is no UMM faculty senate, but rather a meeting of the whole, with faculty representation on the Planning and Budget Advisory Committee and campus Leadership Committee as part of shared governance. The Head of Campus routinely reports on campus, Orono, and System developments to the UMM faculty and staff through email updates, monthly meetings, and annual reports.

UMM and UMaine share a Chief Business Officer, based in Orono, who has a dual direct reporting relationship to the Vice Chancellor for Finance and Administration and the President. The base budgets of UMM and UM are managed separately. The needs and aspirations of each campus are represented in annual budgeting processes, one-time allocation decisions, and short-and long-term fiscal planning. UMM tuition revenue, state appropriation, research dollars, and other sources of revenue are carefully managed in support of UMM's teaching, research, and service mission.

UMaine has an organizational structure, decision-making processes, and policies that reflect its mission and support institutional effectiveness. UMaine's system of governance involves the participation of all appropriate constituencies and includes regular communication among them. UMaine has a published mission statement approved by the Board of Trustees (see Standard One). Consistent with this statement, each UMaine college follows bylaws, and both the University of Maine System and the University of Maine have published statements on shared governance.

Regular communication flows among various faculty and administrative organizations through representatives serving on, or invited to participate in, regular meetings of each group, as noted above. Further forums for exchange on important topics are regularly hosted by the campus administration. (Operations policy documents and/or bylaws exist for some departmental units, but these are not uniform across the campus.) An example of faculty shared governance at UMaine is the review of proposals for the creation, elimination, and reorganization of academic programs, a process followed consistently by the Faculty Senate (see its Policies and Procedures Manual).

The UMS Board of Trustees is the legally constituted body ultimately responsible for UMaine's quality and integrity. This authority and responsibility are vested through Maine state statutes and Section 4 of the UMS charter. The Board of Trustees comprises 16 members, 15 of whom are appointed by the Governor and approved by the Maine legislature through a public confirmation process. The appointment process is meant to ensure that the UMS Board of Trustees is sufficiently independent to act in the best interests of all UMS institutions.

BOT members are formally bound by a code of ethical conduct. Article 1, Section 1.2c of the UMS policy manual reads: "A Board member shall not vote on a matter in which he or she has a financial interest and each Trustee shall be bound by an appropriate code of ethics, as adopted by the Board of Trustees." In addition, the BOT's operating principles require that its members:

- Be accountable for governance, policy-making, and making decisions that are the responsibility of the Board of Trustees.
- Understand and respect the public's need for trust in office holders. Avoid conflict of interest concerns, both real conflict and the possibility of perceived conflict.
- Understand UMS finances.
- Be forthright with concerns. Concerns should be brought forward as they arise to the Board Chair, the Chancellor or the appropriate committee chair.
- Advocate for higher education with the public and elected officials in coordination with, and awareness of, the Chair, Chancellor, and System senior staff.

The BOT makes policy for UMS and oversees its implementation. The BOT provides leadership in UMS and in the state, and is committed to strengthening postsecondary education, the unique characteristics of each UMS university, and UMS as a whole. It is responsible for hiring the Chancellor and plays a central role in the hiring of campus presidents. The BOT advocates aggressively for resources to support the System and is responsible and accountable for the stewardship of those resources. Reflective of its thinking about current and future UMS needs and aspirations, the BOT recently released a Declaration of Strategic Priorities to Address Critical State Needs that will guide UMS resource allocation and investment until 2021.

The elected Chair and Vice Chair of the Board and Committee chairs comprise the Executive Committee of the Board. They organize the BOT's work and represent the broader body as required. The Board applies an inclusive process and develops consensus collectively. On major policy decisions (e.g. hiring a Chancellor or President, approving a budget or a tuition increase, altering an institution's mission), the Board acts through deliberative process.

The Board Chair is evaluated annually, and there is an annual self-assessment for other Board members. These two practices are referenced in the Board Bylaws under Article II, Section 2.3 and Section 2.6. (A copy of the Board Bylaws, the trustee practice on annual assessment of Board members, and the trustee practice on annual evaluation of the Chair are attached in the Data First Forms.) The BOT meets in person monthly. Regular communication with the Board of Trustees is conducted through the Chancellor and senior staff, though the offices of the UMaine President and Provost do respond to direct inquiries from BOT members.

Appraisal

Shared governance between the University of Maine System and UMaine

At UMaine and UMM, a clear and well-defined system of governance is in place, including areas of shared System-campus governance. For example, the UMaine budget team comprises the President, Provost, Vice President for Research and Dean of the Graduate School, Chief of Staff, and Chief Business Officer. The first four are UMaine employees; the fifth is a UMS employee. This group develops, presents to the BOT for review and approval, and implements the annual (balanced) UMaine budget via a collaborative and thoughtful process.

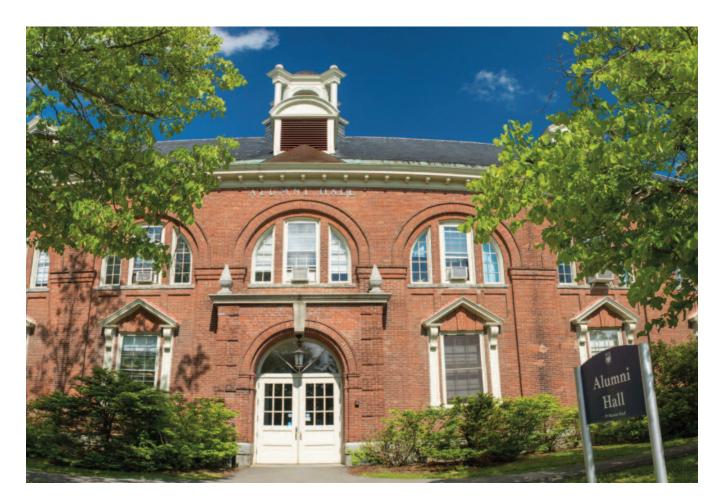

II. Internal governance

Description

The President

The UMaine President is responsible for five major areas of campus governance: academics, research, finances, infrastructure, and public service/community engagement. (Following a recent multistage service centralization process, UMS is responsibility for environmental safety, procurement, travel, human resources, and facilities maintenance.) The President's portfolio is detailed in the UMaine organizational chart.

The President is advised and supported by the Chief of Staff, the President's Cabinet, and the UMaine and UMM Boards of Visitors, who meet regularly to discuss institutional planning, outcomes, and future direction for Orono and Machias.

The Chancellor conducts an annual review of the President. Comprehensive reviews are conducted in the third year of the President's initial term and every fourth year thereafter. The Chancellor reports the outcome of the President's review to the Board of Trustees. Details of the review process are specified in Section 204.1 Presidents — Evaluation Process of the Board of Trustees policy manual.

The Executive Vice President for Academic Affairs and Provost

As the institution's Chief Academic Officer, the UMaine Provost has broad and significant responsibility for academic programs delivered on campus, off campus, and online. The Provost sits on the President's Cabinet and is active in nearly all academic, research, and economic/workforce development initiatives involving UMaine. The Provost chairs the UMaine Deans' Council, represents the university on the UMS Chief Academic Officers Council, and works closely with the President and UMM's Head of Campus on a range of academic and institutional planning efforts. There is a formal process for review and evaluation of the Provost every three years. It includes wide participation of faculty and staff.

The Management Group

Members of the Management Group (comprising Cabinet members, Deans, Senior Associate Provost, and Associate Provost) are reviewed every three years (each on a cycle established by her or his date of hire for the management position). Reviews typically involve interviews with other members of the Management Group, direct reports, and anyone else with whom the person works who wishes to provide input, including donors, external research partners, and economic and workforce development partners. These reviews ultimately fall under the direction and authority of the President. Management Group members who report to the Provost discuss the completed evaluation process in detail, and receive a letter summarizing the evaluation feedback, outlining the appraisal of that person's performance in the period under review, and identifying strengths and areas for improvement.

Faculty governance roles

Each UMS institution has one faculty representative (nonvoting) on the BOT. At the campus level, UMaine has numerous standing and ad hoc Committees of the Administration reflecting a number of decision-making arenas.

The process outlined in the UMaine Policy on Shared Governance requires the administration to contact the Faculty Senate for faculty nominees for administrative committees. The Senate offers names of nominees from which the administration may select the necessary representatives. The Senate is organized by several standing and ad hoc committees. They meet periodically with senior campus administrators on areas of shared responsibility, such as campus facilities and space, fiscal and budgetary matters, research and scholarship, and academic programs.

In addition, the Executive Committee of the Faculty Senate, comprising Senate leadership and committee chairs, meets monthly with the Provost or President. Full Senate meetings that include senior campus administrators occur monthly. Deans meet monthly with the Provost. These formal structures and practices allow for faculty and administrators to share information, resolve concerns, and provide substantive input shaping important decisions and policies.

UMM faculty serve on four standing committees and participate in two advisory groups. The standing committees (Professional Relations, Curriculum, Program Review and Evaluation, and Academic Affairs) allow ongoing faculty governance of curricular and evaluative matters. The two advisory groups (Leadership and Planning and Budget) have faculty representatives as part of both institutional governance and communications. There are multiple informal opportunities for faculty and staff involvement in institutional affairs beyond the above structure, including ad hoc committees and working groups for strategic planning, assessment, facilities, community engagement, and other shared areas of activity.

Formal policies and agreements, such as UMaine's Faculty Senate Constitution, the AFUM contract, and Policies on Shared Governance, affirm that the primary responsibility for academic programs and hiring reside with the faculty in their academic units. From the UMaine shared governance policy:

The areas of shared governance within the academic area include, but are not limited to, the following: (a) graduation requirements at all levels of matriculation; (b) the academic calendar; (c) the undergraduate General Education curriculum; (d) academic program reviews; (e) the establishment, merger, or discontinuation of departments, schools, and colleges; (f) the establishment of new degree programs (including online programs); (g) the establishment of or substantive changes to majors; (h) the elimination or consolidation of degree programs; (i) overarching undergraduate admissions policies; (j) overarching attendance and grading policies; and (k) oversight of requirements regarding academic standing (e.g. policies related to add-drop, course-repeat, Student Conduct Code, grade appeal, honors program, probation, suspension, and dismissal).

UMaine and UMM student participation in decision-making

UMaine students impact campus decisions through formal structures and informal practices. Both undergraduate and graduate students have a system of government through which their representatives communicate needs and share feedback with faculty and administrators.

At the UMS level, there is a BOT student representative. At the campus level, there is an undergraduate and graduate student representative to the Faculty Senate and to the Provost's Council. The Vice President for Student Life and Dean of Students meets regularly with the student governing bodies and their presidents, and student government officers meet monthly with the campus President, Provost and other senior administrators. Student government representatives also attend the Student Affairs Directors' meetings and meet with Auxiliary Services to provide input on student life and food services. Student government representatives are engaged with various student associations, such as the Residential Hall Association and the Non-Traditional and Commuting Students Council. In addition, many other committees (at all levels) solicit student participation and/or input into decisions impacting their lives on and off campus.

The UMM Dean of Students and staff meet with students in small groups to discuss issues as they arise. For example, the relocation of some campus program offices in 2017–2018 involved multiple focus groups to secure input from students about their space needs. The Dean's Office also conducts formal surveys of students on topics ranging from climate and safety to alcohol and drug use, among others.

Student representatives at UMM are invited to serve on the Academic Affairs and Curriculum standing committees, though they do not regularly choose to do so. Vice President for Academic Affairs and Head of Campus Egan has worked closely with the Student Senate to boost participation on those committees and ensure student representation at faculty and Board of Visitors meetings. The Head of Campus also meets regularly with the Student Senate president, and provides reports to (and addresses concerns with) the Senate itself.

Appraisal

UMS approved a shared governance policy statement in 2007. Since the last NECHE selfstudy, the UMaine campus also developed a shared governance policy statement signed by former President Kennedy and the Senate president in 2009. More recently, the academic colleges approved their own bylaws that describe shared governance with those units. In addition, the Faculty Senate created an ad hoc Committee on Shared Governance in 2017 to facilitate communication and action in this area.

Faculty concerns about communication and shared governance

Shared governance has been a subject of discussion in the UMaine Faculty Senate with regard to the UMaine and UMS administrations. Results from a spring 2017 survey of UMaine faculty conducted by the Senate's Ad Hoc Committee on Shared Governance identified improvements needed in communication, and in substantive, timely engagement of faculty in decision-making.

Some faculty have reported concerns about delays in information-sharing, lack of information, or short deadlines for feedback with respect to UMS policies and initiatives. The UMaine Faculty Senate has, on occasion, requested improved communications from the UMS or UMaine administrations. For example, at its April 6, 2016 meeting, the Senate approved a letter to the BOT Chair requesting that the "Board of Trustees put into place a synchronous notification system whereby the Faculty Senate of each campus is provided information in a form as complete as possible concerning proposed or pending academic policies in a timely fashion." More recently, the Senate discussed in a Nov. 16, 2016 meeting its desire to obtain clear information from the Chancellor's office about the BOT's proposed Strategic Resource Allocation Plan, and deliberated how best to engage with UMS to this end.

Since our 2009 NECHE review, one concern discussed by the Senate with campus administration was the creation and appointment of senior administrative positions without adequate faculty consultation. Another is the contention that the administration has not consistently followed policy in soliciting faculty nominees for committees through the Faculty Senate, as outlined in the UMaine Policy on Shared Governance.

In recent years, and particularly since 2014, these concerns have been concretely addressed. For example, UMaine hired four senior administrators between July 2018 and January 2019: Vice President for Enrollment Management, Dean of the Undergraduate School of Business, Dean of Cooperative Extension, and Assistant Provost for Institutional Research and Assessment. In each case, the administration a) requested and secured Faculty Senate representation on the search committee; b) invited all faculty (senators and non-senators) to attend a public forum for each finalist; and c) solicited faculty feedback about the finalists before making hiring decisions. The President or Provost also shared periodic updates on these searches with the full Faculty Senate, the Senate's Executive Committee, and/or the Senate President.

The Senate and the faculty union have asserted instances of UMaine and UMS decision-making that have not allowed sufficient time for faculty input prior to implementation. An example is a campus announcement from Academic Affairs that candidates for the position of Dean of the Graduate School of Business in the reorganized Maine Business School would be visiting campus for interviews in the week following Thanksgiving 2017. This announcement was made shortly after the Faculty Senate voted down the proposal offered by the Provost regarding the reorganization. From the perspective of some faculty, the timing indicated that the administration had been moving forward with the Dean position with the intent of filling it irrespective of the outcome of that vote.

Notwithstanding policies that articulate faculty responsibility for academic programs, some UMaine faculty contend that recent UMS initiatives to share or merge programs across campuses, including the unique partnership between UMM and UMaine, have, in practice, blurred the lines of responsibility for programs and faculty. For example, the merger of faculty from more than one UMS campus into a single program or unit has raised questions about criteria for faculty appointment to the graduate faculty of each campus, promotion and tenure criteria, and other matters. Regarding the Maine Business School, these concerns have been addressed, in part, by UMaine and University of Southern Maine graduate faculty's December 2018 adoption, in principle, of a governance document for the Graduate School of Business establishing faculty authority over curricula and other academic elements of the graduate program (see below).

Staffing levels and hiring procedures

There is ongoing review and consideration of staffing levels and hiring needs in all divisions at UMaine and UMM. The process is strongly empirical. For example, UMaine's Deans put forward projections, gains/losses of faculty, enrollment trends over time, and other data as part of an evidence-based assessment of faculty hiring needs. Similarly, professional staff hiring is tied to enrollment gains or losses; areas of academic and research program investment, need, and/or growth; student success initiatives; and related considerations.

Enhancing public-private partnerships

UMS and UMaine are enhancing external funding via public-private partnerships (as stated by the Provost at the Dec. 6, 2017 Academic Affairs Faculty Forum). It is important that campus stakeholders are involved in developing policies guiding such arrangements, and that stakeholders at all levels are aware of, and are involved in, decision- and policy-making processes.

Projection

UMaine's 2009 NECHE evaluation noted a need to agree on a structure of shared governance, and to clarify the Division of Lifelong Learning's relationship to the colleges and the Graduate School. As noted above, some faculty remain concerned about shared governance. We share an example of progress in this arena below.

Development of governance structures in the Maine Business School

In its August 8, 2018 letter to UMaine, NECHE asked us to report on elements of faculty engagement and implementation planning in the Maine Business School. (Academic and fiscal planning for the Maine Business School are addressed in Standard Six.)

In 2017, UMaine, in collaboration with the University of Maine System and the University of Southern Maine (USM), reorganized the Maine Business School to comprise the Graduate School of Business and the Undergraduate School of Business. The Graduate School offers an MBA in Portland and Orono and online, and will house planned future graduate programs in business for universities in the System. Graduate School of Business faculty include UMaine faculty with graduate appointments, and USM faculty with graduate appointments in the Maine Business School. The Graduate School of Business is led by a Dean based in Portland who reports to the UMaine Provost. The Undergraduate School of Business is led by a Dean based in Orono who

also reports to the UMaine Provost. Business faculty who do not hold graduate appointments report to their respective Dean at UMaine or USM.

In December 2018, Graduate Dean Michael Weber and the Graduate School of Business faculty at Orono and Portland agreed, in principle, to a Cooperating Agreement and Operating Guidelines document. The document reflects substantive faculty engagement in establishing a) process and criteria for appointment and reappointment; b) participation, including voting, in matters of Graduate School of Business curriculum and governance, meetings, rules of order, quorum, and agenda setting; and c) committees. The committee structures establish faculty governance roles in the coordination and delivery of Business programs; budget management, course scheduling, faculty teaching assignments, and matters of accreditation; and curriculum, including assurance of "a well-documented and systematic process for determining, revising, and assessing degree program learning goals." Amendments put forward by UMaine and University of Southern Maine graduate faculty remain under discussion as of February 2019.

The Division of Lifelong Learning

DLL has seen substantial changes in management and mission in the past decade, including the structure of its leadership, the organization of its Summer University course delivery, and the revival of Winter Session. The academic colleges have begun to use enrollment data from Winter Session to shape fall and spring course scheduling, with the goal of reducing barriers for students and improving time-to-degree.

DLL worked productively with Maine Business School faculty and administration in developing the online MBA. In addition, DLL's Associate Provost for Lifelong Learning has spearheaded the buildout of UMaine's Center for Excellence in Teaching and Assessment, a resource for faculty and graduate teaching assistants, and a key contributor to improving classroom design and technology at UMaine and UMM. Further, the Associate Provost and her staff work closely with colleges, using data on enrollment changes and programmatic shifts or emphases, to align Summer University and Winter Session offerings with known undergraduate and graduate student needs. This data-informed approach to course scheduling has also helped to reduce the number of low-enrollment sections of courses taught in the colleges and in DLL through advance comparison of projected schedules.

Standard Four:

The Academic Program

Overview

UMaine offers students the opportunity to pursue a wide array of four-year undergraduate and graduate degrees in a comprehensive university setting and reflecting the institution's identity. The University of Maine offers 90 bachelor's degrees across 74 disciplines, and awards degrees through five degree-granting colleges and the Division of Lifelong Learning. Most students pursue a Bachelor of Arts or Bachelor of Science. Bachelor of Fine Arts, Bachelor of Music, and Bachelor of University Studies degrees are also offered. In 2017–2018, UMaine awarded 1,760 bachelor's degrees; the College of Natural Sciences, Forestry, and Agriculture totaled 29%, the College of Liberal Arts and Sciences 23%, and the College of Engineering 21%.

UMaine undergraduate degree programs

As described in the UMaine undergraduate catalog, most undergraduate degree programs require 120 credits, with a few requiring more; none requires more than 130. Some majors include concentrations for students focusing on an academic subfield. Students may pursue multiple degrees or declare a double major. The dual degree requires the completion of at least 30 credits beyond the number required by the primary degree; a double major requires students to satisfy the specific requirements for the second major. In fall 2018, 6% of degree-seeking undergraduates had declared a second major or degree.

Undergraduates have the option of choosing from over 100 minors. Fifteen percent of the fall 2018 degree-seeking undergraduate population had declared at least one minor; B.A. students in the College of Liberal Arts and Sciences must complete a minor or second major. The most popular minors in fall 2018 were Business Administration, Psychology, Child Development and Family Relations, and Neuroscience. Presently, student selection of a minor area of study is solely a function of student interest and/or individual advising.

Following a decline from 2009 to 2012, UMaine enrollment rebounded with a 3% increase in degree-seeking undergraduates between 2013 and 2018. Among the majors experiencing the steadiest growth are Ecology and Environmental Sciences, Marketing, Forestry, Finance, and Biochemistry. Human Dimensions of Climate Change is the newest major on campus.

Program descriptions, including requirements, are published in the online undergraduate and graduate catalogs. The colleges also post program fact sheets, usually including curriculum checklists or sample four-year completion plans, on their websites.

UMaine baccalaureate programs share a common structure. At least 30 upper-division credits must be earned at UMaine, and a minimum GPA of 2.0 is required for graduation. Roughly one-third of every program consists of a General Education foundation encompassing six areas of the liberal arts and sciences (see General Education below). The General Education learning goals are published by the Undergraduate Program Curriculum Committee. The remaining credits comprise introductory and advanced courses in the major and elective courses in and out of the major, and — depending on the major and degree — related coursework and/or a minor. Students benefit from opportunities to gain practical experience through independent research, internships, clinicals, and field-experience, and service-learning courses. Further, students may choose to study abroad through one of many programs offered through the Office of International Programs. The Student Handbook provides comprehensive information on policies, procedures, and General Education requirements. Undergraduate admission criteria and graduate application information is available on the website.

UMM undergraduate degree programs and certificates

UMM offers 12 baccalaureate degree majors, three associate degrees, 15 certificates and 8 certificates for Early College Students. It offers a variety of minors and concentrations within degree programs. The degrees and certificates fall in 9 established fields of study or academic program areas and are described in the catalog.

For the Bachelor of Arts degree at UMM, students can major in Biology; English, Creative Writing, and Book Arts; Interdisciplinary Fine Arts; Interdisciplinary Studies; and Psychology and Community Studies. For the Bachelor of Science degree, students can major in Business and Entrepreneurial Studies; Elementary Education; Environmental Recreation and Tourism Management; Environmental Studies; Marine Biology; or Secondary Education. The Bachelor of College Studies degree allows students to design their own major, subject to faculty approval. All baccalaureate degree students must complete UMM's General Education curriculum, with some exceptions made for students transferring with an associate degree or 60 credits from another university. All baccalaureate degrees require the completion of 120 credits and a minimum GPA of 2.0, and at least 30 of those credits must be from UMM.

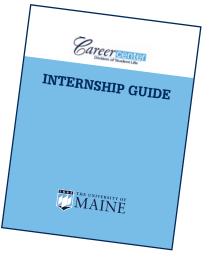

The Associate of Art degree requires the completion of 60 credits and a minimum GPA of 2.0. At least 15 of those credits must be from UMM. The Associate of Science degree has the same requirements except that students must complete 65 credits.

UMM offers 15 certificates in Audio and Media Production, Book Arts, Elementary Education Teacher, Entrepreneurship, Family Studies, Geographic Information Systems, Human Resource Management, Marketing, Mental Health and Rehabilitation Technician Certification, Psychology for High School Teachers, Secondary Education Teacher, Service Learning/Community Engagement, Special Education Teacher, Sustainability, and Wilderness Therapy. Credit requirements for certificates range from 5 to 30, of which at least 12 must be from UMM. UMM also offers one class, PSY 200 Behavioral Health Professional, that provides state certification upon successful completion of the four-credit course taught by a state-certified instructor.

UMM offers an additional eight certificates exploring career and college options to Early College students who attend classes on campus or online. All follow a similar format, with five courses (15–16 credits) at the introductory level in various areas of interest. The courses are offered in the various programs that house them. For example, Exploring Psychology offers courses encouraging further study in psychology, and that are currently required for all Psychology and Community Studies majors. It is possible that students who are matriculated for a baccalaureate degree, but undeclared, may initially pursue one of these certificates, as well.

UMM's programs are consistent with its mission as a regional baccalaureate university and its Environmental Liberal Arts identity. Most academic programs at UMM include significant community engagement and experiential learning components through applied research, field work, internships, practicums, service-learning projects, and international learning opportunities. Programs in Education, Business, Biology, and Psychology and Community Studies are in-demand pre-professional majors. Majors such as Marine Biology, and Environmental Recreation and Tourism Management are closely linked to the coastal Maine region. Most UMM programs use the surrounding natural and social environments, carrying their classroom learning off campus to be applied to regional issues.

UMM also offers three associate degrees with a total of eight specializations. For the Associate of Arts degree in Liberal Studies, students can specialize in Allied Health, Marine Biology, Mental Health and Rehabilitation, Music, Psychology, and Visual Arts. There is also the Associate of Arts degree in Business and Entrepreneurial Studies, and the Associate of Science in Recreation Management. Ten academic program areas at UMM correspond to the baccalaureate degrees in established fields of study with mostly prescribed curricula. The Bachelor of Arts degree in Interdisciplinary Studies and the Bachelor of College Studies degree have largely self-designed curricula and are not typically counted as separate program areas. UMM also offers 29 minors. Admission criteria are available on the UMM website. Program descriptions, including requirements, are published in the online catalog. Program fact sheets, usually including curriculum checklists, are also available on the website. UMM does not offer graduate programs.

1. Ensuring Academic Quality

Description

Academic quality at UMaine is ensured through ongoing collaboration between faculty and administrators at all levels. Proposals to add, eliminate, or modify aspects of the curriculum progress through well-defined stages of review, originating with faculty in the unit, moving through the college, and then to one of two university-wide committees: UPCC for undergraduate curriculum and the Graduate Board for graduate curriculum. Proposals involving new degree programs also require review and approval by the Faculty Senate, the UMS Vice Chancellor for Academic Affairs, and the Board of Trustees.

Oversight, assessment, and learner resources

At UMM, oversight for the quality and delivery of all programs is a shared responsibility of the administration and faculty, and occurs at multiple levels. The UMM Curriculum Change Flow Chart shows the approval process for different types of curricular changes. Proposals for new courses or programs, and changes to existing courses or programs, are initiated by faculty. These proposals must be approved by the relevant division, either the Program Review and Evaluation Committee (PREC) or the Curriculum Committee (comprising faculty from the three divisions), the full faculty, and the Head of Campus. PREC is responsible for oversight and review of the General Education curriculum, program reviews, and program changes. In the rare instances when programs are eliminated, UMM continues to offer the required courses or the appropriate substitution so that students are able to progress through their curriculum in a reasonable manner.

Degree programs and minors at UMM are housed in three interdisciplinary divisions: Arts and Letters, Environmental and Biological Sciences, and Professional Studies. The chair of each division reports to the Head of Campus and serves on the PREC and the Bachelor of College Studies Committee. Learning outcomes for every program are developed and approved by the program faculty. Curricular requirements and learning outcomes for each program are published on the university website. All academic program areas have developed a process for assessing student learning outcomes.

At UMaine, assessment of student learning outcomes for each degree program is conducted on a continuous basis, using a new process designed in 2014–2015 under the leadership of the former Director of Assessment. In the subsequent two years, design and implementation of individual programs' assessment plans was undertaken by program faculty. Required plan elements include setting measurable targets linked to specific program learning outcomes, identifying key assessments, developing a schedule of data collection and review, and a specific interval for faculty to use assessment results to inform the design or redesign of courses and curriculum. Using the Association of American Colleges and Universities (AAC&U) VALUE rubrics as a guide, consideration was also given to fundamental skills in quantitative literacy, writing, and critical thinking during development of the assessment plans.

Each academic unit (department, division, school), as well as each college, submits an annual report of assessment activities, accomplishments, and challenges faced. Data and analysis provided by the Office of Institutional Research and Assessment inform these reports, which contribute to the Academic Affairs annual report published each summer by the Provost's Office.

UMM maintains a Memorandum of Agreement with the Downeast Institute for Applied Marine Research and Education, governing the use of its facilities as UMM's marine science field station for research, field work, and student projects. A Memorandum of Agreement also exists with Eagle Hill Institute to allow students who take its intensive field seminars to receive credit through UMM. UMM programs also collaborate with UMaine academic units or programs, including Mathematics and Statistics, School of Marine Sciences, Ecology and Environmental Sciences, School of Biology and Ecology, Maine Business School, College of Education and Human Development, English, Psychology, and Social Work. UMM partners with the University of Maine at Augusta for both Special Education and Aviation program delivery; with the University of Maine at Presque Isle (UMPI) on Teacher Education and Special Education courses; and with the University of Maine at Fort Kent's (UMFK) Rural University program for early college students. Additionally, UMM faculty support a cross-campus baccalaureate program, the Maine Geospatial Institute.

UMaine and UMM online and hybrid distance education students have access to nearly all of the same resources, and in most of the same modalities or formats as face-to-face and residential students do. Beginning in 2014, UMaine's Division of Lifelong Learning has invested significant personnel resources in its full-service Center for Innovation in Teaching and Learning, supporting faculty in pedagogical design for online and hybrid courses and instructional technology; and UMaineOnline advisors serving students enrolled in online/hybrid courses offered through DLL (see also Standard Six).

Appraisal

UMaine has tried to approach major changes judiciously. The overall shape of the curriculum has remained stable throughout the past decade. UMaine delivers an increasing number of student credit hours online. Overall, online credit hours have increased by 64% in the past 10 years (22,890 in 2008–2009 to 37,575 in 2017–2018). However, relatively few degree programs have been developed for, or shifted to, exclusively online delivery, and many online courses continue to be taught by full-time faculty members as compensated overload. When significant changes have been made, the planning process has been deliberate. The transformation of UMM from an independent institution within UMS to a regional campus of UMaine has been undertaken in frequent and detailed consultation with the Commission.

When programs are discontinued, short-term alternatives are presented to meet students' immediate needs. For example, when UMaine's graduate program in Counselor Education was closed in September 2015 due to lack of available faculty, a three-year teach-out was delivered for existing students. This included a continuation of coursework provided through the Counselor Education faculty and facilitating access to off-campus programs. Although most students completed the program within the three-year plan, coursework was offered beyond that time to ensure that every student who wanted to had a means to complete her or his degree.

In these instances and others, UMaine and UMM rely on relationships with other UMS institutions. As noted in Standard Seven and elsewhere, key UMaine functions depend on a shared services model. These include Human Resources, Information Technology, and

Procurement, among others. Further, an array of vendors supplies crucial elements of academic infrastructure. In IT alone, examples include learning management systems and software for video conferencing, course scheduling and registration, assessment, document sharing and storage, and statistical analysis. Written agreements, either with UMS or UMaine, define access to these resources.

In summer 2018, the Chief Academic Officers Council (CAOC) began work with UMS Vice Chancellor Neely on a Process for Examination for undergraduate and graduate programs with low numbers of matriculated students, low numbers of graduates over a three-year period, and related indicators. Of 130 programs originally identified for examination, 33 remain candidates for further discussion as of February 2019. Recommendations regarding these programs will be made to the BOT in May 2019.

Ensuring congruence with NECHE standards for collaborative programs

Since 2009, UMaine and UMM have worked to ensure congruence with NECHE standards for the delivery and accountability for collaborative academic programs. A Systemwide task force was created in early 2018 to ameliorate administrative obstacles to collaboration. That group is developing guidelines for collaborations specific to multicampus programs; sub-teams are addressing cross-listing, tuition and revenue sharing, student policies and procedures, and governance. At the November 2018 Board of Trustees meeting, revisions to UMS Policy 311 (on intercampus/multicampus students) were adopted to allow more seamless "Systemwide access to academic coursework through cross-listing and cross-registration." The Chief Academic Officers Council (CAOC) has been tasked with exploring methods to encourage "program sharing between the university system's campuses." Additionally, a subset of the CAOC is working to operationalize "multicampus" programs.

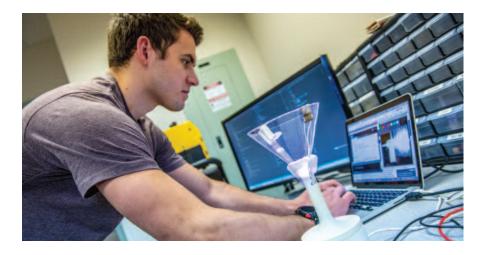

Willing university partners have also had the opportunity to create a cross-listing methodology. Currently, this is mainly limited to UMM and UMA. A one-course pilot between UMM and UMA in fall 2018 will continue in spring 2019. Two issues emerged: bookstore access, and the need to manually merge class rosters on Blackboard. Both have been corrected.

Program delivery modalities: online and face-to-face

All UMM programs are based at the campus in Machias, but UMM has expanded the number of online and hybrid course offerings over the past several years. Three baccalaureate degree programs can now be completed entirely online: Psychology and Community Studies, Business and Entrepreneurial Studies, and the Bachelor of College Studies degree. The certificates for Entrepreneurship, Human Resources Management, Marketing, Special Education Teachers, and High School Psychology Teachers are also available at a distance.

Several UMM academic programs offer online or hybrid classes. UMM has streamlined some programs recently (e.g. Elementary and Secondary Education, and Environmental Recreation and Tourism Management) to facilitate student completion and scheduling, and to reduce costs. UMM faculty and administration continue to integrate distance courses into multiple campus programs. These efforts will help sustain specialized course offerings while keeping costs to a minimum.

When enrollments allow, many UMM programs offer classes both at a distance and faceto-face. One of UMM's largest majors, Psychology and Community Studies, offers tracks in each of those modalities. The Business and Entrepreneurial Studies degree also can be completed at a distance, but traditional-age, on-campus students are pooled with distance students and take many classes online. The small number of full-time faculty in each program creates challenges for delivering multiple concentrations in each major and a full range of specialized courses. Faculty turnover in small departments can strain program stability. UMM continues to seek efficient ways to offer quality educational programs to diverse student populations.

Language skills assessment

English language skills are assessed and developed at multiple levels throughout a student's academic career at UMM. All baccalaureate and associate degree candidates must pass ENG 101, and more advanced writing courses built into the General Education curriculum and degree programs, as well as either a public speaking or professional communications course. UMM's academic programs adhere to widely accepted credit and GPA requirements. Faculty have substantial voice and oversight regarding program design and quality. All programs go through a rigorous periodic review process that includes external input. Assessment of learning outcomes at the level of the core curricula and individual programs is progressing.

II. Undergraduate degree programs

Description

UMaine programs

Students at UMaine study across 90 undergraduate majors offered by five degree-granting colleges and the Division of Lifelong Learning. Some degree programs offer specialization through concentrations within the degree or through a required minor. University, college, and departmental requirements for majors and minors are described in the undergraduate catalog. Academic record policies are posted by the Office of Student Records. For current students, academic records, including unofficial transcripts, are accessible via MaineStreet.

UMaine undergraduate degree programs contain foundational and supportive coursework (100- and 200-level courses) progressing to advanced courses (300- and 400-level) within a major discipline. Prerequisite courses, specified in the catalog's course descriptions, control the entry into advanced courses. The sequencing of course requirements within a major allows for progression of learning and skill development, culminating in a required capstone experience course. All degree programs also require General Education courses designed to ensure that graduates are broadly educated to appreciate the achievements of civilization, understand the tensions within it, and contribute to resolving them.

General Education coursework makes up about a third of the degree program. Required or elective courses within the major may also meet General Education requirements. For example, the General Education requirement for two courses in the physical or biological sciences is met by required coursework in the Biology major. Remaining credits are allotted to elective courses in and out of the major. In many degree programs, unrestricted electives can be used to complete a minor area of study to complement the major. UMaine offers over 100 minors comprising at least 18 credits in a topic area. Overviews of each degree

program, including rationale for the major, career options, and course requirements, are outlined in the catalog. Program fact sheets are also available for prospective students on the website.

UMaine requires students to write throughout their academic careers, with experiences both in general-purpose academic writing and professional writing in their majors, to ensure competency of graduates of its undergraduate programs. Students must complete a course in composition (ordinarily ENG 101) with a grade of C or better. Students must also complete at least two courses designated as writing-intensive, at least one of which must be in the academic major. General Education courses in scientific and quantitative reasoning are required of every undergraduate. Course requirements in the major build skills in oral communication, critical analysis, and logical thinking, as delineated in student learning outcomes listed on each syllabus. The Undergraduate Program Curriculum Committee (UPCC) website provides syllabus guidelines for faculty and student learning outcomes for General Education. Students may choose from a wide variety of courses to meet General Education requirements in Human Values and Social Contexts (at least one course from each of five categories: Western Cultural Tradition, Social Contexts and Institutions, Cultural Diversity and International Perspectives, Population and the Environment, and Artistic and Creative Expression) and in Ethics.

UMM programs

UMM students can choose from 12 baccalaureate and three associate degree majors offered by the three degree-granting Divisions. Requirements for majors and minors are described in the undergraduate catalog. Academic record policies are posted by the Office of the Registrar. For current students, academic records, including unofficial transcripts, are accessible via MaineStreet.

All baccalaureate degrees require a 2.0 minimum GPA and the completion of 120 credits. UMM's General Education requirements consist of 41 to 49 credits of liberal arts coursework. Most major program requirements range from 50 to 82 credits, but allow 3 to 12 credits of coursework to fulfill both program and core requirements. The Bachelor of Arts in Interdisciplinary Studies and the Bachelor of College Studies program requirements are 39 credits each, but those two programs do not allow overlap with the core requirements. All baccalaureate degree programs require at least 9 credits at the 300 level or above. Students in all majors have the opportunity to take some unrestricted electives. The associate degree programs require a 2.0 minimum GPA and the completion of at least 60 credits. Students take a balanced mix of liberal arts courses and specialized courses that fulfill a particular concentration.

The UMM mission emphasizes exploration, leadership, collaboration, and interdisciplinary problem solving. For example, Environmental Liberal Arts classes, such as ELA 101 Recreation and Wellness and ELA 112 Community and Place, take students out of the classroom to explore the Down East region on kayak trips, hikes, and visits to a tidal power project and wreath manufacturing facility. UMM science classes routinely include a significant field component, exploring saltwater, freshwater, and forest ecosystems. UMM supports the development of student leadership skills and encourages collaborative learning. Leadership skills are the major focus of classes such as MAN 313 Managerial Decision Making, MAN 321 Operations and Project Management, and REM 230 Outdoor Leadership.

Teamwork and student collaboration are central components of several classes, including REM 226 Recreation Program Planning, SSC 420 Research Methods and Design, and BEH 450 Senior Project. Students have opportunities to practice leadership skills and collaborate with peers by participating in one of more than 20 student clubs and organizations, through work-study opportunities, and through intercollegiate and intramural athletics. Collaborations with community organizations are frequent in several programs, including Psychology and Community Studies, Recreation and Tourism Management, and the Education program.

All UMM baccalaureate and associate degree programs provide students with depth and breadth. Coursework includes core liberal arts requirements and in-depth study in at least one disciplinary or interdisciplinary area. Interdisciplinary problem solving figures prominently in programs such as Environmental Studies, Interdisciplinary Fine Arts, and Psychology and Community Studies. The Environmental Studies program combines coursework from the social sciences and physical sciences in studying environmental issues and allows students to choose a concentration based on any minor at UMM. The Psychology and Community Studies program combines coursework from psychology, sociology, anthropology and economics and features an interdisciplinary capstone project course.

Appraisal

In recent years, UMaine has enacted a number of initiatives to improve undergraduate academic experience and success.

Supporting first-year student success: First-year courses in the colleges

As of 2017, all first-year students have the opportunity to enroll in a first-year success course in their college. In 2017–17, 95% of fall 2018 first-time students participated in a first-year success course in their first semester. (In 2014, the percentage was 77%.) Content varies by college, but most courses entail information and guidance about study skills, time management, and adjusting to life at the university. These courses are routinely visited by staff from Student Financial Aid, who share resources on financial literacy; Student Life, including drug and alcohol counselors; and various student- and faculty-led groups, who provide information about co-curricular activities.

Supporting students seeking nationally competitive awards: Office of Major Scholarships

In 2017, UMaine established the Office of Major Scholarships (OMS), whose focus is to recruit and guide high-achieving undergraduate and graduate students applying for nationally competitive awards (e.g. Fulbright, Truman, Udall, Mitchell, and others). In its first 18 months of operation, OMS increased the number of undergraduate applicants for such awards by 28 students (as compared with available data for the prior five years). In August 2018, OMS will begin delivering workshops and training for Maine Top Scholars, undergraduate recipients of UMaine's most competitive academic merit scholarship. In providing these students with regular opportunities to interact with OMS staff, UMaine seeks to cultivate additional opportunities for academically high-achieving students to prepare for, apply for, and secure nationally competitive scholarships. (See also Standard Six.)

Supporting undecided students: The Explorations Program

UMaine delivers a program for undecided first-year students called Explorations. Explorations is housed in Liberal Arts and Sciences and supported by the dean's office and staff in the college's Advising Center. Through a tailored first-year seminar and regular contact with professional advisors, Explorations students take on a course schedule and a structured activities designed to help them to make informed choices about a major or potential career. By the end of the first year, students generally report greater confidence in identifying an academic program suiting their abilities and intellectual or career interests. At the time of declaration of major or transfer to a college, Explorations students (and all students) must meet the eligibility requirements (e.g. GPA) of their intended major or college.

For students experiencing academic difficulty, UMaine has initiated an academic recovery course. All first-year students with a first-semester GPA of 1.5 or below are required to pass a 1-credit pass/fail course, taught by Explorations staff. Course enrollment is limited to 20 students per section. The Tutor Program provides support in one additional course for all students enrolled in this program. The recovery course includes one-on-one meetings with the instructor, a strong focus on learning strategies and styles, time management, career decision-making, campus resources, and self-responsibility. UMaine also provides a Writing Center, a Math Lab and Math Den to support first-year and overall success for its undergraduate students.

Program reviews

All academic programs undergo an external review every seven years, and new programs undergo an abbreviated review after two years. UMS policy governs the academic review process, supplemented by national accreditation standards, where applicable. At UMaine, units prepare a self-study that is submitted to an external review team. The team conducts a visit and submits a report to the Dean, who then prepares an evaluative report submitted to the Provost. A brief summary from the Provost is sent to the President for approval. Details of the academic review process are available on the Academic Affairs website.

UMM's 12 baccalaureate degree programs undergo a formal program review on a sevenyear cycle in a manner similar to UMaine's programs per UMaine System Policy. The program review and evaluation process starts with a self-study and review by external evaluators. Additional review is made by program and division faculty, PREC, and campus administration before a summary of key findings is provided to the Vice Chancellor for Academic Affairs and BOT. Due to external accreditation, some programs are reviewed

every five years: the Education programs through the Maine Department of Education and the Environmental Recreation Tourism Management Program through the Council on Accreditation of Parks, Recreation, Tourism, and Related Professions.

At UMM, regular program reviews, including external evaluation, document and enhance the quality of each program. A program of study for each major is described on the UMM website.

III. General Education

Description

UMaine's General Education program

In 2012, the UMaine Faculty Senate adopted a defined set of attributes for all nine categories of General Education courses, updating its 1996 language to identify a broad purpose and specific learning outcomes for courses in each category. General Education requirements also include a capstone experience course. Capstone courses are unique to each program and do not share common learning outcomes. By completing up to 46 credits in General Education, students are ensured exposure to a variety of topics and methods in the arts, humanities, social sciences, natural sciences, and mathematics. A 2017 articulation agreement with Eastern Maine Community College (EMCC) facilitates transfer of EMCC credit for fulfillment of UMaine General Education requirements. Earlier articulation agreements were based on course-by-course equivalencies.

UMM's General Education program

UMM's General Education is "designed to provide a foundation in general education along with an introduction to a wide variety of academic disciplines important for professional growth and lifelong learning." The current core curriculum was developed in 2010 after a lengthy and inclusive process building on a newly crafted UMM mission and revised learning outcomes. It has two components: the Environmental and Liberal Arts seminars and the General Education courses. Students matriculated in a series of three seminars anchored in Down East Maine that explore relationships between people and environments, and highlight the ways in which multiple disciplines guide our understanding of those relationships. The General Education component of the core focuses on skills, including communication and mathematical literacy, and key disciplinary perspectives, including the arts, history, literature, social sciences, and natural sciences. Students must also take a course with a global perspective and meet requirements in advanced writing (within their major) and service. Some sections of the core give students choice among a variety of course options.

The core curriculum for UMM's baccalaureate degree comprises 41 to 49 credits of coursework. For some majors, as many as 12 credits may count for both the core and program requirements. General Education requirements for the associate degrees vary greatly. For the Associate of Arts degree in Liberal Studies, 44 credits of prescribed General Education coursework are required. For the Associate in Science, Recreation Management specialization, 19 to 24 credits of prescribed General Education coursework are required. For the Associate in Science Small Business specialization, 15 to 18 credits of prescribed General Education coursework, plus six general elective credits are required.

Although the majority of UMM core courses are introductory (100 level), 200- and 300level courses may be used to fulfill requirements in history, social sciences, and global perspectives. In 2013, the faculty raised the level of the core's culminating seminar, Humans and Nature, to the 300 level to better reflect its role as the core capstone, and to make clear the progressive and integrative nature of an UMM education.

Appraisal

Since their adoption, UMaine's General Education attributes have been used by UPCC and by college- and unit-level curriculum committees to evaluate the suitability of a proposed course to "carry" General Education. A course may be used to satisfy two General Education categories if determined to meet those categories. Per the 2018–2019 catalog, the number of approved courses in each category is as follows:

- Human Values and Social Contexts
 - Western cultural tradition 56 courses
 - Social contexts and institutions 80 courses
 - Cultural diversity and international perspectives 90 courses
 - Population and the environment 34 courses
 - Artistic and creative expression 61 courses
- Ethics 35 courses
- Quantitative Literacy 19 courses
- Writing 83 courses
- Science Foundations 12 courses (41 sections)
 - Lab 25 courses (256 sections)

A First-Year Experience Survey completed at UMM annually (until two years ago, when all programs integrated the first-year seminar into their curricula); the National Survey of Student Engagement (NSSE); and a Graduates' Satisfaction Survey provide information about student experiences related to UMM General Education.

IV. The major or concentration

Description

The major at UMaine

Most undergraduate students at UMaine pursue a Bachelor of Arts or a Bachelor of Science degree. In some disciplines (e.g. Biology, Botany, Chemistry, Computer Science, Earth Sciences, Economics, Physics, Zoology), students can choose to pursue a B.A. or B.S. In addition, the Bachelor of Music degree is offered in Music Education and in Performance, and Art offers either a B.A. or a Bachelor of Fine Arts in Studio Art. Except for the Bachelor

of University Studies (B.U.S), all UMaine degree programs are based on a specific major area of study. For the B.U.S, offered through the Division of Lifelong Learning, students design a program in consultation with an advisor, based on specific goals, or complete designated focus areas and a capstone within a CLAS pathway of the B.U.S developed in 2016.

Each major has unique requirements and demands. In some majors, students may or must concentrate in a specific sub-discipline as a way to achieve breadth and depth of knowledge in their discipline of study. The English major, for example, requires each student to select from among three writing concentrations: creative, analytic, or technical/professional. The specific requirements for each major are communicated in the undergraduate catalog, and on fact sheets offered by the colleges. Through the catalog, students and advisors can print a Degree Planner worksheet specific to any major or minor. The catalog is updated each summer, and earlier catalogs are archived online. Current students can also use the Degree Progress Report tool in MaineStreet to evaluate their progress toward their degree.

Degree requirements and course sequencing for each major are determined by the unit where the major is housed to ensure proper progression from introductory to advanced levels. Units determine program outcomes for each major to address the knowledge and skills necessary for the discipline. Faculty in the units review their catalog entries annually and revise content as needed. Revisions to curriculum requirements and specific courses in a major or minor are reviewed and approved first by college-level curriculum committees, then by UPCC.

Upper-division courses at the 300 and 400 level are typically taken by juniors and seniors and feature hands-on activities to foster application of concepts to real-world situations. Hands-on activities may include case-based learning, presentations, or performances by students, laboratory experiences, practicums, and field experiences. Such activities may also be incorporated in courses intended for first- and second-year students. The Honors College, for instance, offers a two-semester phage genomics research course for first-year students. Professional degree programs, such as Nursing or Teacher Education, provide didactic and experiential components to meet accrediting agency stipulations and apply best practices in the field.

Many majors require students to take specific courses outside their discipline. For example, Business Administration and Elementary Education majors emphasize a diverse liberal arts background. Science and math courses beyond those needed to fulfill the General Education requirements are required for students in the College of Engineering; the College of Natural Sciences, Forestry, and Agriculture; and several majors in the College of Liberal Arts and Sciences. Foreign language proficiency is required for International Affairs majors. Taking courses from other disciplines allows students from different majors to interact in the classroom and broaden their perspectives. Minors, which are required for most B.A. degrees, also help ensure that students' knowledge and abilities extend beyond their major disciplines.

Opportunities to enhance the undergraduate educational experience include participation in research, taking advantage of internship opportunities, joining the Honors College, and studying abroad. The Center for Undergraduate Research (CUGR) helps to facilitate and enhance research for undergraduates. Students collaborate with faculty members and often develop their own research projects, which may extend into their senior capstone experience (see also Standard Five). Some programs have internships or field experience built into the curriculum.

Academically motivated, qualified students in any major may participate in the Honors College. Based on their SAT/ACT scores and high school GPAs, students are invited to become part of the college during the admissions process. The Honors curriculum is characterized by a unified approach to General Education in the liberal arts, accompanied by a sequence of inquiry-based topical courses providing intellectual preparation for the Honors thesis project, completed in the final year. The learning is student-centered, with a strong emphasis on critical thinking and writing, independent undergraduate research projects, and student engagement in and outside of the classroom. The culminating Honors thesis is developed under the supervision of a mentor in the student's major, but with a committee that includes members from outside of the discipline.

Several accelerated programs enable motivated students to obtain a baccalaureate degree in conjunction with their first year of professional school study, thereby shortening the process to obtain both degrees by one year: 3+4 Fast Track to Osteopathic Medicine with the University of New England; 3+4 Agreement with New England College of Optometry; 3+4 Agreement with Logan College of Chiropractic Medicine, and 3+5 program for a Bachelor of Veterinary Medicine and Surgery from the University of Glasgow. There are also campus-based 4+1 programs in about a dozen disciplines. The College of Liberal Arts and Sciences permits B.A. students to earn a minor with a defined group of pre-MBA courses, totalling 18 credits, to enable students to complete the MBA in just one additional year.

The major at UMM

Each of UMM's 12 baccalaureate majors has a clearly outlined program of study and an established set of learning outcomes (except for the individualized Bachelor of College Studies degree, in which outcomes are identified for each student). A Program of Study document and a Learning Outcomes document are located on each program's website under Majors and Programs. Most programs have options for different concentrations within a major. UMM's associate degree programs have a clearly outlined program of study, but do not have established learning outcomes. An examination of learning outcomes for baccalaureate programs finds clear articulation of assessable objectives. All programs show a progression from introductory-level to upper-level classes. All baccalaureate programs require at least 9 credits at the 300 level or above and a culminating, integrative experience or capstone class at the 400 level.

Appraisal

A full external review of each academic program occurs on a seven-year cycle as mandated by UMS. National accrediting agencies, including the Accreditation Board for Engineering and Technology, Council for the Accreditation of Educator Preparation, Association to Advance Collegiate Schools of Business, and others, also review programs and conduct visits, conferring with senior administrators and with faculty, staff, and students in the programs. Numerous UMaine units maintain close contact with external advisory groups that provide guidance and informal evaluation; examples include the College of Engineering, College of Education and Human Development, Maine Business School, and many individual programs campuswide.

All UMM programs are reviewed periodically following established guidelines. The review process is thorough and rigorous. It begins with a self-study outlining the program's purpose and ongoing need, student learning outcomes, content, and curriculum. It includes a sample four-year student plan of study, a matrix showing the connection of each course to program learning outcomes, and a comparison to comparable programs at peer institutions. Outside evaluators review the self-study, visit the campus, and submit an evaluation report. Program changes are made in response to the review and sometimes more frequently between reviews. The reviews lead to changes in direction, emphasis, and curriculum. Faculty, the Program Review and Evaluation Committee, Head of Campus, and UMS provide effective oversight regarding the creation, revision, and elimination of programs.

V. Graduate degree programs

Description

UMaine programs: overview and characteristics

The University of Maine Graduate School's mission is to *produce engaged scholars and professionals by promoting excellence in all aspects of the graduate student experience.* The School provides advanced education and professional training through innovative teaching, mentorship, research, and creative activity in established and emerging areas. This rigorous education prepares students to contribute meaningfully to the advancement of the state of Maine, the nation, and the global community.

UMaine offers 81 master's programs, 31 doctoral programs, 9 post-master's certificates, and 21 post-bachelor's certificates. Acceptance to the Graduate School is competitive, though entrance requirements vary across programs. The Graduate School manages the recruitment process and officially grants admission; decisions about acceptance into programs are made at the program level and are overseen by graduate coordinators in the academic units. The most recent three-year average acceptance rates for master's and doctoral applicants who completed the application are 68% and 31%, respectively.

In addition to graduate programs in the five degree-granting colleges, UMaine offers a number of interdisciplinary programs. For example, students in the Interdisciplinary Ph.D. design a unique program of study under the direction of an Academic Advisory Committee. The Graduate School of Biomedical Science and Engineering (GSBSE) reports to the Vice President for Research and Dean of the Graduate School, and offers doctoral degrees in biomedical science and biomedical engineering, and a professional science master's degree in bioinformatics. The GSBSE teaching faculty comprise faculty from UMaine, the University of Southern Maine, Jackson Laboratories, the University of New England, Mount Desert Island Biological Laboratories, and the Maine Medical Center Research Institute.

UMaine master's degrees typically require a minimum of 30 credits. Some programs, such as the Intermedia Master of Fine Arts, a terminal degree, require 60 credits. Requirements for doctoral and certificate of advanced study programs vary, though most require at least 30 credits beyond the master's degree. Credit requirements for post-baccalaureate certificates vary from 9 to 18. Graduate program structures vary, depending on the degree being earned. By the time they complete 12 credit hours, or register for their third term, graduate students submit a program of study detailing a plan for meeting program requirements.

Students in professional programs participate in internships or field experience courses, and some must pass national accreditation exams. All students in M.S., M.F.A., Ed.D., and Ph.D. programs require a thesis or dissertation. Doctoral students must pass a comprehensive exam, and all students submitting a thesis or dissertation must pass a defense.

To ensure that graduate faculty are qualified to teach graduate courses and direct the research of graduate students, appointment and reappointment to the UMaine Graduate Faculty is contingent on the recommendation of the institutional unit graduate committee, academic unit chair or director, and the Graduate School. Criteria for appointment and reappointment include expectations of scholarship, teaching, and service, and are defined by the academic unit and approved by the relevant college Dean and Executive Committee of the Graduate Board. Graduate faculty are classed in six categories: full graduate faculty, associate graduate faculty, external graduate faculty, emeritus faculty, graduate instructors, and ex officio members. The category assigned determines the faculty member's ability to chair or co-chair a graduate committee, serve on a committee, or teach a graduate course.

In 2017–2018, UMaine awarded 375 master's degrees, 55 doctoral degrees, 67 postbachelor's certificates, and 23 post-master's certificates. The most prevalent master's degrees were Social Work (10%), Special Education (8%), and Business Administration (8%). The most prevalent doctoral degrees were Biomedical Sciences (9%), Interdisciplinary Ph.D. (9%), Forest Resources (7%), and Marine Biology (7%). Following a decline between 2009 and 2014, degree-seeking graduate enrollment has increased 14% over the past five years.

Appraisal

UMaine has introduced multiple initiatives for broadening access to graduate education at UMaine, especially online. UMaineOnline includes 11 master's degrees, two doctoral degrees, and 15 post-bachelor's certificates. Enrollment in online-only graduate programs has increased 80% over the last two years (see also Standard Six). Much of the growth can be attributed to the introduction of the online M.B.A program and to increased enrollment in the Social Work and Special Education programs.

The UMaineOnline website provides current and prospective students information about online-only programs and requirements, student support services, and technological assistance. A second initiative for graduate education, Double Up, offers current undergraduates the opportunity to combine their bachelor's degree with one of 20 master's degree programs and earn both degrees with only one year, or, in a few cases, two years of additional coursework.

Implementation has begun for UMaineGOLD, a collaboration between the Graduate School and the Division of Lifelong Learning intended to make more high-quality online graduate programs available to diverse populations. Qualifying programs must meet established standards in 15 areas of excellence, including marketing, student advising and success, recruitment, admissions, course design and curriculum planning, and faculty development. Six online graduate programs were approved for UMaineGOLD development in 2017– 2018, and 7 more programs have been approved in 2018–2019.

VI. Integrity in the award of academic credit

Policies on credits, degrees, and prior learning

Most undergraduate degrees awarded by UMaine and UMM require 120 credits and are designed to be completed in four years. A few, primarily in the College of Engineering, exceed 120 credits and are designed to be completed in four to five years, depending on summer- and winter-term courses. Graduate degrees require a minimum of 30 credits, with terminal degrees typically requiring at least 30 additional credits beyond the master's. UMaine's procedures align with NECHE's Policy on Credits and Degrees. The Division of Lifelong Learning posts information about the award of academic course credit for prior learning. UMaine and UMM do not offer competency-based degrees, and UMaine does not offer or accept credit for remedial coursework. UMM has phased out developmental courses over the past year. At UMM, new program proposals are developed by faculty and must be approved by the division, curriculum committee, PREC, faculty as a whole, and Head of Campus before being sent to the Board of Trustees. The Curriculum Change Flow Chart outlines the process. All UMM baccalaureate degrees require 120 credits, and all associate degrees require 60 credits.

The UMaine and UMM catalogs

Previous and current course offerings are published online in UMaine's undergraduate and graduate catalogs. At UMM they can be found in the undergraduate catalog. Via the catalogs and MaineStreet, several tools are available to help undergraduates form realistic four-year graduation plans and evaluate their progress toward degree completion. (In 2016, UMaine adopted a course scheduling software, Infosilem, in part to reduce course conflicts that could slow students' progress. Between fall 2016 and fall 2018, course

conflicts were reduced by 90%.) At UMM, faculty design academic programs to build knowledge from lower- to upper-level coursework. Prerequisites define foundational knowledge students are expected to master before taking upper-level courses. Certificate programs depend on the same for-credit courses that count toward UMM's degree programs.

Transfer activity

Both UMaine and UMM students may transfer courses from other accredited U.S. institutions through individual course-by-course review or institutional articulation agreements. UMaine accepts credit from international institutions, both for international students and for domestic students participating in study abroad programs. UMaine awards credit to students who have earned the International Baccalaureate diploma and scored 5, 6, or 7 on the higher level examinations. Transfer equivalency of courses that have already been evaluated is publicly posted; students may also request and receive review of courses not already evaluated. In all cases, review of the requested course by an appropriate UMaine faculty member or administrator ensures continued authority and oversight of credit awarded for transferred courses. This work is administered by the Office of International Programs. (For further information about transfer policy, see below under "Adherence to the federal definition of the credit hour.")

Evaluation of internships and field experiences

In internships and other off-campus experiences where a field supervisor contributes to the evaluation of student work, a faculty supervisor retains responsibility for final grading decisions. Per the AFUM/UMS collective bargaining agreement, full-time faculty members participate in the selection and review of part-time faculty, including those involved in Early College programs, again ensuring appropriate oversight. Evaluation feedback from classroom placements for students in Teacher Education is used by the Director of Field Experience in UMaine's College of Education and Human Development to shape the criteria governing, and the structure of, future placements.

Oversight of admission criteria

Admission criteria are established for individual colleges at UMaine and often for individual programs. Faculty involvement is central at the program level. Undergraduate advising and registration are managed in the colleges, with participation by professional staff members and administrators supplementing faculty contributions. Advising of graduate students is handled wholly in the units. (See Standard Five for additional information about admissions criteria)

Early College: programs and oversight

UMaine participates in several initiatives, including Bridge Year, Academ-e, and Aspirations. Enrollment in these programs at UMaine has grown dramatically over the past 10 years: In fall 2018, 246 students participated in one of UMaine's programs, which is 73% higher than the number who participated fall 2009. UMM has an Early College Program, enabling high school students to enroll in university classes. UMM's program is administered by a first-year student success coordinator who works closely with students and involves instructors, school counselors, and parents. Since 2009, 645 Early College students have enrolled in UMM courses. For both campuses, the Early College programs involve classes that are part of UMaine's and UMM's regular curriculum and are taught face-to-face or online, or via another form of distance delivery. A UMS report, which includes detailed information on fall 2016 participants in Early College programs, shows that the rate of subsequent enrollment at one of the UMS institutions for UMaine and UMM Early College participants was 34% and 46%, respectively.

Adherence to the federal definition of the credit hour

UMaine and UMM adhere to a credit hour definition consistent with the federal definition. The credit-hour policy is referenced in the UMaine Faculty Handbook, and the full-time faculty orientation includes a discussion of the credit-hour policy in the context of learning outcomes and student work expectations.

All new courses are reviewed by the UMM Curriculum Committee, which evaluates the appropriateness of the level and credits in light of the learning outcomes and workload. The Head of Campus and division chairs review course syllabi and work with instructors to ensure that course content and learning activities are appropriate for the credit awarded. UMM offers some short-course options, including a winter term and a May term. Shorter courses are typically intensive and may entail work that extends beyond class meeting dates. The Head of Campus has focused recent efforts to ensure compliance with the credit hour definition on these short courses.

New course proposals at UMaine initiate in individual units and move through collegelevel review. They are then reviewed and approved by the University Program Curriculum Committee (UPCC), with reference to the federal credit-hour standard to ensure that course credit hour designations reflect student academic engagement. Syllabi supplied as part of new course proposals must include appropriate student learning outcomes, and required academic policies and information. UPCC is chaired by the Senior Associate Provost for Academic Affairs, and comprises faculty, professional staff, and administrators. Faculty oversight is also provided through the Faculty Senate, which "represents the Faculty of the University of Maine in developing and overseeing policies affecting academic mission of the University of Maine." Collectively, these approval pathways ensure strong oversight of credit-bearing course creation.

Matriculated students may be awarded credit for prior learning for subjects comparable or equivalent to courses at UMaine and UMM. Requests for the award of credit for prior learning are completed by academic departments at their discretion. No more than 15 credits per student may be awarded for prior learning. In addition, students may be awarded credit through the College Level Examination Program (CLEP) and Advanced Placement (AP), among other means. Additionally, UMM has a process for evaluating experiences such as military training and other specialty credentials. Students who come to UMM with significant prior learning, often through work experiences or work-related training, may apply for credit for prior learning based on a portfolio assessment. In those cases, a faculty committee is formed to evaluate whether the student's portfolio demonstrates achievement of learning outcomes established for a particular course.

In terms of degree and graduation requirements, students of UMaine and UMM must earn a minimum of 30 undergraduate credits at the 300 level or higher to earn a bachelor's degree. This requirement ensures that substantial advanced coursework is completed, regardless of transferred credit. Students who have completed 90 or more credits from UMaine may be permitted to finish their final 30 credits at another higher education institution under certain circumstances.

UMaine's transfer evaluation process is maintained by Student Records and complemented by UMS online transfer tools. All official evaluations of transfer credit are completed following the admission of transfer students to UMaine and are posted on a student's Transfer Credit Report. Transfer Credit Reports provide information on course equivalencies, including fulfilment of General Education requirements. Students may appeal a transfer equivalency decision by submitting a course description and syllabus for departmental review. Courses eligible for equivalence must be completed with grades of C- or better at regionally accredited institutions of higher education; English 101, which requires a grade of C or better, is the exception. Grades and grade point averages do not transfer. Credit is not awarded for institutionally based exams, including CLEP and placement exams, taken at other institutions. Individual exceptions to standard equivalencies may be made with department and college approval.

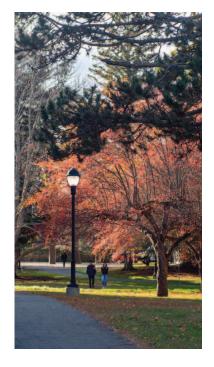

UMM also awards transfer credit for work done at foreign institutions based on evaluations by two credentialing agencies: World Educational Services, and the Centre for Educational Documentation. Policies for credit transfer are articulated on the university's website. Students can check for established course equivalencies on MaineStreet. To be accepted as equivalent to a UMM course, transfer courses are evaluated by the Associate Registrar and faculty in the appropriate subject area to ensure the same learning outcomes are met. UMM's residency requirement mandates at least 30 credits of coursework be completed at UMM for a baccalaureate degree. At least 15 credits must be completed at UMM for an associate degree, and at least 12 credits must be completed at UMM for a certificate. In all cases, at least one-fourth of a student's undergraduate program must be credit earned at UMM.

UMaine and UMM have both established transfer agreements with other UMS institutions, the Maine Community College System, and other institutions. Transfer credit policies and procedures are published online in the UMaine undergraduate catalog; further guidance is available on the Admissions website. Over the past five years, an average of 442 students have transferred annually to UMaine. All current articulation agreements for UMaine are listed on the UMaine Admissions webpage. Additionally, UMM maintains transfer agreements with several Maine community colleges. These agreements facilitate transfer of students completing certain community college programs into UMM programs in Business and Entrepreneurial Studies, Education, Environmental Recreation and Tourism Management, and Marine Biology.

While UMM's articulation agreements are not published online, information about them can be found in the electronic workroom. Because UMS is a member of the National Council for State Authorization Reciprocity Agreements, UMM and UMaine are authorized to offer distance courses and degrees in all other states except California. However, most UMM distance students reside in Washington County, Maine.

UMaine and UMM offer distance courses online and via interactive television (ITV) or compressed video (CV). University College, the UMS support center for distance education, provides training and technical support for instructors, and a variety of support services for students. UMaine's Center for Innovative Teaching and Learning also supports training and instructional design services for UMM faculty (see also Standard Six). At UMM, a Distance Education Technician provides additional support for distance students and instructors. Distance students have access to a similar range of services (academic advising, library resources, financial aid, writing help) as campus-based students.

UMM's distance courses and online programs have the same system of oversight as campus-based programs. A secure login protects student privacy and establishes that the

student who registers for the course is the same student who engages in the course and receives academic credit. UMS Information Technology Services is responsible for ID management and requires passwords to be changed at least every six months. Students must use a UMS username and password to access online courses. Similarly, UMaine follows an established procedure for verifying the identity of students taking online courses.

Academic integrity

The assurance of academic integrity of UMaine graduate courses and programs (degrees and certificates) lies with the academic units and the Graduate School. The academic unit graduate faculty are overseen by the Graduate Board, and the Vice President for Research and Dean of the Graduate School. Graduate School operations are described in the Graduate School Policies and Regulations. Readmission procedures are also explained in this document. Requirements for graduate degrees are published in the graduate catalog. Transfer courses are limited to 6 credits for master's students and 30 credits beyond the bachelor's degree for doctoral students, and may not constitute more than 50% of the UMaine degree. Transfer courses must originate at an accredited institution, and be approved by the academic unit and the Graduate School. In the case of transfer from an international institution, the Office of International Programs may provide administrative assistance.

Conditions for good standing, probation, suspension, and readmission are clearly explained in the Admission and Academic Standing sections of the undergraduate catalog for both universities. At UMaine, the Faculty Senate determines academic retention standards, applied by the Academic Standing Committee. The Senior Associate Provost chairs that committee. The criteria are the same for all programs and colleges, and are published in the undergraduate catalog and the Student Handbook, as noted above. The associate deans of the academic colleges recommend academic actions to the Academic Standing Committee based on a student's grade point average, previous academic history, and any extenuating circumstances. The committee either approves the action or, infrequently, modifies the recommended action.

Deans or program directors notify students of academic action by letter and/or email. Students have the right to appeal to the Senior Associate Provost if new information is available or based on an error in process. Undergraduate degree requirements for UMaine and UMM programs are published in the campuses' respective catalogs. For each major, minor, or certificate, the coursework, grades, and residency requirements are stipulated and General Education requirements are described. Students can monitor their progress toward graduation through the degree progress report. Completion is ensured through a multistage verification process in which the department, college, and OSR confirm that the requirements have been fulfilled before any undergraduate degree is posted. For graduate degrees and certificates, completion is confirmed (certified) by the department and the Graduate School.

The assignment of grades is solely the purview of the instructor of record, though others (teaching assistants, primarily) may contribute to evaluation. Faculty enter their own course grades in MaineStreet.

The faculty and administration work together to ensure academic integrity. Existing deterrents include sanctions as described in the Student Conduct Code on the Student Life website. UMaine requires that the university's cheating/plagiarism statement appear on all syllabi. These academic integrity statements are also included in all UMM syllabi. To deter cheating and plagiarism, many faculty members check written assignments with computerized originality checking systems (e.g. SafeAssign in Blackboard) and use exam question randomization, timed questions, browser lockdowns, web conferencing and screen sharing during exams, official university testing centers (available at UMS campuses), and other methods. Disciplinary action, up to and including dismissal from UMaine or UMM, may be taken when students are found responsible for academic misconduct.

UMaine's academic dishonesty policy, which is part of the Student Code of Conduct, is implemented by faculty in collaboration with the Office of Community Standards, Rights, and Responsibilities. With representation from each UMS campus, work began on a unified Academic Integrity Policy in fall 2018.

Starting in 2014, graduate students completing a thesis or participating in sponsored research have been required to complete a 1-credit course, INT 601 Responsible Conduct of Research. UMaine is also hoping to develop a positive deterrent by expanding the dissemination of materials and programs from their partnership with Academic Integrity Seminar.

At UMM, the university administration and faculty collaborate to ensure the academic integrity of credit awarded. The academic integrity policy is available on the UMM website and is referenced on all course syllabi. The policy defines types of academic dishonesty and describes measures that may be taken by faculty, the Head of Campus, and the Student Conduct Officer in cases of integrity violations. Instructors have flexibility in determining appropriate penalties for integrity violations, but all suspected cases must be reported to Head of Campus. In the case of multiple infractions by a student, the Head of Campus passes the information to the Student Conduct Committee for appropriate action. The student has the right to appeal any academic decision, including those arising from the academic integrity policy, through the established academic appeals process.

All degree requirements, program learning outcomes, transfer equivalencies, course offerings, and academic policies are readily available to students and the general public on the university website. UMaine and UMM have well-established systems for maintaining student records; evaluating credit for learning outside of college courses; providing ample support for distance education; and evaluating courses, programs, and faculty. UMaine and UMM follow all administrative guidelines for records retention and data security established by UMS.

Appraisal

Ensuring academic quality for all students in all course modalities

Online degree programs are subject to the same annual assessment and periodic program review as an on-campus program. These include the online Bachelor of University Studies, which is offered through DLL primarily for nontraditional students returning to college. Online students are able to access essential services such as advising and online writing tutoring through UMaine. Topics commonly addressed by distance advisors include: course registration, using the "start-up guide" that describes resources for online courses, readmission after suspension or voluntarily stopping out, enrollment at UMaine's Hutchinson Center, transfer and course equivalency, and Early College opportunities for high school students. Many on-campus students at UMaine also choose to take courses online and may work with a distance advisor at DLL. Such distance advising serves important purposes for both recruitment and retention for the university as a whole.

Sufficient opportunity for faculty contact is expected in all courses, regardless of delivery method. The University of Maine Faculty Handbook calls for all faculty to schedule regular availability, and make known when and how students can contact them. The handbook states that for online courses, faculty should set up chat rooms, Zoom, Skype sessions, or email arrangements, and, when possible, supplement with face-to-face office hours if there are students who desire such meetings and can attend. UPCC reviews syllabi for proposed new courses to ensure this information is present.

UPCC provides guidelines departments and colleges follow when modifying and/or proposing new programs or courses. However, direct oversight by UPCC ends once a new course is approved, and departments (and colleges) oversee individual assessment of programs and courses. Future processes for curriculum development and review should

incorporate a system of ongoing review for approved courses, including alignment to program and/or General Education outcomes.

All academic programs at UMM, except the Bachelor of College Studies degree, have set objectives for student learning. Annual assessment of student learning at the program level has been implemented. UMM has a robust system of oversight and regular review of most academic majors. The Bachelor of College Studies is completing a review in 2018. All degree programs meet standard expectations of 120 credits for baccalaureate degrees and 60 credits for associate degrees, and have a residency requirement. As described above, the review process includes a self-study by program faculty involving significant input from students and alumni, input from peer faculty at other institutions, and sometimes feedback from industry practitioners. The process is designed to ensure that degrees awarded reflect regional and industry needs, and appropriate content and levels of student learning.

Graduation requirements for each UMM program are clearly stated in the undergraduate catalog and on the UMM website. The MaineStreet degree audit process evaluates degree progress, and identifies completed and missing requirements for each student. The Associate Registrar maintains academic records and verifies that students filing for graduation have completed all degree requirements. The Associate Registrar and the Head of Campus work with faculty and division chairs to ensure adherence to academic policies. The Academic Affairs Committee works with the Associate Registrar and the Head of Campus to routinely review and update academic policies and procedures.

New courses must be approved by the division faculty, the curriculum committee, the faculty as a whole, and the Vice President of Academic Affairs. The Curriculum Change Flow Chart outlines the process. Every instructor is expected to design course syllabi following a Course Syllabus Outline created by the Vice President for Academic Affairs. All syllabi must summarize course content, list learning outcomes, describe learning activities and assignments, and state time expectations consistent with the university's definition of a credit hour.

Program faculty and division chairs work carefully to ensure required and elective courses are offered frequently enough for students to earn a baccalaureate degree within four years and an associate degree within two years. Full course listings are available to the public through the Associate Registrar's office, where record of the frequency of course offerings is maintained.

UMM adopts a holistic review process for applications for admission and lists criteria for judging applications. UMM views retention as a multifaceted concept, including student life, campus activities, and student support, but also has clear standards of academic performance and consequences for not meeting them (see Suspension Policy). Certain academic programs have academic performance requirements beyond the standard university requirements. For example, the Education program requires maintaining a GPA of 2.5 in certain courses and passing the Educational Testing Service's Praxis I and II exams. Faculty mentors and the Academic Advising Coordinator are available to help guide students toward degree completion. The Academic Advising Coordinator works closely with students on probation and those who receive academic warnings. Students who are suspended or who choose to leave the university can apply for readmission and will be considered by the admissions team (and by the Head of Campus in the case that the student was suspended).

Status of UMaine remote instructional locations

In January 2014, the Commission asked UMaine to ensure that faculty assigned to teach at off-site instructional locations where the CAS and M.Ed. in Educational Leadership are offered be appropriately qualified to do so. The College of Education and Human Development has provided ample evidence confirming that faculty at those locations have been well credentialed. Courses have not been offered at these locations since 2016.

In the same 2014 letter, the Commission asked us to ensure that we provided appropriate financial support for our Brunswick instructional location. Due to low enrollment, that location was closed the following year.

Update on UMM Eagle Hill partnership

In December 2018, the Commission asked us to provide an update on UMM's contractual arrangement with the Eagle Hill Institute, with particular emphasis on success in achieving the financial goals of the program. In spring 2019, UMM's leadership — the Head of Campus, the division chair of the academic unit partnering with the Institute, and faculty — expect to work with Eagle Hill on a mutually satisfactory plan for fulfilling those goals.

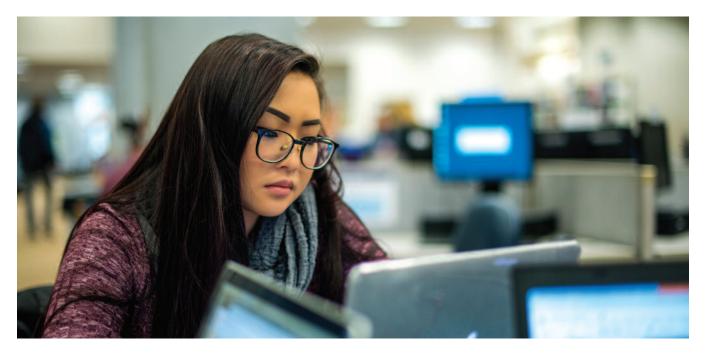

Projection

UMaine's comprehensive review of General Education categories (2018–2022)

UMaine will comprehensively assess the General Education program over the next four years. The proposed approach uses the AAC&U value rubrics in an annual scoring session to ensure a more consistent framework through which to view student achievement. Specifically, a) faculty will collect work that reflects the General Education area being measured; b) this work will be uploaded into an online database for scoring; c) annually or biannually, faculty with familiarity in particular General Education areas will score student work; d) scores will be summarized by the Office of Institutional Research and Assessment and reported to individual faculty, the Faculty Senate, and Academic Affairs. The anticipated timeline is:

Spring 2018: Western cultural tradition (pilot) Spring 2019: Social contexts and institutions Spring 2019: Artistic and creative expression Spring 2019: Ethics Fall 2019: Population and the environment Spring 2020: Quantitative literacy Fall 2020: Writing Spring 2021: Cultural diversity and international perspectives Fall 2021: Science

The cycle repeats in spring 2022. The assessment method is as follows: 20 course sections from a stratified random sample

from the Registrar's list of course sections that include the targeted General Education area will be identified. To qualify, courses must have at least 10 students enrolled. The final selection of courses will include 10 lower-division and 10 upper-division sections, with 10 students' work randomly selected from each section and de-identified. Participation in the General Education assessment is expected of all units from which a course is randomly selected. Faculty involved in scoring student work will be prepared through workshops/webinars to participate in scoring sessions held in May. Course- and student-level results will be reported to individual faculty members. Aggregate results by General Education category will be reported through the Faculty Senate and Office of Institutional Research and Assessment websites. (See also Standard Eight.)

Updating and publishing learning goals and program requirements

UMaine and UMM are working to publish learning goals and requirements for each program. While many programs possess learning goals and requirements that drive the curriculum, in some cases they are not made public. Other programs that have undergone staffing and curriculum changes have been slow to update changes in learning goals. Programs will continue to be encouraged to publish explicit student learning outcomes on program websites.

Examining first-year curricula in undergraduate degree programs

Within the scope of the First-Year Student Success Initiative, the Provost has charged the deans of the degree-granting colleges with examining first-year curricula for each major and recommending changes necessary to improve first-year success. Further, working groups are examining such areas as summer programming, living-learning communities, and placement exams to improve the academic experience for first-year students. These initiatives will result in action plans for improving the academic experience for UMaine undergraduates (see also Standard Two).

* Enter here the number of credits students must co	mplete in o	order to earn t	he credential (e	e.g., 36 credits	in an M.B.A.)
Please enter any explanatory notes in the box below						

** In many STEM disciplines, the course work required for the master's degree is identical to that required for the Ph.D. degree, with the primary difference being the depth and scope of the dissertation and the time required to successfully complete it. Many non-STEM doctoral programs require additional course work beyond the master's degree in addition to the dissertation. The average number of credit hours to complete a dissertation at the University of Maine falls between 45 and 60 credits including transfer credit from the master's degree.

- Students enrolled in multiple programs are counted in each.

I. Admissions

Description

Students

In fall 2018, the combined enrollment for UMaine and UMM was 12,079 (10,040 undergraduate and 2,039 graduate). Of those, 66% of students are Maine residents and 3% are international students; 85% of students who reported ethnicity are white. This table shows a snapshot of current enrollment.

	UN	laine		UMM
	Undergraduate	Graduate	Total	Undergraduate
Overall enrollment	9,365	2,039	11,404	675
Male	4,951	687	5,638	196
Female	4,414	1,352	5,766	479
Only online courses	446	424	870	252
Living on campus	3,433	34	3,467	165
International students	207	190	397	3
Maine resident	5,892	1,459	7,351	611
Maine nonresident	3,473	580	4,053	64

UMaine and UMM Fall 2018 Enrollment Snapshot

UMaine offers 90 undergraduate major programs organized in five degree-granting colleges: the Maine Business School, the College of Education and Human Development, the College of Engineering, the College of Liberal Arts and Sciences; and the College of Natural Sciences, Forestry and Agriculture. (As noted in Standard Four, the Bachelor of University Studies is housed in the Division of Lifelong Learning.) UMaine also is home to one of the nation's oldest Honors programs, the Honors College.

Records retention and student privacy

UMaine and UMM adhere to the highest ethical standards in their admissions and retention policies, with records retention and related information safeguarding policies modeled after and aligned with University of Maine System policies. Additionally, UMaine regards student privacy as a core value. The Family Educational Rights and Privacy Act of 1974 protects the privacy of students. Under this Act, students have the right to inspect and review their education records and have the right to challenge records when they are inaccurate, misleading, or otherwise in violation of the student's privacy rights. The Office of Student Records is the primary resource for issues related to student privacy.

Nondiscrimination policy and student-facing information

UMaine and UMM do not discriminate on the grounds of race, color, religion, sex, sexual orientation, including transgender status and gender expression, national origin, citizenship status, age, disability, genetic information or veteran's status in employment, education, and all other programs and activities. The Bias Response Team monitors and responds to instances of bias and hate in the UMaine community. UMaine considers acts of hate unacceptable and antithetical to its commitment to an inclusive and respectful community.

Every effort is made to ensure the success of admitted students and to retain them to graduation. UMaine is careful not to mislead students regarding the nature of its programs, the level of performance required, the cost of attendance, the academic and social services provided to them, or the financial aid available. We have intensive opportunities for advising, support

services, academic services, and in- and out-of-class opportunities for enhancement and engagement. We have a robust program of campus life and there are numerous on-campus events focused on culture, the arts, politics, leadership, citizenship, intramural athletics, and recreation.

Admissions criteria

Admission is based on a combination of factors that demonstrate potential for academic success. Criteria include academic credentials, scholastic achievement, and personal motivation. Eighteen percent of UMaine's undergraduate students entering in fall 2018 were from the top 10 percent of their high school class; 76 percent were from the top half. Their average SAT score was 1159. The distribution by high school rank of entering students has remained fairly consistent over time. The overall (Evidence-Based Reading and Writing and Math) average SAT score increased 11 points between fall 2016 and fall 2018.

UMaine's Office of Admissions and Office of International Programs determine admissibility of domestic and international students, respectively, to all undergraduate programs, using criteria developed in consultation with the academic colleges. Admissions counselors generally consult with Associate Deans about applicants who counselors deem borderline for admission. The Graduate School governs graduate admissions in consultation with the graduate coordinators of the various programs. (See Standard Four for additional information about admissions criteria)

Reporting to Admissions, UMaine's Student Orientation program hosts a comprehensive student orientation program in summer, fall, and spring. Between 2016 and 2018, 73% percent of incoming first-year students participated in summer orientation programs. Orientations are also held for graduate students and international students. Similarly, UMM's Office of Student Engagement hosts summer, fall, and spring orientations. (See Standard Four for additional information about admissions criteria)

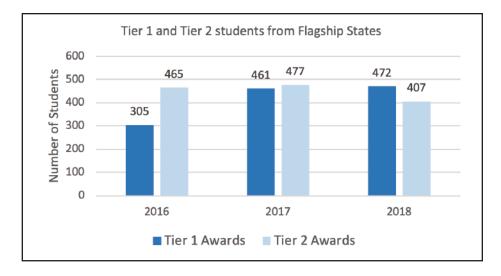

Appraisal

Enrollment growth

To promote enrollment growth, Enrollment Management has increased its recruiting activities over the last five years. The division has 10 full-time fall recruiters who visit 14 states (Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, Pennsylvania, New Jersey, New York, Virginia, Delaware, Maryland, Florida, and California) and average about 900 high school visits each year. Further, the recruiting staff coordinate or participate annually in 300 college fairs, 45 application review days, 40 transcript review days, 12 guidance counselor updates, 10 accepted student receptions, four on-campus accepted student days, and four on-campus open houses. By the end of the cycle, the number of recruiting events typically averages 1,400.

The Flagship Match program

Increased collaboration between Enrollment Management and Academic Affairs on student recruitment has produced significant undergraduate enrollment growth. The most notable change was the introduction of the Flagship Match, a scholarship program that allows students to pay the equivalent of the in-state tuition for the flagship institution in their home state, depending on specific academic criteria. In fall 2017, the second year of the program, UMaine experienced the largest number of applications and the largest number of incoming first-year students in the institution's history. Students from eligible states qualify for the Flagship Match award (Tier 1) with at least a 3.0 GPA and an 1120 SAT score. Out-of-state students who do not qualify are eligible for a lower Tier 2 award. The

number of students from the Flagship states who qualified for the Tier 1 award increased 55% between 2016 and 2018.

The Flagship Match program has produced increasing first-year class sizes for four of the five degree-granting colleges. The College of Education and Human Development, and the Maine Business School, experienced the largest growth in first-year classes between 2015 and 2018: 36% and 59%, respectively. The size of the incoming class for the College of Liberal Arts and Sciences has remained steady, while the College of Engineering and the College of Natural Sciences, Forestry, and Agriculture have experienced modest growth (7% and 6%, respectively.)

Graduate enrollment initiatives: Target X, growth in recruitment staffing

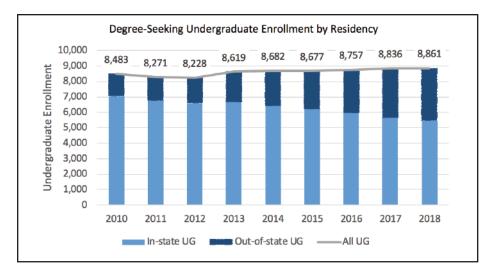

A number of collaborations have also had positive impacts on enrollment. The Division of Lifelong Learning, Enrollment Management, and the Graduate School jointly adopted the customer relationship management software Target X to better serve prospective graduate students. The capacity to communicate with prospective students via this platform has been bolstered by an increase from 0.5 to 2.5 FTE in recruitment staff. Graduate recruitment activities include undergraduate student outreach, and participation in international and domestic graduate fairs, as well as outreach to businesses and other universities. Additionally, for the first time this academic year, doctoral level stipends (\$16,000) have been differentiated from master's level stipends (\$15,600). Both are ninemonth appointments.

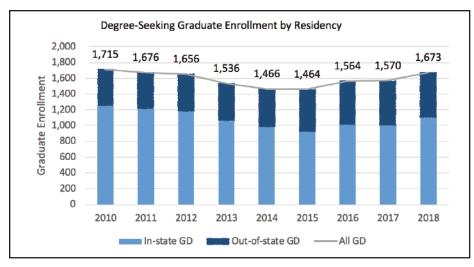

Youth outreach

The Division of Lifelong Learning, Enrollment Management, and the Graduate School collaborated on a recruitment initiative involving Cooperative Extension and Admissions staff during our 2018 4-H@UMaine weekend. The event resulted in more than 20 high school students applying to UMaine. A new Visual and Performing Arts Scholarship program proved successful, with fall 2016 enrollments in Studio Art and Theatre reaching a five-year high. Other collaborations include Engineering's weekly tours for prospective students, which introduce hundreds of high school students to the college and to the university as a whole. In the past year, nearly 2,000 K–12 students participated in Engineering's campus outreach programs.

UMaine undergraduate and graduate enrollment growth

The initiatives cited above have led to recent growth in undergraduate and graduate enrollments, as highlighted in the figures below. However, increased enrollment has been met with modest diversity growth. See Standard Nine for information on UMaine's Diversity Action Plan.

Retention, graduation, and student success initiatives

UMaine's first-year, full-time student retention rate has held steady — between 75% and 81% — between 2014 and 2018. Four-year and six-year graduation rates have ranged from 33% to 40% and 56% to 60%, respectively. (More detail on retention and graduation rates can be found in Standard Eight.) Benchmark data from the Consortium for Student Retention Data Exchange and IPEDS reveal that UMaine's graduation rates generally compare favorably to similarly selective public higher/moderate research universities and rural land grant institutions. UMaine has placed increasing emphasis on improving retention and graduation while expanding or creating Student Life programs to grow student engagement and provide students with needed services. New points of emphasis in Academic Affairs focus on holistic advising and early interventions with struggling students, particularly through our adoption of the Navigate early-alert/retention software system.

Think 30

The Think 30 initiative encourages students to enroll in 30 credits per academic year to graduate in four years, and with lower levels of debt. In addition to its financial incentives, the

initiative has expanded opportunities for students to earn credits through winter and summer sessions, and through other online courses. Sixty-five percent of all degree-seeking undergraduates took 15 or more credits in fall 2018, 5 percentage points higher than in fall 2016 and 14 percentage points higher than in the fall 2015, the year before the introduction of Think 30. Increases for first-year students were even more dramatic, with

83% taking 15 or more credit hours in fall 2018, compared with only 60% of the incoming class of 2015. More information on results to date can be found in Standard Eight.

A number of additional campus initiatives are aimed at increasing student success. The Division of Lifelong Learning has augmented its support services for students in the Bachelor of University Studies, particularly those completing the degree online. Examining the 2016 re-introduction of a Winter Session shows positive results to date. In spring 2016, 673 undergraduates took Winter Session courses. The number increased to 931 in spring 2017 and 1,161 in spring 2018, a 73% increase over the first year. Consistent with such increases, we see that the percentage of degree-seeking undergraduates taking 15 or more credits in the spring term has steadily improved from 46% in 2015 to 61% in 2018.

In 2016, Engineering created an Undergraduate Advising and Internship Coordinator position to provide additional academic and advising support. That same year, the Engaged Black Bear Program launched with seven learning pathways and 28 badges. Eighty-four e-badges were issued in the first year of this student engagement initiative funded by the Davis Educational Foundation. Badges range from internship expertise to service to leadership. Natural Sciences, Forestry, and Agriculture recently piloted a communication initiative in which incoming students received texts periodically over the summer to provide information and support as they prepare to start college. Finally, Education and Human Development administers the Maine Educational Talent Search and the Maine Educational Opportunity Center, two federal TRIO programs encouraging success in postsecondary education among low-income or first-generation college families. (Additional information about academic advising can be found in Standard Six.)

Our principal academic initiative for student success is the Provost's First-Year Student Success Initiative (see Standard Two).

Student services and co-curricular experiences

Description

UMaine offers an array of student services consistent with the institutional mission and student needs. The Vice President for Student Life and Dean of Students heads the division. The Vice President, the Senior Associate Dean, and the Assistant Dean and Director of Student and Administrative Support Services comprise the central Student Life leadership and, like other members of the division, are primarily concerned about life on campus and providing support services to help students succeed. For campus or personal emergencies, the deans are on call 24 hours a day and walk-in services are available throughout each business day. There is a liaison for graduate students through the Student Life office, and the Associate Dean of Graduate Programs and his staff provide day-to-day support for graduate students. The undergraduate and graduate student governments have a close working relationship with the administration, meeting biweekly with the Vice President for Student Life, and monthly with the President and other senior administrators.

Student Life employs some 400 students, 25 graduate assistants, 11 support staff members, and 73 professionals. Student service personnel are highly trained and well credentialed. The typical minimum degree requirement for professional staff is the master's degree. Student Life and other student services offices are funded at levels ensuring appropriate delivery of a robust program of services. Student facilities, from residence halls to office space to recreation space, are appropriate to the division's mission and high-quality student experiences. The Student Handbook is the official student guide; it is maintained electronically by Student Life and is a companion to the UMaine Undergraduate Catalog. These two resources contain detailed information about university policies and student success. The Student Life Mission and Vision is online and full description of all student services can be found on the UMaine website.

Student Life follows the National Association of Student Personnel Administrators Standards of Practice. These standards promote student personnel work as a profession, which requires personal integrity, belief in the dignity and worth of individuals, respect for individual differences and diversity, a commitment to service, and dedication to the development of individuals and the university community through education. Policies on student rights, including complaint procedures, and responsibilities are in the Student Code of Conduct and in the Student Handbook. These are easily accessible, updated annually, and fairly administered.

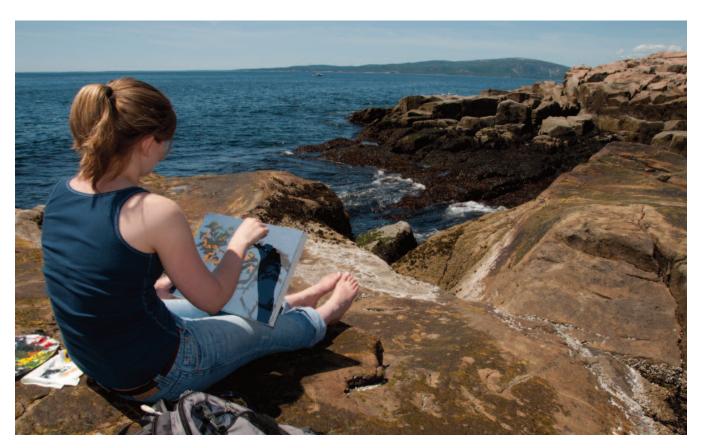

Co-curricular opportunities

UMaine students are also offered a large number of co-curricular experiences through 200+ student clubs and organizations, campus leadership opportunities, intramurals, sports clubs, volunteer, and travel opportunities. The Campus Activities and Student Engagement office has a clear focus on student organizations, leader training, and out-of-classroom experiences, including cross-country skiing, hiking, mountain-climbing, and related opportunities delivered through the Maine Bound program.

Career planning and placement supports

The UMaine Career Center is another excellent resource for students. In 2017–2018, career counselors met with 5,485 students and reached additional students through social media. The Career Center also held the largest annual Engineering Job Fair and Career Fair in Maine, with a total of over 301 registered employers in attendance. The Career Center's online resource library is available to both UMaine and UMM students. UMM students are included in our online job listings database, CareerLink. UMM students can participate in 14 student clubs and organizations, Greek Life, and intramural sports.

UMaine also works to support students in post-graduation transitions and in managing other challenges they may face. For example, the Career Center provides career services and programs for students and alumni to enable them to successfully identify and pursue career goals. The Community Standards, Rights, and Responsibilities initiative promotes

personal responsibility through educational outreach to the university community and the enforcement of the Student Conduct Code. The Commuter and Non-Traditional Students Program provides comprehensive programs and services for UMaine's nontraditional and commuting students to enhance their educational experience, and support their retention and success. Fogler Library provides information and services that help ensure students' educational success. (In the past year, reference staff answered more than 16,600 questions, and their web-based resources had more than 236,800 hits.) The library also partners with the Tutor Program and with the Writing Center to provide space in the building for their work with students.

Athletics

UMaine provides a large complement of expected and necessary student life and services programs. For example, Athletics administers UMaine's 17 Division I sports programs. Athletics reports to the President and adheres to all NCAA policies and standards. Student-athletes are treated in the same manner as all other students and, while important, the athletic emphasis is subordinate to the institution's academic mission.

Drug and alcohol education resources

The Alcohol and Drug Education programs within the Student Wellness Resource Center offer students opportunities to look at personal substance use behaviors and options to choose healthy lifestyles, grounded in moderation and the acceptance of personal responsibility for actions.

Volunteerism

The Barbara Higgins Bodwell '45 Center for Service and Volunteerism supports and develops activities related to community service, volunteerism, service learning, and philanthropy; and operates a food pantry and thrift shop on campus. Campus Activities and Student Engagement, a unit of Student Life, stimulates and encourages social, cultural, intellectual and recreational interaction by providing learning experiences outside of the classroom.

Counseling and wellness supports

To promote the success of some of the most vulnerable students on campus, the Counseling Center promotes community-wide health and wellness through prevention and educational programs, and confidential counseling and psychological services. The Center recently received full re-accreditation by the International Association of Counseling

Services and the American Psychological Association. The Center's Office of Outreach, Education and Prevention is a "safe space" and is home to the Mind Spa, whose programs include mind-body interventions, such as guided meditation and mindful yoga, and workshops and presentations focusing on symptom reduction and quality of life improvement, such as mindfulness, cultivating calm, self-compassion, resilience, grit, growth through adversity, and gratitude.

The percentage of degree-seeking undergraduate and graduate students who received counseling services last year was 6.74% and 5.32%, respectively. The number of students receiving clinical services has increased steadily over the past four years; in 2018, the Center served 1,027 students. In addition, the number of students asking for crisis appointments increased from 196 in 2015 to 359 in 2018. The university is highly conscious of students' social-emotional and mental health needs, and carefully monitors staffing levels in the Counseling Center and related student service offices.

Student financial aid

The Office of Student Financial Aid at UMaine and Financial Aid Office at UMM assist students and families with the process of funding their education. In addition to advising families and disbursing aid and work-study, the offices, which share a director, provide students information on costs, types of financial aid, completing the FAFSA, and debt.

UMaine has significantly increased its investment in financial aid in recent years. Between FY2012 and FY2019, overall institutional financial aid spending grew by 84%. Spending on institutional grant and scholarships was the largest contributor to this growth: UMaine increased institutional grants and scholarships by \$22 million over that period.

Roughly three-quarters of baccalaureate graduates from UMaine and UMM graduate with debt. The past three years, UMaine's cohort default rates have ranged between 5% and 6.6%, and UMM's have ranged from 11.6% to 16.8%.

Student disability accommodations and support

Student Accessibility Services' (SAS) mission is to create educational access for students with disabilities at UMaine by providing or coordinating disability accommodations, sharing information about the university and its resources with students and families, and educating the campus community. SAS works to increase success, persistence, and retention of enrolled students with disabilities, and annually supports over 550 students with permanent or temporary disabilities.

Appraisal

Several changes and additions have been made in Student Life since 2009 to improve resources and outcomes for student success.

Investments in student safety

The Student Behavior Review Team (SBRT) was established in 2008. Meeting weekly, SBRT responds to — and trains others how to respond to — student behavioral issues. Last year, over 100 cases were brought before SBRT, and students received targeted interventions by a team of professionals. Additionally, in 2016 the Office of Sexual Assault and Violence Prevention, with a Deputy Title IX Coordinator, was established. In 2017, a Title IX substance abuse educator was hired.

Numbers from our 2017 Clery Report data indicate a spike in substance abuse cases. This was expected; more resources promote exposure of otherwise-hidden cases. In the 2017–2018 academic year, education and prevention outreach activities increased via visits to first-year student success courses. Over 1,108 first-year students were reached this way. Additional outreach has been shared by Residence Life staff, sociology majors, Greek Life students, first-year athletes, and Introduction to Family Studies students.

The Memorial Union

The Memorial Union is home to centrally located, student-focused centers and operations. A full-service Student Wellness Resource Center has expanded to include the Alcohol and Other Drug Prevention program, as well as Lead Well peer wellness educators. Bystander Intervention training has also been heavily emphasized by the Student Wellness Resource Center using the slogan "see something, say something."

The Veterans Education and Transition Services was established in 2009. It is centrally located and staffed and is resourced appropriately. The First-Year Center was relocated to the Memorial Union and reorganized to become the First-Year and Transfer Student Center.

The Office of Multicultural Student Life brought the LGBTQ Rainbow Resource Center under its auspices and was up-staffed to accommodate growing interest and student demand. The Student Women's Resource Center, Wade Leadership Center, Non-Traditional and Commuting Students Lounge, newspaper, WMEB (radio), Representative Student Boards, Student Government Inc., and Greek Life Center are also housed in Memorial Union.

Student housing and recreation facilities

Future housing options should be suited to student needs and UMaine will continue to explore and develop public/private partnerships to make this a reality. These initiatives and possibilities will be discussed and explored through the 2019–2022 Division of Student Life Strategic Plan (in process). In that plan, this type of expansion may also be considered for the New Balance Campus Recreation Center, a nationally recognized facility that enjoys some 2,200 visitors daily and has been noted as a transformational aspect of the campus. The 86,000 square-foot facility is home to student-centered and community-engaged programs and services. Campus Recreation works to create a community that is healthy, engaged, and physically active.

Intramural Sports runs five nights a week and has over 40 events and leagues. Student participation is high, with 15,000 participants per year. Our Fitness programs offer over 40 classes a week, and when combined with personal and group training, help support the wellness goals of over 10,000 faculty, staff, and student participants annually. The New Balance Recreation Center also supports the Maine Bound Adventure Center that has over 11,000 student uses of the indoor climbing wall, and outdoor adventure programs and services per year.

FERPA process improvements

Finally, the Office of Student Records is currently providing input on a new University of Maine System training initiative that will include a FERPA training module. UMS recently upgraded its document imaging system, and steps are being taken to provide UMaine a process to purge records in accordance with the Record Retention Practices. UMaine's Associate Registrar provides a periodic training on FERPA for administrators and professional and clerical staff.

Student Life self-assessments

The Division of Student Life has an internal assessment process that reviews each department every three years. The review looks at best practices of the discipline, comparison to CAS standards, evidence-based practices, promising strategies, issues, concerns and recommendations for future operations. Division leaders and staff also collect data using on-line web survey tools, self-assessments, and external assessments, conducted through the graduate program in Higher Education, to determine trends and interests. Offices collect data on participation, satisfaction and use of services and resources.

The LGBTQ Center completed a climate assessment in 2017. A biennial climate survey assesses student knowledge, perceptions, and experience of issues of sexual assault and all forms of sexual violence. We also enlist student voices and input via the LeadWell Peer educator program, LiveWell Student Wellness Coaches, the LGBTQ and Allies Council, the

University of Maine Veterans Association, and the Veteran Student Advisory Committee.Additionally, institutional data from the Office of Institutional Research and Assessment are used to determine effectiveness and trend analysis. Currently, UMaine and UMM use the NSSE instrument, and UMaine will conduct the CORE survey for substance use and abuse. UMaine also conducts the biennial Drug Free Schools and Community Act review of substance abuse services.

Diversity efforts are reported in the Dean of Students' Diversity and Inclusion Plan. (See Standard Nine.)

Projection

Enrollment growth

The University of Maine is positioned for further enrollment growth through careful attention to recruiting and supporting in-state students and attracting out-of-state students through our Flagship Match program. The in-state and out-of-state awareness of what UMaine has to offer has broadened through increases in acceptance standards, a broader national marketing program, and availability of relevant programs and services. Even with declining numbers of high school graduates in Maine, the university expects to attract an increasing percentage of those graduates while continuing to increase the number of out-of-state students through the Flagship Match program. UMaine has the quality programs to attract increased numbers, and has expanded its visibility in this competitive market.

UMaine has set a goal to increase the incoming class size for both UMaine and UMM: An increase of 5% for UMaine and 43% for UMM. To that end, UMaine has extended its Flagship Match program to three additional states — Minnesota, Virginia, and Michigan — and has waived all application fees to remove barriers to financially stressed families. UMaine has also taken on an expanded role in UMM recruitment and admissions. UMaine is directing and assisting with travel, application review, on- and off-campus recruitment events, application-generation campaigns, marketing material design, and trainings to increase efficiency in all areas of the enrollment operation, while offering numerous mentoring and professional development opportunities to UMM staff.

The UMaineGOLD program is projected to increase online enrollment by at least 25% between FY2019 and FY2020. (See Standard Four for a description of this program.) UMaine projects a 3 percent increase in total enrollment over the next five years.

Retention and graduation

Improving retention and graduation rates is a key priority. Further analysis of our student populations and their needs, and more thorough evaluations of programs supporting them, will allow us to better serve students with the resources we have. UMaine aims to increase retention and graduation rates by 5% over the next five years through a combination of an early-alert advising tool (EAB Navigate), college-based advising centers, first-year success courses, and our continuing emphasis on completing college in four years through the Think 30 initiative.

Student services

Student services programs are operating at maximal efficiency. Over the years in response to budget constraints, the Division of Student Life has realigned staff, and maintained services and standards within the confines of current resources. This has been effective, but infusion of financial resources in 2017, 2018, and 2019 has enhanced the student experience through the expansion of critical services and programs improvements. Counselors, preventionists, and programmers have also been added to the staff.

Standard Six:

Teaching, Learning and Scholarship

I. Faculty and Academic Staff

Description

In fall 2018, UMaine employed 888 faculty and UMM employed 64. The table below provides a summary of current faculty for UMaine and UMM.

UMaine and UMM Fall 2018 faculty snapshot

		UMaine				UMaine at Machias			
	Regular appointments				Regular appointments		A diment	Tetal	
	Tenured/	Non-tenured	Adjunct faculty	Total faculty	Tenured/	Non-tenured/	Adjunct faculty	Total faculty

Part-time	22	17	231	270	0	33	7	40	
Total	448	203	237	888	25	36	7	68	

UMaine faculty establish the curriculum and academic standards for academic units, and initiate the creation and elimination of courses and programs. The Faculty Senate represents the faculty in making recommendations and decisions about program creation and elimination. At UMM, the faculty meet as a whole and oversee the curricular and academic standards for the programs in Machias. Although the President of UMaine makes final decisions, academic hiring is normally based on department-level faculty searches.

Appointment, promotion, and tenure

Faculty appointments, tenure, and promotion decisions at UMaine reflect those normally found at major research institutions in the United States, and are identified in the AFUM contract. Reappointment, promotion, and tenure decisions are made with substantial faculty input based on student, peer and self-evaluations of teaching, research, and service.

Evaluation criteria are developed at the appropriate departmental or divisional level, and address teaching (instruction, student advising, course/curricula development, etc), research and scholarship (including creative work in the discipline, publications and presentations, research, and scholarly writing), and service (to the department, college, campus and university, and to professional activities and service related to the discipline, the state, and beyond). At UMM, while the focus is on teaching rather than on research, the same areas of evaluation criteria are applied.

Faculty rights and responsibilities

UMaine and UMM faculty rights and responsibilities are delineated in the AFUM contract. At UMaine, they are also reflected in campus governance policies (the Faculty Senate Constitution and Bylaws, the bylaws of each of academic college, and the Faculty Handbook). All members of the university community enjoy and exercise academic freedom as generally understood in higher education. At UMaine, academic freedom is defined as the freedom to discuss, meet with others, and present scholarly and personal opinions and conclusions regarding all matters in the classroom and in public; to explore all avenues of scholarship, research, and creative expression; and to reach conclusions according to one's scholarly discernment and according to one's own conscience on all matters, including university operations, policies and employment practices without any institutional censure, discipline or restraint. UMM has a Faculty Handbook distinct from UMaine's, but with a similar definition of academic freedom.

Faculty workload at UMaine, which includes teaching, research, and university and public service, is determined primarily at the department level (or other appropriate unit), and is based on departmental responsibilities and needs, college needs, individual competencies, and past workload. Individual workload assignments are made in consultation with the faculty member. Faculty workloads vary by college and in some instances within a college. The most common teaching load at UMaine for tenure-track faculty members is 2-2.

At UMM, the faculty teaching workload is primarily 12 credits per semester (4-4) due to the

campus focus on teaching. Student advising at UMM is also part of the faculty's teaching responsibilities. UMM faculty are encouraged to develop strong ongoing relationships with advisees, adhering to a "relational advising" model. Faculty are assigned advisees in their major and the number of advisees per faculty member varies by program. At UMM, there is an additional first-year student advisor and an adult learning advisor for those student populations.

Faculty expertise

Faculty at UMaine typically hold terminal degrees in their disciplines from a wide array of respected institutions. The nature of UMaine as a research institution means that faculty members are recruited, evaluated, and retained based not only on their teaching competence, but also on scholarly and research productivity and potential. The faculty database provides a central clearinghouse for ongoing information about the expertise and productivity of faculty members. Further, in different colleges and program areas, specialized accreditation also works to ensure that teaching is done by qualified and competent instructors, whether faculty, graduate students, or adjunct faculty. Specialized accreditation applies a corresponding standard at UMM, with the addition of outside program reviews also ensuring the quality of faculty.

Academic ranks and faculty categories

Faculty categories and definitions are outlined in the AFUM contract. There are three kinds of ranks at UMaine: Academic Ranks, Extension Ranks, and Research Ranks. Academic Ranks include Lecturer, Instructor, Assistant Professor, Associate Professor, and Professor; all except Lecturer and Instructor ranks are tenure-track. Extension Ranks include Extension Instructor, Assistant Extension Professor, Associate Extension Professor. Research Ranks include Assistant Research Professor and Research Professor.

After six years of service, appointment of faculty members holding special or research appointments can be discontinued only for just cause (e.g. a lack of funding). With respect to graduate faculty, six categories of membership exist: full graduate faculty, associate graduate faculty, external graduate faculty, emeritus graduate faculty, graduate faculty, and ex officio members. The level of membership on the graduate faculty corresponds to the ability to chair a graduate committee, cochair a graduate committee, serve on a graduate committee, and teach a graduate-level course. Training specifically targeting graduate teaching assistants is also provided at the departmental level, especially in units in which teaching assistants are used extensively. All faculty members at UMaine must hold an appointment in a home department. UMM has the same rank structure and tenure process, minus the Extension Ranks and with Research Ranks being rare.

UMaine Faculty (inclusive): Headcount and FTE, 2008–2009 to 2017–2018

Note. This table includes all active UMaine employees having an employee classification of "faculty." This inclusive group comprises faculty affiliated with an academic unit or the Division of Lifelong Learning, as well as associate deans and coaches, and appointments in Cooperative Extension and policy- and research-related centers (e.g. Climate Change Institute, Margaret Chase Smith Policy Center).

Adjunct faculty

An important cadre at UMaine is our adjunct faculty, whose employment conditions are outlined in the Part-Time Faculty Association (PATFA) contract. A full count of tenure/tenure-track and not tenured/tenure-track faculty and adjunct appointments is provided below. In addition to adjunct faculty, who taught 15% of class sections in 2017–2018, courses are also taught by graduate teaching assistants. In 2017–2018, UMaine employed 639 graduate assistants, who taught 12% of class sections (57% were labs, 22% recitations, and 21% lectures or seminars).

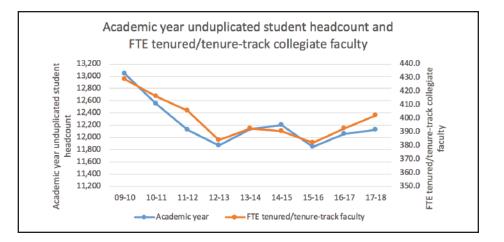

UMaine's University Teaching Council, a faculty-led group that advises the Provost on matters of pedagogy, curricular innovation, and classroom best practices, conducted a twoyear study of adjunct faculty resource needs in 2015–17. An end-of-summer Adjunct Faculty Orientation, organized and led by staff in the Center for Innovation in Teaching and Learning, was an outgrowth of that work. The orientation shares information with new and returning adjunct faculty about Human Resources, library access, departmental cultures and expectations, and other facets of their work at the university.

Faculty recruitment

In recruiting new faculty and staff members, UMaine and UMM both adhere to an open and consistent search process using HireTouch software. Recruitment is the shared responsibility of the recruiting department and Human Resources. The selection of the search committee and the search chair is determined at the unit level, but it is UMaine's policy that the search committee should be diversified to the degree possible by race, gender, culture, and in other appropriate ways. It is also UMaine's expectation that both men and women will participate on each search committee, and, where necessary, the Office of Equal Opportunity assists search committees in this regard.

All units at UMaine are assigned a Human Resources Partner (HRP) who works as a liaison between the unit and HR in all searches. Once the search for a position has been approved by the Provost and the college Dean, a job description is prepared. This job description is then approved by the Dean's Office and HR.

Typically, an initial short list is developed from the applicant pool by the search committee, and candidates are interviewed by phone or videoconference. After initial interviews, the search committee proposes a list of finalists. For faculty hires, the list of finalists must be approved by HR and the college dean. Under normal circumstances, a minimum of two candidates are brought to campus as finalists for any position. The search committee sends a list of finalists to the dean with narrative of the finalists' strengths and weaknesses, consistent with the identified criteria for the position. The dean makes a decision about what offer should be made and to whom. UMM searches (and other HR functions) are supported by UMaine HRPs. A similar process is followed at UMM, with the Head of Campus making the final hiring decision.

Appraisal

The number of FTE faculty at UMaine showed an overall drop between 2009–2010 and 2015–2016, with tenured/tenure-track faculty experiencing the largest drop (-13%). This occurred during a period of enrollment decline (see figure above). Recent growth in enrollment has led to a reversal of the trend, with increased investment in tenured/tenure-track faculty in recent years. UMaine appointed 93 tenured/tenure-track faculty between 2015 and 2018, which is almost twice the number of faculty who departed in the same period.

Salaries

Data from the 2017–2018 American Association of University Professors' Annual Report on the Economic Status of the Profession indicate that average salaries at UMaine and UMM are lower than the national averages for their respective institutional peer groups.

	University of Maine		University of Maine	at Machias
Rank	National Average Public Doctoral	UMaine	National Average Baccalaureate	UMM
Professor	\$141,476	\$112,700	\$90,879	\$69,200
Associate Professor	\$99,820	\$85,500	\$73,387	\$58,400
Assistant Professor	\$87,043	\$68,500	\$63,616	\$48,400
Instructor	\$65,606	\$54,400	\$57,222	*
Lecturer	\$64,614	\$56,800	\$52,807	*

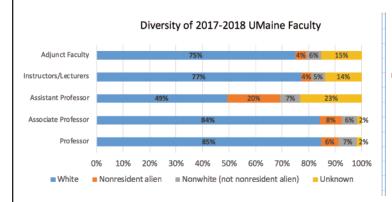

*The number of instructors and lecturers included in the salary data reported for UMM was too small to be included in the averages.

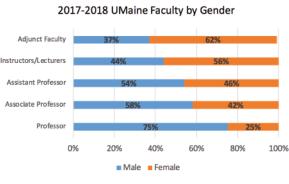

In the state of Maine, average salaries at UMaine are higher than at all other public institutions, though they are lower than at the private liberal arts universities in the state (Bates College, Bowdoin College, and Colby College). Data included in the NEA's Higher Education Advocate May 2017 publication indicated the salaries at UMM were lower than at most other higher education institutions in Maine.

Faculty diversity

The recruitment of historically underrepresented groups and women for faculty positions at UMaine remains a matter of attention and concern. See chart below for data by faculty rank. With respect to issues UMaine women faculty face, the UMaine Rising Tide Center, established to advance gender equity on campus, released its Comparative Study of Gender Differences in Perceptions of Faculty Work-Life, 2011 & 2015 in 2016. In addition, the Provost's ADVANCE Initiative Council was formed in March 2009 (renamed the Provost's Council on the Advancement of Women Faculty in fall 2016). This council serves as an internal advisory committee on matters related to gender equity.

Rising Tide's work on gender equity has produced more than 20 peer-reviewed publications, and over 20 national and international presentations that serve as a resource for UMS, and other academic institutions.

II. Teaching and learning

Description

UMaine engages in a broad array of efforts to ensure that instructional methods are aligned with best practices, and that student learning is measured through reliable and valid methods driven by faculty input and participation. These include both instructional interventions/professional development and quality assurance methods, such as program accreditation and review processes. A major focus during the past five years has been a campuswide implementation of program and General Education assessment (see also Standard Eight). The Office of Institutional Research and Assessment has worked with faculty to design a campus assessment plan, common protocols for program assessment, and a plan for the assessment of General Education courses.

Accreditation and advisory committees

Individual colleges and programs also undergo specialized accreditation and review. Over 50 programs of study at UMaine have earned and maintained specialized accreditation in good standing. Major units include the College of Engineering, which has continuously maintained ABET accreditation since 1936; the Maine Business School, fully accredited through the Association to Advance Collegiate Schools of Business (AACSB) since 1974; and the College of Education and Human Development (currently NCATE-accredited; seeking CAEP accreditation in 2020).

Advisory committees also play a significant role in program development. Dozens of advisory groups help guide academic and research centers across UMaine. For example, the professional advisory committee for the Cooperative Forestry Research Unit helps guide the focus and scope of collaborative research activities focused on improving tree species and wildlife management practices. Another example is UMaine's Graduate School of Biomedical Science and Engineering, established in 2006 as a partnership among UMaine, Jackson Laboratory, Mount Desert Island Biological Laboratory, Maine Medical Center Research Institute, the University of Southern Maine, and the University of New England. The External Advisory Board provides external counsel and perspective regarding scientific direction and curricula, assists in identifying and securing external funding, aids in networking for students and faculty, and serves in an advocacy role both internal and external to the university.

UMM has several standing advisory committees, including Education, Recreation & Tourism, Management, Conservation Law, the Early Maine Literature Advisory Board, and two ad hoc advisory committees, Psychology & Community Studies and Business Studies.

Examples of UMaine and UMM course and program innovation

UMaine has worked consistently to meet the needs of students through innovative academic offerings and instructional practices. Below are several examples:

In fall 2016, a set of successful Phage Genomics courses, developed as a collaboration between the Honors College and Molecular and Biomedical Sciences (MBMS), were expanded to include all MBMS entering students. The Maine Business School faculty has introduced several new courses in recent years, including new MBA offerings in Managerial Marketing and Socially Responsible Investing. Leadership in Chaotic Times, a Washington, D.C. travel course, has offered as part of UMaine's Leadership Studies program, and includes meetings with members of Congress, ambassadors, lobbyists, military leaders, congressional staffers, and others. And in 2016 and 2017, the School of Nursing led community health disaster simulations in partnership with UMaine students, UMaine police, local fire and rescue personnel, area nurses, and the UMaine Volunteer Ambulance Corps. In 2017, UMaine developed a regional course on family forests in conjunction with the University of Massachusetts at Amherst and the University of Vermont through a grant from the New England Society of American Foresters. Thirty-two undergraduate forestry students — 11 from UMaine — participated. A major assignment required students to prepare, working in inter-university groups, a syllabus for future family forests classes, with reading lists addressing family forest outreach and education, outdoor recreation management, invasive plants and pests, regional silviculture, maple syrup production, small scale timber harvesting, succession and legacy planning, and consulting forestry.

Each year, a Division of Lifelong Learning course offers students the chance to attend the Camden International Film Festival and engage with filmmakers from around the world. The course provides students with an insider view of the film industry. The Darling Marine Center, in cooperation with the School of Marine Sciences, offers students a Semester by the Sea experience to study complex marine environments and apply foundational skills acquired in preparatory coursework. And UMaine's Hutchinson Center hosts the Midcoast Leadership Academy, where participants from the midcoast region of Maine develop management and leadership skills.

Two examples of innovative applied practice are the use of TeachLivE, an avatar-based simulator by UMaine Education and Human Development students, who receive real-time feedback about the quality and appropriateness of their teaching strategies in a mixed-reality environment; and UMaine's Cooperative Extension 4–H STEM Ambassadors: undergraduate students who facilitate STEM activities with Maine youth ages 8–14.

UMaine's Foster Center for Student Innovation offers a minor in Innovation Engineering emphasizing a systematic approach to creating, communicating, and commercializing ideas in any field. Students learn how to innovate in a range of organizations: businesses, nonprofits, government agencies, educational institutions, arts organizations, and others. Innovation Engineering students use prototyping and small-scale production facilities in UMaine research centers, including the Innovative Media, Research and Commercialization Center and the Advanced Manufacturing Center.

A major focus at UMaine is STEM instructional transformation. Faculty in Biology and Ecology, and Physics and Astronomy created an NSF-supported University Classroom Observation Program, where 117 middle and high school teachers have observed 535 STEM courses and provided faculty with feedback on their instruction. To date, research from this program has been published in three peer-reviewed publications and has garnered additional NSF funding to examine the student transition from high school to first-year university STEM courses.

UMaine also delivers the Faculty Course Modification Incentive Grant-Maine Learning Assistant (FIG-MLA) Program, aimed at improving undergraduates' STEM course experiences and outcomes while providing professional development opportunities for exemplary STEM majors and STEM faculty. Through the program, STEM faculty receive assistance in planning and enacting course modifications that incorporate research-based techniques for STEM instruction, including those that promote active learning. As of 2017, 38 instructors in 14 departments have received these grants.

Maine Learning Assistants (MLA) are undergraduates hired to assist with faculty course modifications. In total, 238 undergraduate students have worked as MLAs. In 2017–2018, 77% of incoming STEM majors took at least one MLA-supported course, and undergraduates in these classes showed higher retention rates than students in non-MLA supported courses. The program is coordinated by UMaine's Center for Research in STEM Education (RiSE Center), which was formed to advance the research and practice of teaching and learning in STEM fields through research, graduate education, and

professional development, and community partnerships focused on improving the research and research-based practice of STEM education at all levels of instruction.

Several UMM programs have been developed to transform the learning environment for students. Launched in fall 2015, STEM Bridge is a nine-day program offered prior to the start of the fall semester for students with a weak background in mathematics. It mixes mathematics support, growth mindset development, and hands-on activities salient to the UMM science program. The Peer Educator Program, begun in spring 2015, comprises supplemental instructors, trained embedded tutors, and regular Study Center tutors matched with courses based on academic need. Finally, the Family Futures Downeast is a one-year program providing access to education and employment opportunities for parents with young children by combining postsecondary education and workforce development with high-quality early education for the children.

Program assessment

UMaine faculty are leading efforts to design new assessment instruments intended to measure differences in student thinking when administered at multiple time-points during an undergraduate program: e.g. when students enter the major; after the introductory course series; just prior to graduation. For example, faculty in Biology and Ecology have led the design of the Bio-MAPS (Biology-Measuring Achievement and Progression in Science) suite of assessments, which are aligned with core concepts of Biology outlined in the American Association for the Advancement of Science's 2009 Vision and Change report, and supported by NSF funding. Outcomes from these assessments have been used by UMaine faculty to highlight program successes, and to develop ways to address challenging concepts for students. In addition, there are several faculty learning communities in Biology and Ecology focused on outcomes assessment.

Support for faculty and graduate teaching assistants

The Center for Innovation in Teaching and Learning (CITL) provides support for innovative pedagogical efforts, and promotes excellent teaching and learning at UMaine. Together with partner centers and academic units, CITL works to create and sustain a culture of innovation in teaching through workshops and personalized consulting on curricular and instructional design, educational software, technologies for instruction, and related efforts to support 21st-century information and learning cultures. CITL has studios staffed with instructional designers, and outfitted with video and audio production facilities, and resources for developing animations, graphics, and experimenting with new technologies. Training specifically targeting graduate teaching assistants is also provided at the departmental level, especially where teaching assistants are extensively used. In addition, CITL staff help UMaine and UMM make pedagogy-informed decisions about services used in teaching, including student response systems, video services, web collaboration platforms, learning analytics, and more.

In 2017–2018, CITL helped faculty develop technology solutions for 157 undergraduate and graduate courses in Business, Education and Human Development, New Media, and other programs; delivered 18 training workshops for faculty and students; and provided tours for Admissions, 4–H, and others.

To support an increasingly diverse faculty and student body, the Rising Tide Center was established with initial support from an NSF ADVANCE Institutional Transformation grant to create an equitable environment for faculty with the view that a "rising tide lifts all boats." Data-driven methods used to create and sustain positive change at UMaine include professional development opportunities for faculty, encouraging the use of family-friendly policies, establishment of a dual-career support system to attract and retain faculty talent, the introduction of a targeted mentoring program, and best-practices training for administrators and search and peer committee members.

Faculty research

UMaine consistently ranks among the top third of public universities engaged in research through the NSF Higher Education Research and Development (HERD) Survey. We are classified as a Higher Research Activity Institution by Carnegie. In FY2018, UMaine received a total of \$72.8 million in awards, and research expenditures reached \$129.9 million.

Recent institutional investments have been made to increase faculty support for proposal development, assistance with grant submissions, and professional development related to grant writing, all in an effort to increase the number and quality of grant submissions to external sponsors. Additionally, UMaine offers several internal funding programs for faculty research, artistic work, travel, and professional development. The Faculty Research Funds Program is administered by the Office of the Vice President for Research and Dean of the Graduate School. It seeks to stimulate and facilitate faculty research and scholarship.

Similarly, the Research Reinvestment Fund was established by the University of Maine System Board of Trustees to strengthen research, development, and commercialization activities tied to Maine businesses and to industries critical to the future of Maine. Additional funding opportunities for faculty in the Humanities are available from the Clement and Linda McGillicuddy Humanities Center Faculty Grant Program, which seeks to support research, community engagement, and innovative teaching proposals.

UMaine also offers targeted internal funds to encourage progress and faculty engagement in institution-wide goals. The Innovation in Assessment Grant Program supports assessment-related projects and initiatives directly impacting student-learning outcomes and assessment processes for undergraduate, graduate, or certificate programs. Rising Tide Leadership Grants provide support for faculty who seek to advance their academic careers, and benefit the larger campus through work on equity and inclusive excellence.

Outreach and service

UMaine also supports outreach and service. UMaine's Cooperative Extension has a physical presence in all 16 Maine counties. It provides educational outreach and youth development programming, and connects local businesses to state and regional research expertise and other resources. UMaine's Hutchinson Center has initiated a statewide marketing campaign aimed at adult degree completion for students who may be positioned to complete a B.A. or B.S. through the Bachelor of University Studies, and UMaine's Cohen Institute offered a fall 2016 course, Leadership and Public Service, taught by a senior public servant who worked as chief of staff for three United States senators. To name just three examples of faculty volunteerism: UMaine faculty present original research to Maine historical societies and museums; serve as presenters at the Maine Science Festival; and serve as scholarship judges at the Maine State Science Fair.

Academic policies

UMaine and UMM publish their policies on continued enrollment and academic suspension, dismissal and graduation in their respective undergraduate catalogs (UMaine and UMM). Each catalog explains categories of dismissal, suspension and probation; outlines appeal procedures; and describes the academic activity allowed during suspension and/or dismissal. Each catalog also explains procedures and conditions for readmission. Potential UMaine academic policy changes are discussed in a monthly Associate Deans' working group chaired by the Senior Associate Provost, who also sits on the Faculty Senate's Academic Affairs Committee at the Senate's invitation. With key input from faculty and professional advising staff, the Associate Deans' group completed a two-year reassessment and revision of UMaine's undergraduate probation and suspension policy in November 2018.

UMaine and UMM advising

The chief vehicles for UMaine advising are faculty advisors in the academic units and college advising staff (in the deans' offices and/or in advising centers). For example, Liberal Arts and Sciences (CLAS) provides several forms of academic advising. These include faculty advisors for students in their declared majors, academic advisors from the CLAS Advising and Student Services Center, and co-advisors (faculty and academic advisors) for students who are new transfers (in their first two semesters) or on academic probation.

Most units in Natural Sciences, Forestry, and Agriculture have an undergraduate program coordinator with primary responsibility for advising first-year and new transfer students matriculating into undergraduate majors. In Education and Human Development, a central Advising Center manages advising and the teacher candidacy process. Students in the College of Engineering are primarily advised by faculty with support from Dean's office staff.

Liberal Arts and Sciences hosts a campuswide Academic Advising Conference each fall to support faculty and staff in their advising work and to share best practices. The conference includes presentations on advising international and transfer students, FERPA, how to identify students of concern, tutoring resources, and related topics.

UMM students are advised principally by faculty. UMM also employs a High School Transitions/Early College Advisor who works with early college and first-year students, and coordinates UMM's use of the Navigate early-alert/retention software system.

Support for student scholarship and creative activity

UMaine supports scholarship, research, and creative work through a broad range of internal funding opportunities and administrative assistance for students, faculty, and staff seeking external support. Students are supported through a variety of means, especially research grants in the major units. The institution also supports student scholarship through several internal and external funding mechanisms.

The newly created Undergraduate Research Collaboratives Program supports undergraduates interested in conducting cross-disciplinary research. UMaine units also award support for student research and travel activities. For example, the Linda Lancaster Fund supports professional development and research travel costs for graduate students in Education and Human Development. Similarly, the Leitch Fund supports travel costs for Honors students to attend professional meetings and conferences.

The Office of Major Scholarships, established in 2018, assists students in competing for prestigious national merit-based awards such as the Udall, Fulbright, Goldwater, Truman, and Rhodes scholarships. The number of student submissions per year has already increased in multiple award categories. (See also Standard Four.)

Appraisal

Innovative technologies, innovative learning spaces

Since its last comprehensive review in 2009, UMaine has pursued innovative technologies for teaching and learning on several fronts. Launched in spring 2017, the university's Hackerspace gives students access to contemporary technologies (e.g. Arduinos, 3D printers, patternmakers) and supports exploration of new ways of thinking. Working independently, in teams, or as part of a course, students develop new approaches to traditional tasks. They also test the limits of new technologies by creating their own Rube Goldberg machines or by printing simple 3D widgets.

The Virtual Environment Multimodal Interaction Laboratory (VEMI) is a collaborative UMaine educational, research, and development facility where faculty and undergraduate and graduate students from more than a dozen disciplines conduct research and hone technical skills using the latest virtual and augmented reality technologies. VEMI staff also provide guidance on structural improvements to classrooms and technologies to promote research-based instruction.

Since 2011, five active learning classrooms have been developed at UMaine in response to faculty and programmatic needs. The classrooms are distributed around the campus, and vary in size and configuration to meet the needs of courses in multiple disciplines. Through the Center for Innovation in Teaching and Learning, faculty have access to professional development and training about how to use these spaces to the maximum instructional benefit of their students. In fall 2018, 47 instructors taught a total of 2,221 students in UMaine's active learning classrooms. In spring 2019, 37 instructors are teaching 1,865 students in those classrooms.

UMaine has also made physical investments in traditional classrooms throughout the Orono campus. Since its inception in 2012, the Paint and Polish initiative, a faculty-guided effort to align US:IT, Facilities Management, and Academic Affairs resources for classroom upgrades at UMaine and UMM, has been a clear success. In summer 2017, for example, 39 classrooms were upgraded or renovated, and 50 classrooms received information technology upgrades. A core Paint and Polish strategy has been to coordinate as many physical upgrades as possible with complementary IT improvements. In this way, best practices for instructional design are met, with appropriate technologies and environmental enhancements made to support these learning spaces.

Evaluating student success initiatives

A comprehensive analysis of academic advising and student supports was conducted in 2017, examining the practices and impact of academic advising, UMaine's Think 30 initiative, and our Summer University and Winter Session course offerings on student success. The Think 30 results are also examined in detail in Standard Eight.

Adoption of an online modality for student evaluations of teaching

Efforts since spring 2017 at UMaine and UMM to shift to online student evaluations of

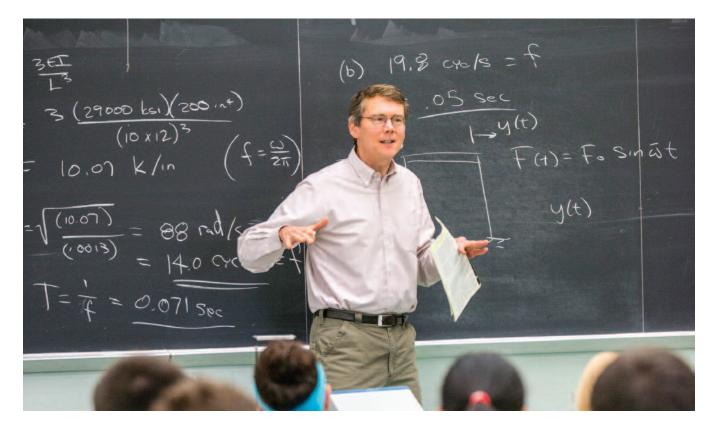

teaching in online and blended courses have been successful. UMaine has improved response rates from as low as 10% (on paper-based evaluations of online courses) to approximately 66% (for a mix of online and face-to-face courses) using a software platform (Blue), coupled with best practices in survey administration. As paper-based evaluations in face-to-face courses typically see return rates above 80%, UMaine is seeking to secure an equal or higher rate for online evaluations. While paper-based evaluation yields strong response rates, it does not support useful disaggregation of data to detect potential differences in student experiences related to race, gender, or course performance. The online system allows faculty to customize questions, adjust the evaluation schedule, and ensure access for all enrolled students. The design of the system promotes the use of student feedback to inform instruction. The number of UMaine academic units moving from paper-based to online evaluations continues to grow each semester.

Grant training and support

UMaine has supported faculty research success through increased grantsmanship services and outreach, especially to early-career faculty. In 2017–2018, a New Researcher Orientation (NRO) was established to complement UMaine's general faculty orientation held at the beginning of the fall semester. NRO connects faculty to research offices and staff to raise awareness of available services and trainings, as well as initiatives aimed at growing the research enterprise. Examples of trainings include program-specific grant writing workshops; introduction to research commercialization; and a basic Grants 101 training held twice per semester in collaboration with Fogler Library. Examples of faculty support include 1:1 proposal development assistance, facilitation and support of large interdisciplinary center grant writing teams, and customized funding searches/alerts, including raising awareness of nonfederal funders. Efforts are underway to further grow staffing in the research offices to enhance the institution's national standings.

Faculty student collaborations and mentoring partnerships

Through the Center for Undergraduate Research (CUGR), students develop tools and resources needed to achieve an authentic understanding of the research endeavor. CUGR sponsors academic-year fellowships, summer fellowships, a research fellows program,

travel grants, and the annual UMaine Student Symposium. All of these programs are funded by the Vice President for Research and Dean of the Graduate School, and supplemented by external funding from federal and state agencies and private industry.

CUGR has significantly expanded students' participation in research and creative activities, as evident by the number of undergraduate authors and presenters at the 2018 UMaine Student Symposium (756) as compared to the 2017 event (539) (an order of magnitude increase from the first event in 2010, which drew 68 students). In addition to internally funded fellowships, CUGR has doubled NASA/MSGC funding from \$60,000 in 2017 to \$127,000 in 2018 for student fellowship and scholarships, and has increased sponsorship from private industry from \$500 in 2015 to \$30,000 in 2018. After completing the pilot phase of the program in 2017, the 2018–2020 CUGR Faculty Fellows program recruited its second cohort of 20 faculty participants and provided them with professional development workshops focused on mentoring student researchers.

In 2019, the UMaine Graduate School and UMaine's Graduate Student Government will pilot UMaineGRAD (Growth, Resilience, Advancement, and Delivery). The program will focus on teaching skills, research skills, career development skills, and health and wellness, and will permit graduate students to earn digital badges for different skills and competencies through UMaine's Engaged Black Bear digital badging initiative.

Projection

There are several areas of focus for additional support of UMaine faculty, including a) increased support for student advising; b) continued hiring of tenure-track faculty; and c) strategic and fiscal planning for innovative units, including the reorganized Maine Business School.

Advising and early-alert support: Navigate

UMM implemented the EAB advising platform Navigate in fall 2018. A team of UMaine faculty and staff are working with EAB to prepare for UMaine's adoption of the platform, in stages, in 2019–2020. UMaine's goals for Navigate focus on timely, intentional communication with students, particularly those at risk, leading to better academic outcomes, including first- to second-year retention; and, providing a high-quality resource for faculty seeking more complete information about their students' (and assigned advisees') academic and student-life strengths and challenges. UMaine plans to train faculty and professional advisors on Navigate beginning fall 2019, and expects to introduce Navigate's student-facing app to incoming and returning students beginning summer 2019.

Future faculty hiring

Since 2014, faculty hiring priorities at UMaine have responded in general to a) demonstrated areas of enrollment growth, and b) replacement needs (for retiring or departing faculty) and opportunity hires (including spousal/partner accommodation). For example, tenure-track hires in the College of Engineering, and in select units in the College of Natural Sciences, Forestry, and Agriculture, have been driven by sustained enrollment growth and a corresponding need to grow the faculty in those areas. The administration anticipates a continued emphasis on enrollment-driven hiring, along with consideration of replacement needs and opportunity hires, over the next three to five years.

Continued implementation work and fiscal stability for Maine Business School

Since summer 2018, MBS administrators and faculty have had more than 225 meetings with various representatives from the Maine business community, political leaders, and the UMS. In addition, they have also conducted a competitive analysis, and have received market research reports from the Association for University Professional and Continuing Education and EAB. They are using the information from this comprehensive market analysis to develop a variety of innovative and collaborative degree options. The following

list illustrates the unit's collaboration partners, and the various degree options it is working on:

- University of Maine Law School
 - Rebuild and rebrand the JD/MBA.
 - Developing a concentration in Transaction Law for the MBA program.
- Muskie School of Public Service (University of Southern Maine)
 - Developing a dual degree in MPPM/MBA.
 - Developing a dual degree in MPH/MBA.
 - Developing dual degree in MSW/MBA.
- University of Maine at Farmington
 - Developing a concentration in Outdoor Sports Management for the MBA program.
- University of Maine at Presque Isle (UMPI)
 - Developing a 4 +1 program for UMPI Business undergraduates to join the MBA program.
- University of Maine
 - Developing a concentration in Forestry Business for the MBA program.
 - Developing a concentration in Aquaculture for the MBA program.
 - Working with the Foster Center for Student Innovation to develop a concentration in Innovation for the MBA program.
- University of Southern Maine
 - Developing a concentration in Food Studies for the MBA program.

In addition, MBS is working on a variety of MBA concentrations that will likely include Analytics, Finance, Marketing, and Healthcare Management. And within the next two years, MBS foresees launching an M.S. in Accounting and an M.S. in Analytics.

MBS has developed a 5-year budget analysis for the Graduate School of Business outlining projected growth in enrollments and revenue. The university believes innovative curriculum enhancements, planned partnerships, and the addition of new graduate programs for the MBA (as described above) will be significant drivers of enrollment growth. The Graduate School of Business is projected to be self-sustaining at the end of fiscal year 2023. See the enrollment and revenue analysis below:

Graduate School of Business enrollment and revenue analysis

		Evening/Online MBA	M.S. Bus Analytics	M.Acc	F.T.MBA	Fees	Total Revenue
FY 19	Headcount	88					88

Explanation of teaching load if not measured in credit hours - Teaching load is measured in total student credit hours

Other notes.

The faculty appointed, tenured, departed, and retired reflect regular faculty only.
 The fall teaching load credit hours include regular and temporary faculty. Excluded are associate deans, coaches, faculty in the Cooperative Extension Service, and research faculty whose entire appointment is in a research or policy center.

Standard Seven:

Institutional Resources

I. Human Resources

Description

The Office of Human Resources (serving UMaine and UMM) recruits, trains, develops, incentivizes, and retains employees committed to our student-centered mission. Partnering with all departments via a business partner model, HR helps employees throughout the organization align individual and unit goals with institutional goals.

In fall 2017, UMaine employed 2,720 employees (2,131 full-time and 589 part-time), including 505 full-time faculty and 305 adjunct faculty. UMaine also employs approximately 600 graduate students and 2,500 undergraduate students. The University of Maine System has six collective bargaining agreements, covering a majority of employees; the agreements apply to the UMaine and UMM workforces. Nonrepresented employees are provided resources and advocacy through the University Supervisors/Confidential Employees Advisory Council and HR. Terms of employment are made available to faculty and staff in their individual contracts. All terms of employment are also included in employee offer letters. Grievance procedures are set in collective bargaining agreements, and nonrepresented employees can file grievances through HR.

Requirements to qualify for tenure-track faculty positions and other staff positions are outlined on the HR website. All policies regarding human resources and labor relations are also available on the HR site. UMaine strives to remain competitive in compensation for faculty, staff, and administrators. Our baseline salaries are not as high as some peer institutions, but we offer robust benefits as part of total compensation packages. All full-time regular and part-time regular employees working at least half time are eligible for benefits, including health care, educational opportunities, veteran benefits, paid leave, disability benefits, family leave, dependent tuition, retirement, and an Employee Loan Fund, among others.

Benefits, which can be managed through a convenient online portal, have a positive impact on employee retention, and physical and financial well-being. UMaine's Intellectual Property policy also helps attract and retain talent. The Office of Innovation and Economic Development facilitates technology transfer and the commercialization of inventions produced at UMaine. Researchers retain ownership of their intellectual property and revenue is shared between UMaine and the researcher.

All faculty and staff are evaluated according to the provisions of their collective bargaining agreements. Faculty and staff are encouraged to continue developing professionally through participation in trainings, conferences, and networking events.

Appraisal

Since our 2009 review, UMaine has experienced restructuring as some former campus services have been centralized within the University of Maine System (UMS). Some former UMaine employees are now UMS employees. UMaine still benefits from the work they do, but those employees are no longer counted in UMaine's employee FTE total. Some centralized staff now work in UMS Centers of Excellence, such as labor relations, recruiting and talent acquisition, learning and organizational development, compensation and data analytics, Equal Opportunity, benefits administration, project management, and communications.

UMaine has met or exceeded some targets for recruitment, retention, and advancement of women faculty in STEM fields; fostering changes in workplace policies and campus climates; increasing job satisfaction among women STEM faculty; and serving more than 80% of UMaine faculty through voluntary participation in at least one event sponsored by the Rising Tide Center.

II. Financial resources

Description

UMaine and its financial resources are guided in part by a 2016 Board of Trustees strategic outcomes document:

The University of Maine System is an integrated system of distinct campuses, centers, and other facilities operating in concert to provide high-quality educational undergraduate and graduate opportunities that are accessible, affordable, and relevant to the needs of Maine students, businesses, and communities. It drives economic development by conducting world-class research, commercializing valuable ideas, and partnering successfully with businesses and industries throughout Maine and beyond. It is the state's most engaged and responsive institution working on behalf of all Maine citizens, communities, and institutions. It is Maine's most important public asset.

The BOT approved a Unified Budget Implementation Plan in September 2016. That plan identified five financial areas for (ongoing) collaboration among UMS institutions: a) tuition and fees, b) state allocation model, c) institutional aid/waivers, d) reserves, and e) capital project funding.

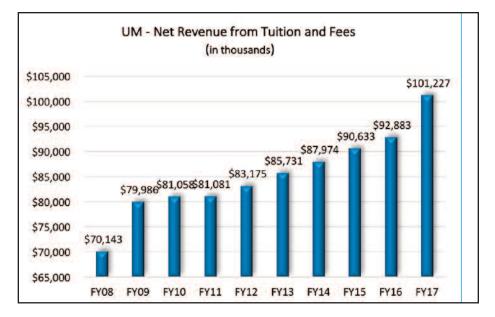

"Unified budget" does not signal the unifying of resources, but rather the alignment of financial policies and procedures across UMS institutions. The goal of the unified budget work is to enhance transparency, ensure appropriate fiscal controls, and make possible comprehensive, Systemwide collaboration. Fiscal administrative functions have been integrated and managed as a single, geographically distributed unit, reducing redundancies and ensuring that every corner of the UMS benefits from expertise and efficiency achieved through true cooperation and scale. UMaine's fiscal policies are linked to a full complement of UMS policies, reports, and procedures. Additionally, UMS has created a Unified Budget Timeline for the fiscal year. The timeline entails enrollment updates, census updates, forecasts presented to the BOT, and budget planning deadlines.

As of fall 2018, the shared Chief Business Officer for UMaine and UMM reports jointly to the UMaine President and to the UMS Vice Chancellor for Finance and Administration. UMaine's Budget Office comprises a Director of Budget and Business Services, a Senior Budget Analyst, and an Accounting Specialist. Each UMaine college and major functional area also has financial staff who report in those areas, and work closely with the Budget Office to prepare the annual budget and other campus-based financial reporting requirements, as needed.

Appraisal

Revenue from tuition and fees

For six years (FY2012 through FY2017), the Board of Trustees held constant the in-state tuition rate of all UMS institutions. Over the past 10 years, net tuition and fee revenue became a higher percentage of overall operating revenues, as indicated in UMaine's audited Statements of Revenues, Expenses, and Changes in Net Assets. At the same time, due to regional and state demographic projections, UMaine increased its recruitment of out-of-state undergraduate degree-seeking students. The fall 2018 first-year class profile was 54% in-state and 46% out-of-state. Despite the decline of in-state students and the period of unchanged tuition, net revenue from tuition and fees has risen significantly as seen in the following graph.

State appropriations

In FY2017, the last year of flat in-state tuition, the noncapital state appropriation was raised to equal the amount that would have been secured through an increase in tuition in that year. (For the purpose of financial statements, state appropriations are considered nonoperating revenues.) It should be noted that noncapital state appropriations include an amount for the Maine Economic Improvement Fund. The state of Maine makes contributions to UMaine through state appropriations. The following tables show adjustments in both noncapital and capital state appropriations that were made during the time period indicated:

	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017
Non-Capital State of Maine Appropriations	100,383	95,695	94,204	95,764	94,923	93,849	94,946	93,139	92,139	97,527
Capital State of Maine Appropriations	2,753	3,715	4,197	2,047	3,037	5,867	1,780	7,770	8,170	3,962

Commitment to instruction, research, and public service

The Finance Survey Summary Page of the most recent IPEDS data submission for the year ending June 30, 2018 shows that the UMaine expends two-thirds of its total resources in support of instruction, research and public service:

		Expense	% of
Core Expenses	Amount	Per FTE	Total
Instruction	94,435,000	9,922	30%
Research	74,790,000	7,858	23%
Public Service	39,922,000	4,194	12%
Acadmic Support	35,952,000	3,777	11%

Student Services	27,182,000	2,856	8%
Other Core Expenses	10,779,000	1,132	3%
Total Core Expenses	316,709,000	33,275	100%

UMaine budget planning

UMaine's leadership team has consistently made budget decisions to control expenses and increase the university's financial health during challenging economic times. Such decisions have enabled UMaine to increase its primary reserve ratio. The primary reserve ratio provides a snapshot of financial strength and flexibility by indicating how long the institution could function using its expendable net position (both unrestricted and restricted, excluding net position restricted for capital investments) without relying on additional net position generated by operations. This ratio is calculated as follows:

Total Expenses

Over the past 10 years, UMaine has maintained a ratio equal to or greater than both the benchmark value and UMS several times. The significant reduction in UMaine's expendable net position pursuant to the implementation of Governmental Accounting Standards Board (GASB) Statement No. 75 resulted in UMaine's FY2017 primary reserve ratio falling below the industry benchmark of .40x for the first time since FY2011. UMaine's FY2018 ratio of 0.31x is slightly improved from the FY2017 restated ratio of .30x and provides the university with just under four months of expense coverage.

70

Adoption of new accounting standards

As required by generally accepted accounting principles, in FY2018 UMS adopted GASB Statement No. 75 (Accounting and Financial Reporting for Postemployment Benefits Other than Pensions) pursuant to its post-employment health plan; UMS and each of its institutions restated their FY2017 financial statements to reflect the retroactive application of the accounting change. The overall impact on UMaine's FY2017 financial statements was a \$41.5 million decrease in the previously reported FY2017 beginning of year expendable net position, and a corresponding increase in noncurrent liabilities as UMaine recognized its share of the funding obligation related to the \$102 million unfunded actuarial accrued liability recorded by UMS as of July 1, 2016. There was no impact on UMaine's previously reported FY2017 revenues and expenses.

As noted above, the unified budget process has developed sufficiently over the past three years to provide a Unified Budget Timeline for UMS. The process not only provides for a set budget development focus, but also includes an emphasis on enrollment projections and student census data gathering, as well as a requirement for three current-year financial forecasts, and a multiyear financial analysis (MYFA) projection for both enrollment and budget needs.

A budget planning team meets regularly across the fiscal year to address current and projected budgetary issues (see also Standard Two). The team comprises the President, the Executive Vice President for Academic Affairs and Provost, the Vice President for Research and Dean of the Graduate School, the Chief Business Officer, and the Chief of Staff. At various times during the academic year, the head of the Finance and Institutional Planning Committee of the Faculty Senate joins the group. At least three times during the year, the committee engages the campus in broad discussions. The community is notified of these meetings and encouraged to attend. The budget team works with the Vice President for Enrollment Management and the Office of Institutional Research and Assessment to refine enrollment and retention numbers.

In 2016, UMaine established a Gift Processing and Advancement Services Agreement with the University of Maine Foundation for processing receipts, acknowledging all gifts to UMaine, and fundraising services. This was accomplished by transferring university personnel who had performed these functions, along with operational budgets, to the Foundation. The arrangement provides one "giving" mechanism and is less cumbersome for potential donors.

Audited financial statements for UMaine as of June 30, 2018 reflect an institution whose financial condition has improved since the last NECHE accreditation review in 2009. At the end of fiscal year 2018, total net position of \$433.1 million exceeded total liabilities of \$132.5 million. Endowment assets held by UMS for UMaine equal \$79.6 million, with \$221 million also held by the University of Maine Foundation, for a total of \$300.6 million.

UMaine's financial health, as published in the Report on Core Financial Ratios and Composite Financial Index, is evaluated through the use of industry benchmarks and ratios. The four ratios UMaine used to develop our Composite Financial Index (CFI) are the Primary Reserve Ratio, the Return on Net Position, the Net Operating Revenues Ratio, and the Viability Ratio.

UMM financial resources and planning

Financial oversight for the UMM campus became the responsibility of the UMaine President and the Chief Business Officer on July 1, 2017 (FY2018).

In FY2018, UMaine was seeking a new President — a nearly year-long process — and UMM was seeking a new Head of Campus. With the new UMM reporting structure in its implementation stage, no major changes involving academic and support programs, enrollment, or finances were made, although UMaine provided substantial assistance to UMM in areas such as budgeting, admissions, and administration of student financial aid.

In the current fiscal year (FY2019), with essential reporting structures secured, emphasis has been placed on safeguarding UMM's financial future through a) increased focus on UMM's academic programs and their relationship to the UMaine campus and its programs; b) reversing UMM's declining enrollment; and c) consolidating nonacademic support programs and positions at UMM to capture efficiencies and corresponding salary savings.

Given enrollment declines, a balanced UMM operating educational and general (E&G) budget is not projected for FY2020. UMaine will direct UMaine reserves as a loan to UMM to be repaid in three years. Anticipated gains related to academic program decisions, and securing a solid enrollment plan for UMM, in addition to strong collaborative efforts and oversight with UMaine, will create a fiscally sound future for UMM.

UMM will receive \$3.051 million of a \$49 million infrastructure bond approved by Maine voters in November 2018. These funds will be used to repair and renovate academic buildings and residence halls.

The FY2018 Core Financial Ratios and Composite Financial Index reports for UMaine and UMM, which contain data from prior years, can be found in the electronic workroom.

III. Information, physical, and technological resources

Description

Information technology

Information Technologies (US:IT) is a UMS central service providing technology-based services and support for UMaine and UMM faculty, staff, and students. As UMaine's central technology support agency, US:IT partners with a UMaine IT Strategic Council (ITSC) comprising faculty, staff, administrators, and US:IT personnel. US:IT works with its UMaine and UMaine campus partners to develop sound policy for the management of technology; address the needs of academic, administrative, and research users of technology; and provide ongoing planning for technology to meet the changing needs of the two campuses.

US:IT supports strategic planning, operations and provision of collaborative leadership at the campus IT level to set priorities; oversee initiation and implementation of technology projects; and support academic, research, and administrative operations. US:IT also provides an array of services, infrastructure, and expertise to the Maine School and Library Network, Maine Department of Education, and Maine state government.

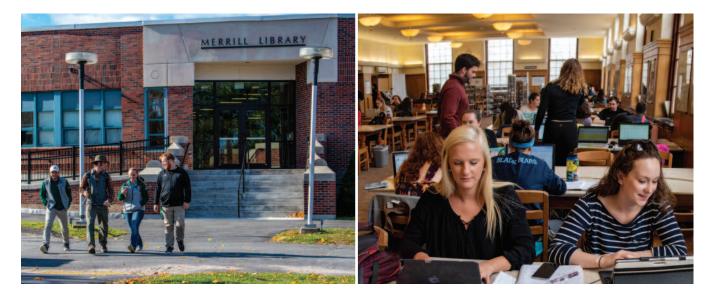

UMaine and UMM library resources

UMaine's Raymond H. Fogler Library and UMM's Merrill Library support UMaine and UMM academic and research programs by providing efficient and effective access to the information and library resources needed to meet teaching, research, and public service goals. Fogler Library is the state of Maine's official Science, Technology, and Business library, the Tri-State Regional Depository for federal documents, and a Patent and Trademark Resource Center.

Fogler Library is a comprehensive central library; there are no officially supported departmental libraries on campus. Fogler Library also manages the Darling Marine Center library in Walpole, Maine. Fogler Library is led by its Dean, who reports to the Executive Vice President for Academic Affairs and Provost, and is managed through department heads in Circulation, Collection Services, Regional Federal Documents and Interlibrary Loan, Reference and Information Literacy, Special Collections, Financial, Public Relations, and Technical Services. Merrill Library reports to the Head of Campus and is managed through the library director. Fogler Library partners with US:IT to support computing infrastructure and help desk functions. Fogler also partners with the Writing Center and the Tutor Program by providing space for those units to meet their students. It also provides space for the Office of Major Scholarships (see also Standard Five).

Fogler Library and Merrill Library develop and maintain collections in appropriate formats to support their respective campuses' academic programs and research. Fogler is the largest library in Maine with approximately 1.2 million volumes, 2.4 million government publications, 1.67 million microforms, more than 379 online databases, 3,430 journal subscriptions, 850,047 e-books, and access to more than 117,000 e-serials. The libraries participate in resource sharing with other UMS libraries and with Maine State Library. This has increased the ability to offer databases to users that would otherwise be unaffordable. The collection of databases provided by state funding is available to the university community.

Fogler and Merrill libraries are in a consortium that includes the other UMS libraries, Bangor Public Library, the Maine State Library, and the Maine State Law and Legislative Research Library. Fogler Library helps support, and is a member of, Maine InfoNet Board,

which manages the integrated library systems for many of the libraries in the state. Fogler Library also participates in the Larger Libraries Group, which includes the University of Southern Maine, Portland Public Library, Bangor Public Library, the University of New England, the Maine State Library, Bates College, Bowdoin College, and Colby College.

Fogler Library provides a welcoming physical environment conducive to individual and group study. It is open 102.5 hours per week during the academic year, and during finals weeks closes at 2:30 a.m. Merrill Library is open 79 hours per week during the semester, with additional hours during finals. Fogler has more than 1,180 seats available, from group seating to individual carrels. Library staff continually assesses and upgrades the seating and various environments in the library to provide for both individual and group study. Each year, there are changes in seating or stack arrangements to make the building as welcoming as possible.

The electronic environment provides 24/7 access to course and subject guides, and e-resources. Equipment such as digital cameras and recorders are available for loan, as are about 30 laptop computers. Reference staff are available during most building hours by chat, email, text, or in person. Merrill Library also loans similar equipment, and a librarian is available to answer reference questions in a variety of formats during all open hours. Fogler Library is also home to a Media Lab where students can access software such as Adobe Design Premium CS5, Microsoft Office, Microsoft Expression, Sound Forge Audio Studio 10.0 (digital audio recording/editing software), Adobe LiveCycle ES2, Adobe Design Premium CS5, EPSON Scan, Adobe Premiere Pro CS4 (video editing software), ABBYY PDF Transformer 1.0, among others.

Fogler Library employs 52 staff, including 18 professional librarians, four non-MLS professionals, and 30 library support staff. Students are employed in all of the library departments. One part-time support staff member works at the Darling Marine Center. The non-MLS professionals are an archivist, a financial manager, a public relations manager, and a circulation manager. There has been a decrease in the number of library staff since 2009 due, in part, to a reorganization that removed two staff from the library and in part to internal reorganizations.

Both Fogler and Merrill libraries work to support distance education by providing online access to resources, course, and subject guides. Fogler also works to support distance education by providing online access to resources, course and subject guides, and chat and text communication with librarians. Merrill Library also supports all academic programs and develops and maintains collections in appropriate formats for undergraduates. The most recent information literacy reports for Fogler Library and Merrill Library can be found in the electronic workroom.

UMaine physical assets and infrastructure

UMaine consists of a primary campus in Orono, as well as six farms, two research facilities and 13 leased facilities throughout the state. UMaine as a whole encompasses 368 buildings totaling 4,848,674 gross square feet. The 211 buildings located on the primary campus include 4,420,580 gross square feet, or 91.2% of UMaine's total square footage. UMaine's asset portfolio is valued at \$890,593,024 with the primary (Orono) campus making up 92.0% of the total value or \$719,345,582. Contents are valued at \$290,793,834 in total with \$279,452,874 or 96.1% of the value found in the primary campus buildings. UMaine provides all necessary support services (e.g. utilities, infrastructure, IT and operational services), for approximately 1,173 research labs and support spaces consisting of approximately 547,237 square feet. Support for the operation of UMaine campus is provided by Facilities Management following industry best practices and all regulatory requirements.

The Office of Sustainability supports UMaine constituents in efforts to reduce the institution's environmental footprint. UMaine strives to ensure that all new construction on the campus is built to the equivalent of LEED Silver standards or higher. We currently have five LEED Certified buildings on campus. The Facilities Management custodial department uses over

60% green-certified products. Since 2007, UMaine has diverted 48% of campus waste from landfills and has reduced water use by 20%. All campus grounds are managed organically using compost generated on-site from Dining Services kitchen waste, and over 20% of Dining Services food purchases are locally sourced.

UMM physical assets and infrastructure

The University of Maine Machias (UMM) consists of a primary campus in Machias, comprising 10 buildings totaling approximately 266,000 gross square feet located on a footprint of 243.9 acres. UMM's building asset portfolio is valued at \$71,086,101. Support for the operation of the Machias campus is provided by Facilities Management following industry best practices and all regulatory requirements.

Appraisal

In 2015, a State of IT report presented to the BOT outlined several capital investment projects designed to enhance IT infrastructure, delivery systems, and improved services in support of the One University initiative. The Board of Trustees fully endorsed the initiatives presented and authorized \$20 million in bond investments to support modernization of classroom technology, rebuilding wireless infrastructure, and improvements in MaineStreet. UMaine received \$3.3 million to upgrade wireless infrastructure in 34 buildings. The 2012 UMaine IT Strategic Plan included establishing a campus IT governance structure and establishing residence hall wireless service. Both objectives were met.

Fogler Library and Merrill Library direct their resources to support the educational mission, research, and service programs of UMaine and UMM. Fogler's acquisition budget is more than \$6 million per year. Merrill Library's acquisition budget and collections are much smaller, but are adequate for an undergraduate library that serves, supports, and extends the curriculum of a small liberal arts university. In response to the needs of their respective users, each library works to make most of its collections available 24/7, as outlined above. Fogler's operating budget of more than \$3 million per year supports the staff, furnishings, and equipment for the needs of the university community. Both libraries have input on the budget process to ensure appropriate funding to support collection acquisitions and appropriate staffing to advance the educational objectives of the campuses.

UMaine has taken important steps to improve the quality of buildings across campus within budget constraints. Pathway 5 (Restoring the Dream: Renewing Pride and Stewardship of Place) of the university's 2012–17 Blue Sky strategic plan identified a central goal of restoring and sustaining UMaine's physical and technology infrastructure to ensure a vibrant place of learning and discovery. In 2012, UMaine partnered with Sightlines LLC to perform an integrated facilities plan (IFP) for the Orono campus. The IFP created a comprehensive facilities condition assessment and identification of campus building needs, and the assignment of preliminary budgetary values for renewal costs. The completed IFP includes 80% of the total campus square footage of both Education and General (E&G) facilities and Auxiliary facilities on campus.

In early 2013, UMaine also partnered with Sightlines to perform a classroom assessment study. The study complemented the campus IFP study and provided an additional layer of detail focused on the technology and indoor environmental quality needs of campus classrooms.

In 2014, UMaine created a comprehensive Space Planning and Management Policy to ensure best space management practices, and to support a UMS initiative to reduce square footage and increase space use rates and net asset values. (The policy is now out of date in some areas; it will be revised in summer 2019 by the Senior Associate Provost and Facilities Management staff.) Also in 2014, UMaine engaged Malcolm L. Collins, AIA, NCARB, LEED AP (Maine Licensed Architect and Historical Architect), to renew the campus Tier 1 Historic District Restoration Plan by creating design guidelines for each Tier 1 building. The guidelines incorporate prospective general uses for space in buildings, and inventory the optimum purpose and use of each building.

Projection

Human Resources

UMaine's and UMM's next strategic plan, as emerging from the current Strategic Vision work being led by President Ferrini-Mundy and Provost Hecker, will shape HR initiatives and areas of emphasis over the next several years. The strategic areas now under discussion — Fostering Learner Success, Creating and Innovating for Maine and Beyond, and Growing and Stewarding Partnerships — will demand new human resources to ensure success of the initiatives. UMaine and UMM will continue to partner with UMS leaders on an HR model that best serves the needs of our students, faculty and staff.

Financial resources

Though well-positioned financially as we move forward, UMaine is mindful that we must continue to develop and refine face-to-face and online academic programs attracting qualified undergraduate and graduate students, including adult and nontraditional learners. With continued decline in the numbers of state and regional high school graduates, outreach to out-of-state and international students is also increasingly important.

Net tuition and fees continue to be UMaine's primary revenue driver. As noted above, the new methodology applied to the allocation of new state appropriation funding should not result in UMaine losing ground in its share of that appropriation. As short-term and long-term budget planning continues through the collaborative work of Budget and Business Services, the Chief Business Officer, the Provost, the President, the BOT, and campus constituents, decisions will continue to be made collaboratively at UMaine and across UMS to realign resources in support of campus and Board of Trustees priorities.

NECHE has asked us to address our progress on meeting the goals of the "Primary Partnership," and ensuring UMM's financial stability. UMaine now supports UMM enrollment management functions, including recruitment and marketing; web content and management; and all facets of student financial aid. Academic collaborations, including those projected to meet local or statewide workforce needs (e.g. engineering, nursing education) are at various stages of development. In addition, UMaine Provost Hecker and UMM Head of Campus Egan have agreed in principle to a dual reporting line for UMM's Student Records officer (Associate Registrar). We expect that the Associate Registrar will report jointly to the Head of Campus and to UMaine's Registrar by May 2019, in a reporting structure governed by an MOU. This alignment will bring additional records management resources and course-scheduling resources to UMM and its students.

UMM Head of Campus Egan is working with President Ferrini-Mundy and the UMaine budget team on a plan for fiscal stability and accountability. The plan will entail UMM identifying a path to independent fiscal health through a combination of undergraduate (domestic and international) enrollment growth, online enrollment growth, targeted research and programmatic partnerships with UMaine and other research institutions, participation in collaborative (multicampus) degree programs, and related measures. The plan will be completed in spring 2019 and implemented beginning with the new fiscal year (July 1, 2019).

Informational, physical, and technological resources

Work is underway on a comprehensive strategic planning process for US:IT. It is expected that the plan will provide a three- to five-year road map aimed at enhancing the technology and information support services the division provides to UMaine and UMM, along with other UMS campuses. In 2019, a significant focus of US:IT is the upgrade of our PeopleSoft Campus Solutions system from version 9.0 to 9.2. Testing will take place throughout spring 2019, with an anticipated launch in June. The upgrade will improve accessibility, attractiveness, and some functional elements.

Debt to Net Assets Ratio Long-tem Debt / Total Net Assets	16.0%	16.7%	14.9%	13.2%	11.4%
Debt to Assets Ratio Long-term Debt / Total Assets	13.2%	12.5%	11.4%	10.3%	9.1%

Debt Covenants: (1) Describe interest rate, schedule, and structure of payments; and (2) indicate whether the debt covenants are being met. If not being met, describe the specific covenant violation (i.e., requirement of the lender vs. actual achieved by the institution). Also, indicate whether a waiver has been secured from the lender and/or if covenants were modified. Debt is comprised of a few small capital leases, tax-exempt bonds payable, and a loan from the University of Maine Foundation. The University of Maine is part of the UMS which is the legal entity that issues the tax-exempt bonds. The UMS' bond rating from S&P Global Ratings (formerly Standard and Poor's) was AA-/Negative, AA-/Stable, and AA-/Stable for the respective fiscal years FY16, FY17, and FY18. In August 2018, S&P Global Ratings again rated the UMS as AA-/Stable.

Line(s) of Credit: List the institutions line(s) of credit and their uses.

The University of Maine and the other universities within the University of Maine System have access to a \$10 million master lease-purchase agreement between Bank of America Capital Corp and the University of Maine System. The University of Maine is utilizing this agreement to strategically replace its aging fleet of vehicles.

Future borrowing plans (please describe).

The University of Maine will incur additional unrestricted debt service (\$500K/year) as it constructs the new Engineering Education Design Center scheduled to be completed in the Fall of 2022. There are also beginning discussions regarding the construction of an energy center which would include the creation of a new a biomass-fueled Combined Heat and Power plant. The University is reviewing a number of funding options, including the University's own bond capacity, to pay for the improvements.

Line 19 above for deferred revenue & refundable advances, includes deferred inflows of \$171 and \$152 for FY2017 and FY2018, respectively. Line 30, unrestricted institutional net assets, for FY17 has been restated for the impact of adopting GASB 75, "Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions" (GASB 75), which reduced this line by \$1,434. Line 26-other long-term liabilities of \$1,434 for FY2017 and FY2018, represents a funding obligation to the System Office of the University of Maine System for the University of Maine's share of the impact of implementing GASB 75.

Current Portion	\$330	\$466	\$456	\$440	\$430
Bond Rating	See below	See below	See below	See below	See below
Debt Service Coverage Operating Income / (Annual Interest + Current Portion of Debt)	-0.29	0.24	-0.10	-0.12	-0.07
Debt to Net Assets Ratio Long-tem Debt / Total Net Assets	39.0%	45.5%	42.2%	38.6%	34.5%
Debt to Assets Ratio Long-term Debt / Total Assets	26.6%	27.4%	25.8%	23.8%	21.3%

Debt Covenants: (1) Describe interest rate, schedule, and structure of payments; and (2) indicate whether the debt covenants are being met. If not being met, describe the specific covenant violation (i.e., requirement of the lender vs. actual achieved by the institution). Also, indicate whether a waiver has been secured from the lender and/or if covenants were modified. Debt is comprised of a few small capital leases, tax-exempt bonds payable, and a loan from the System Office of the University of Maine System (UMS). The University of Maine at Machias is part of the UMS which is the legal entity that issues the tax-exempt bonds. The UMS' bond rating from S&P Global Ratings (formerly Standard and Poor's) was AA-/Negative, AA-/Stable, and AA-/Stable for the

respective fiscal years FY16, FY17, and FY18. In August 2018, S&P Global Ratings again rated the UMS as AA-/Stable.

Line(s) of Credit: List the institutions line(s) of credit and their uses.

The University of Maine at Machias and the other universities within the University of Maine System have access to a \$10 million master lease-purchase agreement between Bank of America Capital Corp and the University of Maine System. The University of Maine at Machias is utilizing this agreement to strategically replace some of its aging vehicles.

Future borrowing plans (please describe).

Standard Eight:

Educational Effectiveness

Description

UMaine shares measures of student learning and the student experience to celebrate success, identify gaps, and, above all, improve learning outcomes for our students. Multiple offices share responsibility for the collection and distribution of data on student outcomes and success, including the Office of Institutional Research and Assessment (OIRA), Enrollment Management, and the Office of Student Financial Aid. At UMM, assessment is a joint responsibility with faculty under the leadership of the Head of Campus. Collaboration between UMM and offices and academic units at UMaine has increased since UMM became a regional campus of UMaine; we expect this to be true of assessment-related work also, particularly as academic collaborations also increase.

Assessment of student learning at UMaine

The assessment of student learning was identified as an area of focus in the Commission's response to UMaine's 2009 self-study. Specifically, the Commission noted: "Learning outcomes assessment needs to be emphasized among other aspects of planning and evaluation and a more robust toolkit of student success criteria needs to be developed. In a context of a decision not to use the Voluntary System of Accountability, UMaine needs a plan for how to communicate student learning successes for public accountability." That response also noted: "The General Education Program may not be meeting institutional needs. Assessment of this program is less well developed than assessment of the undergraduate curriculum in general."

UMaine has directly addressed these concerns. First, we incorporated them in Pathway Four of our Blue Sky Strategic Plan, prioritizing campuswide programmatic assessment founded on a cycle of review. Second and relatedly, we grew institutional capacity by forming an Assessment Advisory Board in 2014, and by advancing strategic assessment initiatives (e.g. the Provost's Forum on Foundational Competencies in 2014; participating in the Multi-State Collaborative to Advance Quality Student Learning since 2015). These commitments drew faculty from each college into assessment work, trainings, and discussions, and gave rise to an environment in which assessment is discussed substantively and taken seriously.

Crucially, we have achieved our Pathway Four goal of implementing a system of assessment for individual programs. We have also established a system for assessing our General Education curriculum (see the University Assessment Plan of 2014, and the Faculty Motion on the Assessment of General Education in 2017). Related initiatives include identifying software for tracking and housing program and General Education assessment data, and an expansion of assessment activity to include the Graduate School. Since 2014 in particular, the combination of assessment staffing, programming, oversight, faculty training and buy-in, and implementation has produced an active and growing culture of effective assessment at UMaine.

With support from the Office of Institutional Research and Assessment, assessment plans campuswide have been written or revised to articulate student learning outcomes and to identify, collect, and evaluate artifactual evidence of student learning. Initial work on program assessment used a reporting template patterned on the E1a and E1b reporting forms, enhanced by embedding additional information about the process used for assessment and the impacts observed. Used by a majority of programs, the template asks units to report learning outcomes, data (evidence), how the data/evidence was collected and by whom, and what changes and impacts have been made. Additionally, we have begun collection of information required for the E1b series for disclosure on the OIRA website.

Assessment of student learning at UMM

At UMM, learning outcomes for every program are approved by program faculty. Ten academic program areas have developed a process for assessing student learning outcomes. The individualized Bachelor of College Studies and B.A in Interdisciplinary Studies feature student plans approved such that the courses a student takes match the individualized learning outcomes. Assessment of learning outcomes in UMM's academic programs is reported annually.

The depth, effectiveness, and continuity of UMM assessment activity varies across programs. Annual reports on assessment emphasize the ways each program is collecting and compiling assessment data to inform the curriculum, teaching, and other program elements. The report includes a summary of next steps for a program's approach to assessment, and its plan for fulfilling them.

Student retention, time-to-degree, and graduation

UMaine's approach to improving student retention, graduation, and time-to-degree are central features of the 2014 Provost's Action Plan for Retention and Graduation and the Think 30 initiative (see also Standard Two). To assess progress on these initiatives, UMaine tracks retention and graduation rates at the institution and program level, and assesses the credit hour progress of student cohorts. UMaine also participates in the Student Achievement Measure Project (SAM), which collects retention and graduation rate information on first-time, full-time, transfer, and part-time students.

Appraisal

Program assessment

The UMaine Faculty Senate mission statement reads: "Our education goal is to help students develop their creative abilities, communication and critical thinking skills, and understanding of traditions in ethics and rationality within the arts, sciences, and professions." To these ends, as noted above, UMaine has implemented several structures to support the assessment of student learning. For example, the Assessment Advisory Board meets regularly to provide guidance on the university's assessment plan, requirements for program assessment reporting, and the design of the General Education assessment program. Input from faculty and administrators comprising the Board guides the formulation of program and General Education assessment, and helps to ensure that units collect and use actionable data as part of a campuswide culture of assessment.

Examples of assessment plans are available in the program assessment reports document library and in two examples of "recommendations and next steps" from assessment reports below.

Every year, the undergraduate committee looks at the outcome assessments for HTY 498 and discusses at length what is working and what is not. In order to improve assessment scores, i.e. improve the ability of our majors to write, discuss, revise and organize and produce a major paper, it was suggested [that we] implement two new required courses which will teach them essential skills earlier in their college career. HTY 130 is a required course which was first offered in spring 2016. HTY 311 became a requirement in fall 2015. Both courses employ self-assessments. The undergraduate committee looks annually at the results. The dataset for these courses is still too small to determine the impact of these changes. We plan on collecting data for two years and then implementing a rubric similar to the one we currently use to assess our students after taking HTY 498. (Department of History)

Students are meeting the benchmarks across all the competencies. However, we have been working to increase student outcomes for several competencies: Engage in research informed practice/practice informed research (currently 80% of students meet the benchmark) and Practice evaluation (currently 75% of students meet the benchmark). Research and evaluation are usually the most difficult areas of the curriculum for MSW students. Our research faculty continue to work on curriculum changes. This is an ongoing process. It will also be helpful when our full-time research faculty are up to full strength (we lost one assistant professor but have a new assistant professor starting in Sept. 2017). In the meantime, many of the research sections are taught by part-time faculty. (School of Social Work)

UMaine communicates the results of its assessment process through several coordinated avenues. First, Deans and Associate Deans are provided a quarterly update on the status of programs in their unit through a comprehensive Program Assessment Dashboard. The dashboard shows the state of completion of each program, with ratings for the inclusion of measurable learning objectives, a stated plan for implementation, reporting of current assessment results, and a plan for how results will be used. Administrators can review the status of units and identify any gaps. Second, copies of three-year program reports and feedback are also shared with Deans and Associate Deans. Finally, programs are encouraged to share their plans on their departmental websites. All program assessment plans are also posted on the Office Institutional Research and Assessment website.

Programs are encouraged to examine post-graduation outcomes, such as job placement patterns through graduate (and employer) surveys. For example, the School of Forest Resources has conducted focus groups with top employers of their graduates. These sessions yielded data about the most effective program elements, as well as gaps requiring attention. Similarly, Education and Human Development regularly assesses the effectiveness of its graduates through surveys of Maine principals and superintendents. The college's Director of Field Experience uses data from the surveys to inform future student placements for Teacher Candidacy.

UMaine has implemented assessment management in cooperation with TaskStream/TK20. Two systems have been developed. The first, Learning Achievement Tools, is used by some units (e.g. Education and Human Development) to manage portfolio assessment data. The second, Assessment Management System, is a campuswide solution housing program and General Education assessment data. UMaine is inviting vendor presentations in spring 2019 as move to adopt a single system for campuswide assessment data needs. This system and its resources will be shared with UMM.

UMaine General Education

The Undergraduate Program Curriculum Committee reviews all proposals for new and revised courses. The committee has specific requirements for the design of General Education courses that ensure these courses a) are adequately aligned to the General Education area and b) include substantial assessment of student learning outcomes related to that area.

Prior to fall 2016, UMaine had no agreed-upon mechanism for evaluating General Education outcomes, although other processes (e.g. accreditation review) did prompt evaluation and revision of certain courses. To close this gap, a General Education subcommittee of Faculty Senate's Academic Affairs Committee developed a method of assessing General Education course alignment and student outcomes entailing a cycle of review using customized versions of the AAC&U VALUE Rubrics developed by faculty working groups, and used to examine samples of student work taken from regularly offered General Education courses.

The process uses a sampling approach in which 25 General Education courses with specific learning outcomes are randomly sampled each semester. Student assignments from these courses are randomly selected and de-identified, and the assignments are distributed to faculty scorers, who attend a half-day scoring and professional development training session.

During the session, faculty discuss the General Education outcome and score the samples. Each year, the General Education Subcommittee of the Faculty Senate will review the results from the group scoring session to identify areas of strength, and need in student achievement to determine the extent to which assignments and courses are aligned with the stated goals of a given General Education area, and make recommendations to faculty teaching courses in that area. As of spring 2019, one General Education outcome (Western Cultural Tradition) has been evaluated; data will be reported by May 2019. The remaining eight areas are to be assessed over the next four years.

UMM General Education

We have partial evidence of UMM curricula's effectiveness at facilitating student achievement of learning outcomes. However, UMM's assessment culture has been growing. UMM's General Education curriculum has a defined set of learning outcomes, crafted by faculty before the 2010 revision of the core curriculum. Using a faculty-approved rubric, a subset of General Education learning outcomes is assessed through a required final project in Environmental Liberal Arts 342, a course analogous to a capstone. Prior to teaching the course, all ELA 342 instructors participate in a workshop to normalize use of the rubric. As instructors grade final projects, they also assess them using the rubric, and submit the results to UMM's Program Review and Evaluation Committee. Results are compiled and periodically reviewed as UMM evaluates student performance in a subset of learning outcomes. This rubric-based assessment was tested for the first time in May 2014, and data have been collected in most semesters since.

In addition to quantitative data, UMM has collected qualitative survey data. In fall 2016, a survey on the Environmental Liberal Arts section of the curriculum was sent to all junior and senior students. Responses showed mixed opinions about the curriculum. Similarly, in spring 2018, faculty were surveyed about their perceptions of the General Education curriculum. These data will be used as the General Education curriculum is reviewed over the next two years by faculty with input from the Head of Campus.

Evaluation of co-curricular learning

UMaine also assesses student attainment of co-curricular learning outcomes, including formal and informal learning experiences, internships, digital badges, and first-year student experiences. For example, UMaine's Engaged Black Bear digital badging initiative offers students a set of "learning pathways" entailing three levels of badges and corresponding learning objectives, including recognizing and verifying student engagement experiences on campus, at work, and in the community; providing evidence of 21st century skill development; giving students a competitive edge when seeking internships, employment, graduate school, and other workforce development opportunities; guiding students in becoming leaders, prepared employees, active citizens, and lifelong learners; and increasing college access and student success by building a pipeline to UMaine.

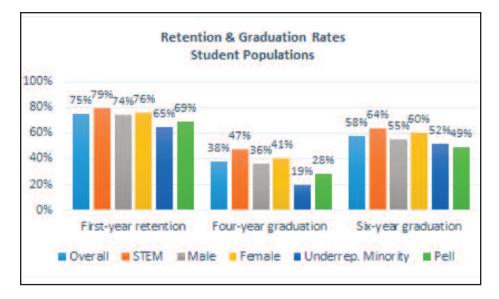

UMM's student programming group, the Student Activities Involvement and Leadership (SAIL), provides opportunities for students to engage in the college experience in a way that promotes leadership development and strengthens retention. The organization has several stated learning outcomes. The assessment of outcomes to date has been informal.

Retention and graduation

As seen in the table below, UMaine's first-year retention rates have ranged from 75% to 81%, four-year graduation rates from 33% to 40%, and six-year graduation rates from 55% to 60%.

Cohort	Cohort Size	First-year retention rate	4-year graduation rate	5-year graduation rate	6-year graduation rate
Fall 17	2,254	78%			
Fall 16	2,192	75%			
Fall 15	2,012	76%			
Fall 14	2,021	76%	40%		
Fall 13	2,120	77%	38%	54%	
Fall 12	1,919	81%	40%	57%	60%
Fall 11	1,735	76%	38%	55%	58%
Fall 10	1,717	78%	36%	55%	59%
Fall 09	1,654	79%	33%	52%	55%
Fall 08	1,936	79%	37%	56%	60%
Fall 07	1,817	76%	36%	51%	56%

OIRA also tracks the success of targeted populations, such as PELL recipients, STEM majors, minority status students, and out-of-state students. The figure below shows the most recent retention and graduation rates for these populations. UMaine also monitors the percentage of students who go on to graduate at other institutions: 70% of our 2012 first-time full-time cohort graduated from UMaine or another institution within six years, and 72% of our transfer, full-time students did so.

At the graduate level, the first- to second-year retention rate for the most recent three cohorts ranged from 84% to 86% for master's students and 91% to 95% for doctoral students. Average time to degree for master's students who graduated in 2014–2015 through 2017–2018 was 2.6 years; for doctoral students it was 5.4 years.

At UMM, the Head of Campus annually provides each program a profile of official headcount, retention, number of degrees, graduate responses, and faculty information. The data are split between on-campus and distance students for the programs delivered through both modalities. This allows for programs to set and monitor retention rates and track the number of students in the program.

More recently, UMM implemented EAB Student Success Collaborative software. The software allows programs to use data on student success rates, such as overall retention rates and success rates of courses, to identify bottlenecks or barriers to success. For example, the Biology program recently changed the prerequisite of the second-semester course (BIO 118 or 119) to a course grade of C or higher in its first-semester course (BIO 117). This change was made when data showed that no student had graduated from the Biology program in the past 10 years after earning a grade lower than a C in BIO 117.

Think 30

UMaine's Think 30 results are encouraging. The table below shows the credit-taking behavior of first-time full-time students who a) attempted credits in both fall and spring of their first year, and b) returned the following fall (the most relevant group for assessing the impact of Think 30). Following the introduction of Think 30, the percentage of returning first-time, full-time students who earned 15 or more credits in their fall semester increased 15 percentage points, from 52% for the fall 2014 cohort to 67% for the fall 2017 cohort.

An even larger increase was seen in spring semester: a 22-point increase from 58% to 80%. The percentage who had attempted 30 or more credits by the beginning of their second year increased from 66% to 82%. Notable gains were also seen in the percentage of students earning 30 or more credits across the calendar year. By the beginning of the second year, the percentage of returning first-time, full-time students who had earned 30 or more credits during their first year increased 12 percentage points, from 50% for the fall 2014 cohort to 62% for the fall 2017 cohort. With prior credits accounted for (e.g. AP credit, summer credits preceding the first fall semester), 74% of the returning 2017 cohort had earned 30 or more credits by the beginning of the second year, 9 percentage points higher than that of the fall 2014 cohort.

Cohort	Cohort size	% attempted 30+ credits first year	% attempted winter courses	% attempted summer courses	% earned 15+ credits first fall	% earned 30+ credits first year ^a	% earned 30+ credits by beginning of second yr. (inclusive) ^b
2014	1,528	66%	—	17%	52%	50%	65%
2015	1,510	68%	7%	19%	53%	51%	68%
2016	1,614	79%	7%	18%	63%	60%	71%
2017	1,745	82%	9%	17%	67%	62%	74%

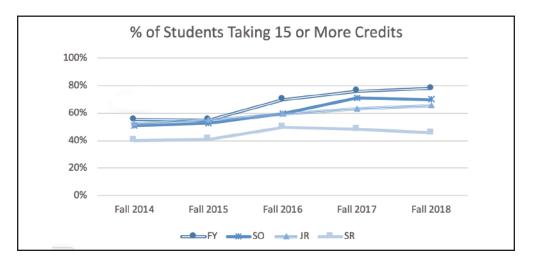

Credits attempted and earned: Returning first-time, full-time students

Note:

^aCredits earned in fall, spring, or the subsequent summer; excludes credits earned in the preceding summer, and test or transfer credits earned in high school.

^bCredits earned by beginning of second year, including those earned in the preceding summer, and test or transfer credits earned in high school.

Think 30 has had a tangible impact on credit-taking behavior at all undergraduate levels. The figure below shows the percentage of all degree-seeking undergraduates taking 15 or more credits, broken down by class level. There has been consistent growth at all levels, though particularly for first-years and sophomores, which have shown increases of 23% and 19%, respectively.

First-year student success courses

All academic colleges at both campuses now provide a first-year seminar to orient students to their field of study, to UMaine, and to college life. For example, beginning in fall 2015, Liberal Arts and Sciences (CLAS) offered LAS 150 (Success in College), a first-year seminar course for CLAS students whose major does not already offer a required first-year seminar. LAS 150 is a one-credit course taught once a week for 50 minutes. Instructors include advisors in the CLAS Advising and Student Services Center, and professional staff who have a student affairs and/or student services background. At UMM, all programs have a first-year seminar embedded in the program.

Post-graduation data

The Life After UMaine Survey provides useful insights into the activity of our graduates. Seventy-seven percent of respondents to the 2014-2015 Life After UMaine survey reported full-time employment. The majority of employed respondents indicated they were very well (42%) or moderately well (49%) prepared for their job. Those attending graduate school indicated even higher levels of preparation, with half (50%) reporting they were very well or moderately well (38.2%) prepared. There were substantial differences by college in the proportion of students attending graduate school. While just 5% of Engineering graduates went on to graduate study, nearly 31% of Natural Science, Forestry, and Agriculture (NSFA) students finding full-time employment after graduation. For example, students in NSFA were least likely to be employed full time (68%), but the most likely to attend graduate school (31%). Engineers (90%) and Business graduates (91%) were most likely to be employed and least likely to attend graduate school full time (5% and 7%, respectively). Overall, very few graduates (4%) were unemployed.

Evaluation of student success

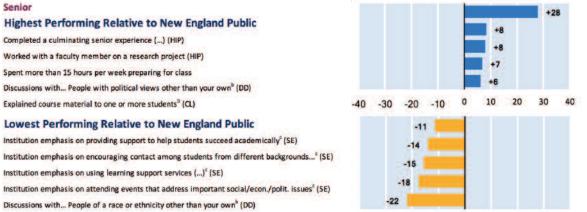

UMaine uses a wide range of direct and indirect measures of student success that informs academic planning and student supports. In addition to direct measures of student learning conducted as part of program and General Education assessment, the university gathers attitudinal data (e.g. climate surveys, the American College Health Survey).

UMaine and UMM also examine indirect measures of student success and engagement, such as the National Survey of Student Engagement (NSSE). In the most recent NSSE administration (2017), student responses at UMaine indicated strong experiences with the senior capstone and interaction with faculty on undergraduate research, but deficits remain in students' opportunities to interact with persons of a different race or ethnicity.

Responding students rate the university's emphasis on hosting events related to important social, economic, and political issues lower than do students attending other New England Public institutions. UMaine's highest and lowest ratings by seniors relative to other New England public institutions are shown in the figure below. UMM's highest-rated areas are quality of interactions with faculty and number of High Impact Practices. Results of survey instruments like NSSE are typically shared with campus staff and offices with responsibility for student success, and with the broader campus community, to inform planning, goal setting, and resource allocation.

National Survey of Student Engagement (NSSE) Student Responses

Using assessment data to improve student learning

As noted above, the majority of UMaine programs have assessment plans in place. We continue to promote expanded use of assessment data to improve programs. Two units have done this exceptionally well: the Maine Business School and the School of Marine Sciences. The Maine Business School collected assessment data over a two-year period and used it to drive program changes, such as providing more practice for creative problemsolving, and spending more time addressing global perspectives on business-related issues. The School of Marine Sciences has spent the last two years collecting data, and faculty are discussing potential curriculum changes to improve student learning outcomes. Marine Sciences has also worked closely with its college (Natural Sciences, Forestry, and Agriculture); the Center for Innovation in Teaching and Learning; US:IT and Facilities Management: and Academic Affairs, to improve classrooms integral to the unit's curriculum, course delivery (including online and videoconference), and statewide outreach.

Projection

Program and General Education assessment

UMaine has made significant progress in implementing program assessment. Markers of success include plan completion and use of assessment data to refine curriculum, course sequences, and learning outcomes to match the needs of students in post-graduation settings. In UMaine's cycle of program review, the following units, among others, are on track to use their assessment processes to inform curricula and improve student learning outcomes: the Bachelor of University Studies, Communication and Journalism, Sociology, Psychology, English, Computer Science, Art, and Biology.

As noted above, UMaine efforts for General Education assessment are ongoing. The faculty-led creation of a multi-year plan for the category-by-category review of General Education learning outcomes was a critical first step; it was followed by the Faculty Senate's support of a May 2018 faculty-led examination of the first category under review. UMaine General Education work remaining includes refinement of the assessment process; review of current General Education course offerings; analysis of the types of learning activities associated with these courses; and, as guided by our faculty, a comprehensive review of the design of the General Education program itself. Data from our 2018 General Education pilot assessment are being analyzed and will be reported in spring 2019.

Student retention, time-to-degree, and graduation

UMaine's efforts to increase the number of credit hours taken by students per calendar year, thereby reducing time-to-degree and total debt, are succeeding. As noted above, the Think 30 campaign, operationalized in part by Winter Session and Summer University credit-taking, has increased the number of students earning 15 credits per semester and 30 credits per year. We believe this activity will result in improved graduation rates, and more students graduating on time. Given these outcomes, continuing our efforts will be critical in supporting student success. Similarly, increased investments in college-based advising appear to be having a positive effect. It will be critical to collect ongoing data on the kinds of advising/learning supports students use to understand the continuing impact of those strategies.

Finally, as described in Standard Two and earlier in this standard, UMaine launched a broad-scale First-Year Student Success Initiative in fall 2018. Improved retention among first-year students will be a main indicator of success as the initiative is assessed. Our goal is to increase first- to second-year retention by 5% over the next three to five years, and sustain that improvement.

Distance ed retention rates: Percentage of matriculated students taking all distance courses one fall who are enrolled the following fall. 2 Distance ed graduation rates: Percentage of students in online bachelor's degree programs taking all distance courses one or more semesters during the year, who complete degrees during the same year.

Standard Nine:

Integrity, Transparency and Public Disclosure

I. Integrity

Description

UMaine and UMM continuously monitor and uphold standards of honesty, integrity, and ethics in our dealings with internal and external stakeholders. Both campuses have accepted the Statement of Governance of Colleges and Universities, Statement of Professional Ethics, and Statement of Principles on Academic Freedom published by the American Association of University Professors (AAUP). Elements of the last document are found in the collective bargaining agreement between UMS and the Associated Faculties of the Universities of Maine (AFUM). UMaine and UMM are open and transparent in our communications with NECHE in complying with the Commission's standards, policies, requirements of affiliation, and requests.

Rights and responsibilities, and policies pursuant to student conduct are detailed in the Student Code of Conduct and Student Handbook. These are easily accessible, updated annually, and fairly administered. In addition, UMaine follows written policies and procedures governing administrative treatment of students as outlined in the undergraduate catalog, graduate catalog, Student Handbook, and Student Code of Conduct. Fairness and truthfulness regarding professional treatment of staff are outlined in the various collective bargaining agreements. UMS policy supports a grievance process for represented and nonrepresented employees. These policies and standards are widely distributed and shared with members of the UMaine and UMM communities.

Faculty and staff seeking protection of, and licensing for, inventions, technologies, processes, software, trademarks, or other intellectual property are supported and guided by area experts. Additionally, UMaine's Office of Research Compliance guides the campus in ethical research, and responds appropriately to cases of research misconduct.

UMaine's Policies and Procedures for Financial Disclosures and Conflicts of Interest in Extramurally Sponsored Activities apply to all employees and students serving as investigators on proposals submitted to external sponsors. As described in UMaine Conflicts of Interest Training Requirements, the policy applies equally to UMaine investigators and investigators at other UMS campuses who wish to submit through, or collaborate with, UMaine.

The Office of Equal Opportunity (OEO) develops and maintains UMaine's Affirmative Action Plan, and updates goals for women and minorities. The Office of Human Resources approves all job announcements and recruiting strategies for professional and faculty searches, including requirements to advertise in ways that promote a diverse pool of candidates. UMM's HR Partner does the same for the Machias campus. OEO staff are available to advise search committees throughout the search process.

UMaine's Faculty Senate administers a Committee on Program Creation, Review and Reorganization (PCRRC), encouraging broad consultation on the establishment of new programs and administrative structures. The committee's work affirms the university's commitment to shared governance, academic freedom, affirmative action, and accountability.

UMaine and UMM employ a formal process for performance evaluations of all faculty and staff. A peer review committee evaluates nontenured faculty members each year until the award of tenure. This review takes into account integrity in research, teaching, and service. Tenured faculty members go through a post-tenure review process every four years.

UMaine and UMM regard student privacy as essential. The Family Educational Rights and Privacy Act of 1974 (FERPA) protects the privacy of students. Under FERPA, students have the right to inspect and review their educational records, and have the right to challenge records when they are inaccurate, misleading, or otherwise in violation of privacy rights. UMaine's Office of Student Records, and UMM's Associate Registrar, are key resources for oversight and management of records retention and student information privacy. Additional excerpts from institutional policies related to community integrity can be found in the electronic workroom.

Appraisal

Instances of research misconduct undergo a confidential, robust review. Research misconduct at UMaine is rare. Policies pertaining to misconduct are informally reviewed and assessed as they are implemented. UMaine abides by all federal policy concerning research misconduct, and an annual federal report is prepared and submitted each April.

Nondiscrimination, equal opportunity, grievance, harassment, and accommodation policies

The majority of UMaine's institutional policies on nondiscrimination and equitable treatment of all members of the university are available online through the Office of Equal Opportunity. UMS policies on human resources and equal opportunity are available on UMaine sites or in UMS printed policies and procedures. UMaine and UMM are responsible for implementing these policies and educating the university community about them. We take this charge seriously.

Human Resources' mission statement affirms its obligations to administer a fair, respectful work culture, one that recognizes and rewards the contributions and value of all employees, and which complies with all employment policies, best practices, and laws. Grievance and complaint procedures are detailed and widely disseminated. Policy and educational material on harassment and disability accommodation are distributed to students, faculty, and staff on a routine basis, electronically and in paper format. All policies are periodically assessed and, if needed, adjusted by the Student Accessibility Services Director and the Equal Opportunities Director.

Diversity and inclusivity

In 2018, UMaine's Vice President for Student Life and Dean of Students prepared a comprehensive report outlining UMaine statistics on diversity and inclusion; partners and initiatives aimed at creating a more diverse and inclusive environment; and an action plan for achieving key goals, including communicating clearly and affirmatively our commitment to diversity; valuing diversity as an essential component of the curriculum; and increasing the percentage of undergraduate and graduate students of color.

UMaine has made a firm commitment to gender orientation diversity in its support of its lesbian, gay, bisexual and transgender community. LGBTQ Services and the Rainbow Resource Center are committed to building an inclusive campus community that does not merely tolerate, but respects and honors all members of the university community. The Center is a safe, supportive environment for all students, staff, faculty, and alumni. It provides educational opportunities, information, and advocacy services.

UMM faculty and staff have worked closely with student organizations to provide an open and affirming presence, backed by concrete supports for LGBTQ students through sponsorship of, and participation in, regular events and programming on gender issues. UMM also recently reconstituted its Diversity Committee to address campus concerns actively and skillfully.

In April 2017, LGBTQ Services surveyed student attitudes toward the LGBTQ community. The survey found that 84% of the nearly 1,200 UMaine students polled reported welcoming attitudes toward the lesbian, gay, bisexual, and queer community, and that 78% of the surveyed students reported welcoming attitudes toward the transgender community.

Recruitment of African-American faculty members and students remains a constant challenge at UMaine and UMM. UMaine has a substantial Disabilities Studies program, with graduate and undergraduate offerings and faculty engaged in active research, as well

as several programs addressing women and Native American issues. In 2016, UMaine's Native American Studies Program and Wabanaki Center elected to colocate on campus in order to cooperate more closely and better serve UMaine's Native American populations. This decision resulted in an NSF-funded project designed to facilitate cooperation between UMaine researchers and tribe members to promote the entry of Wabanaki youth into STEM fields. UMaine is proud of its scholarship program and related supports for Native American students.

Integrity of the educational mission

UMaine advances its educational mission through its departments, schools, research centers, and institutes. Their activity includes teaching and advising, research and conferences, institutes, and workshops. UMaine's Conference and Institutes staff assist units in the organization and delivery of academic and research programming. Examples can be found on the Conferences and Institutes website.

To ensure integrity, UMaine and UMM employ numerous internal and external administrative checks and balances. The BOT, the UMaine and UMM Boards of Visitors, the Chancellor, and UMS staff are strong external monitors of protocols and practices on our campuses. President Ferrini-Mundy and her leadership team, including the Provost, other vice presidents, UMM Head of Campus, Deans, Senior Associate Provost, Associate Provost, and Assistant Provost, provide internal administrative checks and balances. UMaine's Faculty Senate, with standing committees on Finance and Institutional Planning; Academic Affairs; Research and Scholarship; University Environment; and Program Creation, Review, and Reorganization, among others, is another form of internal oversight independent of the administration. These entities, and some parallel bodies at UMM, provide oversight of UMaine and UMM structures and functions, and help to ensure that our work is carried out with care and integrity.

II. Transparency

Description

UMaine and UMM are public universities committed to accountability and transparency in fulfilling their statewide and regional obligations, and their responsibilities to their constituents. Transparency is at the heart of UMaine's multifaceted, multiplatform communication efforts led by the Division of Marketing and Communications, which is responsible for presenting UMaine's story to internal and external audiences. The division is

a central hub of UMaine news and information, and manages the institutional brand. Its Policies and Procedures help guide information dissemination by establishing lines of responsibility for, and the standard of, UMaine's branding, marketing and communication efforts. UMaine is now collaborating and coordinating with UMM on institutional messaging.

Internal communications

In 2012, improved marketing and communications was identified as a priority in the Blue Sky strategic plan. Since then, the unit's Policies and Procedures have guided the university in its marketing and communications activities. They are designed to enhance UMaine's image and message through a stronger, more defined relationship between Marketing and Communications and an evolving network of UMaine communicators distributed among the academic colleges, research centers, and vice presidents' staffs. Their intent is to ensure high-quality internal and external messages consistent with our mission, institutional identity (branding), positioning, and strategic priorities. They include:

- Maximize opportunities to enhance visibility or stories.
- Ensure all information is consistent with design and editorial standards.
- Provide central resources to assist all UMaine and UMM divisions, colleges, departments, and programs.
- Integrate efforts between Marketing and Communications and other communicators to optimize creativity in design and message, as well as to improve information flow, ensuring compliance.
- Ensure UMaine and UMM are efficiently leveraging marketing and advertising investments at all levels and in all areas.
- Make information flow most efficiently.
- Reduce miscommunication.

Resources in editorial, media, creative, and web communications

In Marketing and Communications, all four primary areas — News Services, Visual Media, Creative Services and Digital Communications — are coordinated and collaborative. Members of the News Services and Visual Media teams communicate and promote news and information on academic research, scholarship, and creative achievement; the undergraduate and graduate student experience; and teaching and outreach efforts.. Editorial staff offer media relations coordination, including linking media representatives to university expertise, and helping campus constituents effectively promote events and achievements. Primary platforms for UMaine communication include the UMaine News website, UMaine Today magazine, UMaine calendar and social media pages.

UMaine and UMM comply with all applicable federal and state laws regarding the retention and release of public information, and personal and/or educational records of all current employees and students. Freedom of Information Act and/or Maine Freedom of Access Act requests are directed to the UMaine FOIA/FOAA officer in the Office of the President; Marketing and Communications provides support for those requests. UMM directs those inquiries to the Public Relations Office or to the Associate Registrar, depending on the nature of the request.

The Digital Communications team is responsible for the quality and effectiveness of UMaine's website — umaine.edu — UMaine's principal marketing channel. In the 2016–2017 academic year, the umaine.edu website was visited over 4.8 million times, with more than 11 million pages viewed.

The UMaine website underwent a significant redesign in 2014–2015, and the improved site was launched in fall 2015. In 2017, the U.S. General Services Administration Access Board's updated requirements used WCAG 2.0 to adapt existing 508 standards to reflect newer technologies in smartphones and related software.

Post-launch, Digital Communications adopted a proactive approach to web accessibility guidance. Team members offer weekly training for all students, faculty, and staff who work with umaine.edu websites, and web accessibility is an integral part of that training. All new websites are reviewed for quality assurance, and web accessibility of content must be compliant for a website to be launched. In 2017, UMS adopted a web governance tool (Monsido) that UMaine uses to identify issues that may hinder accessibility. This tool actively monitors UMaine web content and identifies accessibility issues arising from ongoing content creation for existing sites.

Web access and transparency

UMM's website was also significantly redesigned to be more outward facing in 2014–2015. Subsequent work, including hiring a part-time webmaster in IT to ensure that the site was more user-friendly, included correct information for all departments, and is updated regularly. In fall 2018, UMM's site came under the direct oversight of UMaine's web manager.

UMaine's academic colleges and UMaineOnline offer current and prospective students detailed academic information. Each has its own website. For ease of navigation, Admissions and the UMaine homepage provide access to these sites.

The umaine.edu template provides top-level navigation on Admissions, Campus Life, Academics, Research, and general UMaine information. Also part of the template navigation is a Quicklinks dropdown menu featuring an A to Z Directory, UMaine Map, UMaine Calendar, UMaine Portal, Faculty and Staff Resources, Student Resources, Emergency Information and UMaine Police. Further, the UMaine Student Consumer Information exists to direct students to all current information on student policies, financial aid, Ioan information, health and safety, and student outcomes. UMM's website is similarly designed with dropdown menus.

UMaine's policies and reports online include the Student Handbook, which outlines processes for conduct; the annual Clery security and fire safety report; audited statements of UMaine's Office of Budget and Business Services; the university's grades and grading policy; accreditation, NC-SARA and other Office of Institutional Research Assessment resources; UMaine employment processes, including those for hiring students; and processes for considering complaints and appeals. Office of Institutional Research and Assessment also collects, maintains and analyzes university data.

UMaine's online undergraduate and graduate catalogs are updated annually and archived, as is UMM's undergraduate catalog.

Content for academic fact sheets used by UMaine Admissions is compiled in collaboration with colleges, schools, departments, divisions, and programs to ensure quality, accuracy, and consistency. Information about UMaine academic programs, learning outcomes, student success, and achievements of community members is imparted centrally on the UMaine news website and by the colleges and schools. Examples of college news sources include the College of Education and Human Development; College of Liberal Arts and Sciences; College of Engineering; College of Natural Sciences, Forestry, and Agriculture; Maine Business School; Honors College; and the Division of Lifelong Learning.

UMM also provides online versions of the Student Handbook, Clery reports, and Faculty Handbook. UMM Admissions information, and all academic policies and procedures are also publicly available, as are job postings and application information.

Appraisal

As the state's flagship university, UMaine recognizes the importance of transparency in fulfilling its mission. To ensure success, our communication efforts across multiple platforms emphasize, and are constantly informed by, best practices, quality assurance, accessibility policies and procedures, and constituent needs.

UMaine has been transparent regarding incidents of sexual harassment, mistreatment of personnel, and financial impropriety. After investigations are complete, all appropriate details about such incidents are publicly disclosed.

UMaine's and UMM's commitment to transparency are unwavering. Continued awareness of, and adherence to, marketing and communications policies and procedures will help ensure the most effective institutional communication efforts possible.

III. Public disclosure

Description

Marketing and Communications has general responsibilities for public disclosure of information. Other UMaine administrative units, such as Student Records, Budget and Business Services, Institutional Research and Assessment, Equal Opportunity, Public Safety (particularly with regard to Clery Act compliance), Student Life, and Athletics are responsible for various aspects of our interface with members of the public seeking information about our programs, activities, and mission. Increasingly, these units work together to ensure consistent, coordinated message delivery that presents an accurate portrayal of UMaine.

Changes in communications practices, accelerating over the past decade more quickly than at any other time in UMaine's history, have brought new opportunities. In response to the needs of those who seek information about us, we are increasingly reliant on electronic means of communication. This goes beyond the critical need for an accessible, highly functional and attractive website to include contemporary ways of relaying information, such as podcasting, social networking mechanisms, blogging and the timely delivery of email messages.

In this context, it is critical that UMaine communicators continue to recognize that Maine does not have universal broadband internet access, and that some UMaine constituents, especially those in rural areas, have dial-up connections or no web access. Given these considerations, UMaine's communications professionals continue to produce high-quality materials of a more traditional nature, such as magazines, viewbooks, television and radio commercials, and newsletters. Our approach to public disclosure incorporates several communications strategies and takes into account the high level of statewide interest news organizations have in UMaine.

In preparation for our spring 2019 NECHE review, a statewide notice for public comment on the self-study was published in November 2018 in newspapers throughout Maine, and on the UMaine and UMM websites.

Appraisal

UMaine's online undergraduate and graduate catalogs and UMM's undergraduate catalog describe the obligations and responsibilities of students, faculty, and staff. The catalogs contain information about objectives, expected educational outcomes, public status, admissions and transfer requirements and procedures, student fees, charges, refunds, student conduct rules and regulations (also found in the Student Conduct Code), procedures for student appeals and complaints (also found in the Student Conduct Code), withdrawals, academic programming, courses, educational opportunities, academic policies, and degree completion requirements.

UMaine's and UMM's websites are another primary source of information for students, prospective students, and parents. UMaine's homepage and the Office of Admissions and Graduate School websites provide content ranging from stories about the UMaine student experience, and the breadth and depth of the state's flagship, to details about scholarships and admissions criteria. Admissions information is provided for undergraduate, transfer, international, lifelong learning and graduate students, and student veterans. The UMaine viewbook is online, as are resources for admitted students, parents and families, and guidance counselors. UMM's website contains similar information for prospective and continuing students, and their families.

Information about faculty is located in the catalog and on departmental websites (which can be accessed through the university website), as is information about administrative officers and the Board of Visitors. Information about UMaine's Hutchinson Center, Darling Marine Center, other research facilities, and Cooperative Extension are also available through the university website. Information about UMM faculty, programs, and administrators can be found on its website.

Information about the UMaine student body, campus settings, support services, and opportunities for students can be found under the Campus Life heading on the university website, specifically tabs labeled Division of Student Life and Student Consumer Information. More detailed information is available from the Office of Institutional Research and Assessment. Institutional goals for student's education are also located on the OIRA website.

Student Financial Aid offers numerous online resources for current and prospective students, and parents, including costs at UMaine, financial literacy information, and a net

price calculator. Debt upon graduation is available in the Common Data Set. Cohort default and loan repayment rates are available on the Office of Student Financial Aid website. UMaine's statement of accreditation is located on the OIRA site.

Projection

Communications with students

Effective communication with internal and external constituents is a constant goal and challenge. UMaine is currently focused on ensuring the successful adoption of its earlyalert and student advising resource, Navigate, in the 2019–2020 academic year (see also Standard Six). The student-facing Navigate app may provide a single, shared medium through which the university communicates with its undergraduate and, potentially, graduate student populations. Managing the sources, volume, content, and timing of those communications will be a challenge.

In spring 2019, Academic Affairs and Student Affairs began informal discussions about the use of Navigate for shared, campuswide student communications. We expect to form a joint working group — partnering with our current Navigate implementation team — to establish a protocol and workflow for those communications.

The faculty handbooks

The UMaine Faculty Handbook has been a work in progress for several years. Although faculty-related policies and procedures can be found in other documents or on web pages, an updated, single-reference source would be a welcome development. UMM's Faculty Handbook was recently updated, but should be annually reviewed for accuracy.

Assurances of the integrity, transparency, and public disclosure of an institution of higher learning cannot reside solely with one person, office, committee, or branch of the organization. To ensure institutional honesty, responsibility must be structurally embedded in its various components, both internal and external. UMaine and UMM possess such interdependent and balanced structures, and thereby continually safeguard their integrity and transparency.

COMMISSION ON INSTITUTIONS OF HIGHER EDUCATION NEW ENGLAND ASSOCIATION OF SCHOOLS AND COLLEGES 3 Burlington Woods, Suite 100, Burlington, MA 01803–4514 Voice: (781) 425 7785 • Fax: (781) 425 1001 • Web: cihe.neasc.org

AFFIRMATION OF COMPLIANCE WITH FEDERAL REGULATIONS RELATING TO TITLE IV

Periodically, member institutions are asked to affirm their compliance with federal requirements relating to Title IV program participation, including relevant requirements of the Higher Education Opportunity Act.

1. Credit Hour: Federal regulation defines a credit hour as an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutional established equivalence that reasonably approximates not less than: (1) One hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or (2) At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours. (CIHE Policy 111. See also Standards for Accreditation 4.34.)

catalog.umaine.edu/content.php?catoid=76&navoid=2757&hl=%22Credit+Hour%22&returnto=search

Print Publications: N/A

Self-Study/Interim Report Page Reference: 37

2. Credit Transfer Policies. The institution's policy on transfer of credit is publicly disclosed through its website and other relevant publications. The institution includes a statement of its criteria for transfer of credit earned at another institution of higher education along with a list of institutions with which it has articulation agreements. (CIHE Policy 95. See also Standards for Accreditation 4.38, 4.39 and 9.19.)

machias.edu/academics/academics/registrars-office/transfer-policies

Print Publications: N/A

Self-Study/Interim Report Page Reference: 36,38

3. Student Complaints. "Policies on student rights and responsibilities, including grievance procedures, are clearly stated, well publicized and readily available, and fairly and consistently administered." (Standards for Accreditation 5.18, 9.8, and 9.19.)

URL: umaine.edu/eo/complaintsandconcerns

machias.edu/campus-life/equity-inclusion

Print Publications: N/A

Self-Study/Interim Report Page Reference: 48–49, 93

4. Distance and Correspondence Education: Verification of Student Identity: If the institution offers distance education or correspondence education, it has processes in place to establish that the student who registers in a distance education or correspondence education course or program is the same student who participates in and completes the program and receives the academic credit....The institution protects student privacy and notifies students at the time of registration or enrollment of any projected additional student charges associated with the verification of student identity. (CIHE Policy 95. See also Standards for Accreditation 4.48.)

Method(s) used for verification: online.umaine.edu/online-student-verification

machias.edu/academics/distance-degree-programs

Self-study/Interim Report Page Reference: 38–39

5. FOR COMPREHENSIVE EVALUATIONS ONLY: Public Notification of an Evaluation Visit and Opportunity for Public Comment: The institution has made an appropriate and timely effort to notify the public of an upcoming comprehensive evaluation and to solicit comments. (CIHE Policy 77.)

B.A. Philosophy	https://umaine.edu/las/majors-and-minors- 2/a-sampling-of-career-paths/learning- goals-for-undergraduates/philosophy/	Capstone.	Rubric used to assess capstone papers utilized by two philosophy faculty members.	60% of students evaluated over the past three years scored "fair." Faculty currently considering what this means for program.	2013
B.A. Physics	https://umaine.edu/las/majors-and-minors- 2/a-sampling-of-career-paths/learning- goals-for-undergraduates/physics-and- astronomy/	ETS Field Test for 400-level courses to assess student performance, Holmes- Wieman Laboratory Diagnostic to evaluate student understanding and knowledge of lab skills, courses on ethics, lifelong learning, and contemporary issues with oral and written components, longitudinal study on majors at 3rd, 4th, and 5th semester.	Faculty use AAC&U VALUE rubric to determine student performance.	Overall, one area is consistently strong (E&M), telling us that students are approaching the test seriously. Results are also consistent with our program's emphasis on E&M. Thus, performance in other areas can be used to measure our program performance. In mechanics, scores have been declining over time, which is worrisome. In Thermo/Optics/Waves, scores are very low, at times, which might be because thermo and optics are elective courses not taken by all students. It's also possible that instruction in some areas is weak.	2012

B.S. Education	Interstate Teacher Assessment and Support Consortium (InTASC) Model Core Teaching Standards. http://programs.ccsso.org/projects/interstate _new_teacher_assessment_and_support_co nsortium/#resource	These are the following assessment activities utilized by the program: 1.) Cooperating Teacher Evaluations from field placements. 2.) Student Teacher Portfolio Defense, and 3.) Senior Student Program Evaluations.	The three full- time education faculty.	As of Spring 2018: 1.) Redesigning the internships to include a separate seminar. 2.) We are continuing to develop the new format for student teaching portfolio defenses. 3.) We are redesigning the program evaluation instrument to attempt to gather more pertinent information. We are also looking for more support for students in preparing for the Praxis exams.	Dec. 2014
B.S. Business & Entrepreneurial Studies	 Demonstrate knowledge and display skills in marketing, management, accounting and finance. 2.) Use computers and information technology with business applications. 3.) Analyze the influence of factors in the business environment, including the legal, political, economic, socio-cultural, technological, and natural environment. 4.) Demonstrate knowledge of statistical inference and the use of quantitative information and analysis. 5.) Demonstrate verbal and written 	Student business plans written in the capstone course, MAN406 Entrepreneurship, are the primary student artifacts used for program assessment. Business faculty have not reviewed business plans due to faculty resigning and program integration efforts. However, this Fall a new database of business plans will be kept by William Driscoll (instructor of MAN 406).	The three full- time education faculty.	To address student weakness in financial analysis, we proposed offering a new class BUS1XX Intro to Personal & Business Finance. More quantification skills (via software such as Excel) will be added in courses like BUS 1XX and MAN 325). To address a perceived weakness in collaboration & teamwork, partnerships versus groups of 3-5 students will be incorporated to	August, 2016
	communication skills important for various business purposes. 6.) Explain how certain variables and policies affect supply, demand, and market outcomes. 7.) Explain how variables and policies affect the economy and economic development. 8.) Apply economic concepts and principles to the analysis of quantitative problems. 9.) Incorporate business ethics and social responsibility into business practices. 10.) Discuss the sacrifices and potential rewards of owning and managing one's own business. 11.) Explain the process of entrepreneurship, and the roles and responsibilities of entrepreneurs. 12.) Formulate and analyze strategies for managing risk. 13.) Synthesize and apply business knowledge in strategically planning a business enterprise. 14.) Evaluate strategic business plans.			help facilitate distance students who have had difficulty working in larger groups online.	
B.A. English, Creative Writing, & Book Arts	https://machias.edu/academics/majors- programs/ecwba/ecb-learning-outcomes/	Junior-Level Portfolio Review, a degree requirement. For some students completing a secondary education minor or major, the PRAXIS subject exam is another indicator that graduates have achieved stated outcomes. UMS Program Integration Committee review of and recommendations for the ECB Program.	The ECB Faculty review each portfolio each spring and communicate to each student the results.	Program faculty added more rigor and training in literary critiques as a result of poor results in this area of the portfolio. Add industry- standard software in the editing and book design courses.	2011
B.A. Psychology and Community Studies	https://machias.edu/academics/majors- programs/psychology/	Annual surveys beginning and end of student careers. Every 3-5 years we also survey our Alumni about their feedback on the program and its preparation for their careers as well as collecting information about jobs, lifelong learning experiences, graduate school (and our preparation for them).	Annually by faculty	N/A	N/A

CATEGORY	 (1) Where are the learning outcomes for this level/program published? (please specify) Include URLs where appropriate. 	(2) Other than GPA, what data/ evidence is used to determine that graduates have achieved the stated outcomes for the degree? (e.g., capstone course, portfolio review, licensure examination)	 (3) Who interprets the evidence? What is the process? (e.g. annually by the curriculum committee) 	(4) What changes have been made as a result of using the data/evidence?	(5) Date of most recent program review (for general education and each degree program)

		student pursues an art education career, student intern input, and alumni surveys.		student service opportunities made possible by the formation of a vibrant student arts club P.E.A.C.H. (Pursuit, Exploration, and Appreciation of Creativity and the Humanities). Implementing student exit interviews into the Senior Project creative narrative. Tracking student arts job and graduate school placement and completion including those who have been awarded an MFA in the visual arts or creative writing.	(Start date 2018.)
B.S. Biology	 Development of lifelong learning skills: Students will be able to collect, understand, evaluate, and apply information regarding biological topics from a variety of primary and secondary sources including but not limited to peer-reviewed and gray literature, texts, posters, group meetings, and presentations. 2.) Development of excellent written and verbal communication skills. 3.) Development of experimental design and critical thinking skills. 4.) Acquisition of technical skills. 5.) Preparation for graduate or other professional studies in Biology. 6.) Acquisition of discipline-specific knowledge. 7.) Acquisition of mathematical literacy. 	 Student writing using rubric when we grade final papers for BIO 117 This Is Life and BIO 410 Senior Seminar in biology. 2.) Major Field Test in Biology to assess content knowledge 	Program faculty and department chair.	Started talking about requiring a technology based course in the program, with a particular focus on bioinformatics. We have developed a concept map for the major to identify where we reinforce a few topics the students are surprisingly struggling in.	2011
B.S. Marine Biology	1.) Development of lifelong learning skills: Students will be able to collect, understand, evaluate, and apply information regarding biological topics from a variety of primary and secondary sources including but not limited to peer-reviewed and gray literature, texts, posters, group meetings, and presentations. 2.) Development of excellent written and verbal communication skills. 3.) Development of experimental design and ertical thinking skills. 4.) Acquisition of technical skills. 5.) Preparation for graduate or other professional studies in Marine Biology. 6.) Acquisition of discipline- specific knowledge. 7.) Acquisition of	Comprehensive senior exam that was given to students in the senior seminar course (BIO 460 or 482). Faculty collected written research reports from students in ENV 103 Oceanography, the first year marine biology course, and BIO 460 Senior Seminar in Marine Biology.	Program faculty and department chair.	Revised the content in the first year Oceanography and second year Intro to Marine Biology to prevent overlap of content that was being covered. We are currently using the information to help inform a proposed change to the program structure.	Currently underway.
B.S. Environment Studies	mathematical literacy. 1.) Development of lifelong learning skills: Students will be able to collect, understand, evaluate, and apply information regarding biological topics from a variety of primary and secondary sources including but not limited to peer-reviewed and gray literature, texts, posters, group meetings, and presentations. 2.) Development of excellent written and verbal communication skills. 3.) Development of experimental design and critical thinking skills. 4.) Acquisition of technical skills. 5.) Preparation for graduate or other professional studies in Environment Studies. 6.) Acquisition of discipline-specific knowledge. 7.) Acquisition of mathematical literacy.	A project based course.	Program faculty	Discussion led to changing the learning outcomes to better reflect what we want from students. Developed a new set of learning outcomes and will be changing the program structure to reflect the new learning outcomes.	Currently underway.
B.S. Recreation and Fourism Management	Acquisition of mathematical metaby, 1.) Students will develop an understanding of current and changing techniques and processes used by workers within the broad, range of professional positions and organizations housed in the industry. 2.) Students will demonstrate knowledge of concepts and skills necessary for the design, implementation, and evaluation of comprehensive recreational programs tailored to a great variety of individual and group needs. 3.) Students will understand and develop techniques that enable the implementation of appropriate operational and strategic management practices. B.A. Art Education, Art History, Studio Art; B.F.A. Studio Art	National Association of Schools of Art and Design (NASAD)	2013	UNIVERSITY OF M All art degrees within the program remain in good standing with NASAD.	AINE 1.) Institution shall maintain a curricular program in studio art or design at various levels according to the needs of its students. 2.) The institution shall offer studies reflecting attention to such areas as art/design history and criticism. 3.) The institution offering post.secondary professional education and training programs must offer at least one non-degree curricular program at the undergraduate level requiring at least 30 semester hours or the equivalent, or one non-degree curricular program at the graduate level requiring at least 15 semester hours or the equivalent. 4.) The institution shall have been in operation for at least three consecutive years and shall maintain its programs on a regular academic-year or year-round basis. 5.) The institution's legal authority shall be stated clearly in its published materials as identified by its charter, authority to offer curricular programs, structure of control, profit or non-profit status, and affiliation, if any, with a parent or sibling organization. 6.) All policies regarding the admission and retention of students shall be clearly defined. 7.) All tuition, fees, and other charges, as well as all policies pertaining thereto, shall be clearly described in the institution's published literature. 8.) Faculty members shall be qualified for their specific teaching assignments by educational background and/or professional experience. The institution shall provide in its institutional catalog a complete description of each course or program offered. 10.) The institution shull have either library space or holdings adequate for its educational program. 12.) The institution shall have either library space or holdings adequate for its educational program, or shall have made arrangements for its students and faculty to have access to appropriate code of the aducational program. 12.) The institution shall have either library space or holdings adequate for its educational program, or shall have made arrangements for its	2020
B.A. Music; B.M. Music Education, Music Performance; M.M. Music Education, Performance	National Association of Schools of Music (NASAM)	2015	Progress report was voted to accept by accreditation committee. Found diligent efforts to address graduate enrollment and recruitment. Also commended for undertaking cooperative graduate education initiatives with other institutes in Maine and Division of Lifelong Learning.	recognized accrediting agency. 1.) The institution shall offer regular classes in such areas as theory, history, and appropriate repertories of music, as well as instruction in performance. 2.) The institution shall maintain a curricular program in musicianship skills at various levels appropriate to the needs of its students. 3.) The institution shall offer instruction in and opportunities for ensemble performance. 4.) The institution shall offer at least one complete curriculum that meets all applicable standards. 5.) Baccalaureate degree- granting institutions shall have graduated from at least one curricular program that meets all applicable standards at least one senior class with a minimum of three students, and another class shall be in readiness subject to examination. 6.) Institutions offering one or more graduate programs as their only degree programs shall have graduated at least two students from at least one graduate program that meets all applicable standards, and shows evidence of continuing enrollment. 7.) The institution's legal authority shall be stated clearly in its published materials as identified by its charter, authority to grant degrees, structure of control, profit or non- profit status, and affiliation, if any, with a parent or sibling organization. 8.) All policies regarding the admission and retention of students, as well as those pertaining to the school's evaluation of progress through its educational program, shall be clearly defined in literature published by the institution, 9. All tuition, fees, and other charge, as well as all policies pertaining thereto, shall be clearly described in the institution's published literature. 10.) Faculty members shall be qualified by educational background and/or professional experience for their specific teaching assignments. The institution shall list is faculty in its published literature. 11.) The institution shall have facilities and equipment adequate to the needs of its educational program. 12.) The institutio	2024
				Incal and state legal codes. 14.) The institution shall provide and be responsible for all coursework or educational services to support its educational programs, or demonstrate that any cooperative or contracted coursework or educational services are provided by an outside institution or organization having accreditation as an entity by a nationally recognized accrediting agency. 15.) The institution shall demonstrate a commitment to a program of continuous self-evaluation.

•			UNIVERSITY OF M	AINE	ui.
B.S. Chemistry	American Chemical Society (ACS)	2014	Accreditation through ACS did not disclose reasons for the continuation of program accreditation. Accreditation began from February 1941.	1.) The institution to the program must be accredited by the respective regional accrediting body, furthermore the administration of the program should rest in a chemistry department organized as an independent unit with control over an adequate budget, faculty selection and promotion, curriculum development, and assignment of teaching responsibilities. 2.) Faculty members are responsible for defining and executing the overall goals of the program. 3.) Faculty members to an approved program should have a range of education backgrounds and the expertise to provide a sustainable, robust, and engaging environment in which to educate students. 4.) A modern and comprehensive infrastructure is essential to a vigorous undergraduate program including classroom, teaching labs, research offices, and common space alongside appropriate laboratory equipment. 5.) The curriculum of an approved program provides a broad background in chemical principles and in-depth study of chemistry. 6.) Program must support undergraduate research to allow students to integrate and reinforce chemistry knowledge from coursework. 7.) The development of students kills is necessary from an approved program to prepare students to enter the workforce or postgraduate education. 8.) An approved program should research mission. 9.) The chair of an approved program to program steaching and research mission. 9.) The chair of an approved program to program stouled existe the since of the program of an approved program to program to program stouled research mission. 9.) B.S.Computer Science	Computing Accreditation Commission of Accreditation Board for Engineering and Technology (CAC- ABET)	2018	Previous program concern was with faculty. The reasoning for the concern is stated here: "While the faculty is currently sufficient in number, unsuccessful faculty searches to fill vacancies and increasing demand for elective and concentration courses have the potential to affect continuity, stability, and oversight of the program." Program concern for this visit: Required for accreditation is that student progress must be	1.) Student performance and progress must be evaluated and monitored to foster success in attaining learning outcomes. 2.) Program must have published program gram educational objectives congruent to the mission of the institution. Must be a documented, systematically utilized, and effective process for the periodic review of these program objectives. 3.) The program must have documented student outcomes that prepare graduates to attain the program educational objectives. 4.) Program must regularly use appropriate, documented processes for assessing and evaluating the extent to which student outcomes are attained. 5.) Each faculty member teaching must have expertise and an educational background consistent with the contributions to the program expected from the faculty member. 6.) Department equipment must be adequate to support attainment of the student learning outcomes and provide an	2018
			monitored to attain outlined student outcomes. The team observed many pre-requisite violations in the student transcripts. The team established that these pre-requisite exemptions were duly authorized by the students' advisors and instructors but the process for granting such exemptions is not documented.	environment conducive to learning. 7.) Institutional support and leadership must be adequate to ensure the quality and continuity of the program.	
PhD Psychology	American Psychological Association (APA)	2012	The program is consistent with the majority of the provisions within the several criteria. Areas of concern relate to ensuring students demonstrate substantial understanding of curriculum, clarification of student retention rates, and a narrative response on its mentoring model; all of which the program has responded to.	1.) Program offers training that leads to doctoral degree. 2.) Programs purpose must be proposed in an institutional setting appropriate for doctoral education. 3.) Standards relating to: administrative responsibilities related to cultural and individual differences and diversity; program length requires; adherence to formal written policies and procedures of institution; program must provide information on the aids of the program. 4.) Standards also related to discipline specific wide knowledge and competence; curriculum standards, required internship training, evaluation of student and program competencies, documenting student success; faculty standards related to individual differences and diversity. 5.) Public disclosure of accreditation status.	2019
M.A. Speech-language Pathology	Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech- Language-Hearing Association (CAA)	2014	CAA found the program to have no areas of non-compliance with standards. Partial compliance in standard 1.9 due to old recent program outcome data and some faculty not having doctoral degrees.	1.) Compliance of applicable and equal opportunity laws. 2.) Program provides information about the program and institution to students that is publicly and readily available. 3.) Student outcome measures must be recorded. 4.) Programs use use the applicable accreditation statement on their website. 5.) Clinical education obtained in external placements must be governed by agreements between program and external faculty. 6.) At least 80% of students must have completed the program within the program's published time frame. 80% of students must pass the Praxis subject assessment examination.	2021
B.S. Forestry; Parks, Recreation, and Tourism; M.S. Forestry	Society of American Foresters (SAF)	2013	Summary findings from 2015 assessment report shows that under standard III, program made substantive changes to assess student learning and met the standard; under standard IV, proper replacements from retirees were added and thus met the standard.	and the set of the	2023

Teaching; C.A.S. Education	Before 2015: National Council for the Accreditation of Teacher Education (NCATE) After 2015: Council for the Accreditation of Educator Preparation (CAEP) Maine Board of Education (BOE)	2014	NCATE Board of Examiners Report 2014 Areas for Improvement 1.3.c What new AFIs are recommended? AFI Data provided for key unit assessments indicated candidates at both the initial and advanced levels, but especially at the initial level, are not able to meet the expectations set for them on identified proficiencies. AFI Rationale The data tables provided by the unit at the time of the onsite visit were organized by program and proficiency. The data were a. creflection of a small sample size for each assessment when considering the program and proficiency. The manner the data were presented – by program and proficiency – made for small sample sizes that may have skewed the data. The data provided was not disaggregated so that the team could make judgments about the student performance levels meeting expectations. The Elementary Education programs and Secondary Education programs continue to have multiple proficiencies that have not shown student success rates that are acceptable against several proficiencies as described in 1.1.3.	1.) Program ensures student develop an understanding of their discipline's content and pedagogical knowledge. 2.) Program ensures effective and high_quality clinic practice to prepare students develop knowledge, skills, and professional dispositions. 3.) Program demonstrates that the quality of students is a continuing and purposeful part of its responsibility from recruitment. 4.) Program demonstrates the impact of its completers on P-12 student learning and development. 5.) Program must lastly maintain a quality assurance system comprised of valid data from multiple measure such as evidence of candidates impact on student learning and development.	2024

B.S. Bioengineering,	Engineering	2018	AFI Collaboration between College of Liberal Arts and Sciences and unit faculty is not systematically enhanced through effective communication. AFI Rationale Although there are many examples of increased collaboration between the unit and the College of Liberal Arts and Sciences (CLAS), there remain communication issues between specific programs in CLAS and the unit. Bioengineering, Chemical;	General program criteria for engineering programs require eight separate	2024
Chemical Engineering, Chemical Engineering, Electrical Engineering, Computer Engineering, Mechanical Engineering Physics, Construction Engineering Technology, Electrical Engineering Technology, Mechanical Engineering Technology, Survey Engineering Technology, Survey Engineering Technology	Accreditation Commission - (ECA - ABET)	2018	Bioengineering, Chemical; received one concern relating to institutional support due to the strain on staff for further growth. Civil: no concern, weakness, or deficiencies. Electrical, Computer: one weakness related to statistics and math requirements do not appear to be integrated into engineering. Engineering Physics: Weakness in continuous improvement, deficiency in curriculum due to a lack of credits offered related to engineering topics. Mechanical: no concerns, weaknesses, or deficiencies.	teneral program criteria for engineering programs require eight separate standards. 1.) Student performance must be evaluated and monitored to foster success. 2.) The program must have published program educational objectives that are consistent with the mission of the institution. 3.) The program must have documented student outcomes that prepare graduates to attain the educational objectives. 4.) The program must regularly use appropriate, documented processes for assessing and evaluating student outcomes. 5.) The curriculum requirements must specify subject areas appropriate to engineering courses but not prescribe specific courses. 6.) Faculty members must have the competencies to cover all of the curricular areas of the program and be in sufficient number. 7.) Facilities in the program must be adequate to support student outcomes and an environment conducive to learning. 8.) Institutional support and leadership must be adequate to ensure the quality and continuity of the program.	2024
B.S. Food Science and Human Nutrition, M.S. Food Science and Human Nutrition	Accredited Council for Education in Nutrition and Dietetics (ACEND)	2012	In 2018, ACEND received documentation demonstrating that sufficient changes to be compliant with Standard 5, Elements 5.1 and 5.2; and Standard 6, Element 6.1 and 6.2. Program is now in good standing with the Accredited	1.) Programs must meet requirements include oversight by agencies, organizational structure, financial stability, sufficient resources, award degrees, sufficient length and management; 2.) program consortium must meet additional organizational structure criteria; 3.) program must have a clearly formed and publicly stated mission with supporting goals and congruent to the program's values and objectives; 4.) program must continuously evaluate the achievement of its mission, goals, and	2022
			Council for Education in Nutrition and Dietetics.	objectives; 5.) Core Knowledge and Competencies must be the basis on which the program curriculum are built upon; 6.) program must continuously assessment achievement of student learning outcomes; 7.) program must have a sufficient number of qualified faculty and preceptors to provide the depth and breadth of learning activities required in the curriculum and exposure to the diversity of practice; 8.) program must have policies and procedures to maintain written agreements with institutions, organizations and/or agencies providing supervised practice experiences to meet further competencies; 9.) program must provide clear, consistent, and accurate information about all program requirements to prospective students and the public; 10.) program must have written policies and procedures that protect the rights of students and are consistent with institutional practices.	
B.S. Athletic Training	Commission on Accreditation of Athletic Training Education (CAATE)	2010	The program is currently in good standing with the Commission on Accreditation of Athletic Training Education.	1.) Sponsoring institution must be accredited by an agency recognized by the US Department of Education or Council for Higher Education Accreditation and authorized to provide post-secondary education; 2.) Develop a plan and establish assessment measures for student learning outcomes; 3.) Program director must be a full-time employee of the sponsoring institution with faculty status, rights, and responsibilities defined by institution policy; 4.) Program delivery and content of core curriculum must include formal instruction of athletic training knowledge, field work, interaction with other medical and health care personnel, clearly written course syllabi, and education must follow a logical progression for increasing amounts of clinically supervised responsibility leading to autonomous practice upon graduation; 5.) technical standards for completion of program must be clearly defined, published, approved by appropriate institutional representatives; 6.) Prinancial resources including adequate available resources mecessary to meet the program's size and documented mission and outcomes for supplies, maintenance, instruction, operation cost, professional development, and capital costs; 7.) Facilities and instructional resources must be be sufficient to deliver the curriculum and must be available for exclusive use for class times; 8.) Operational policies and fair practices must be identified and publicly accessible, program documents must use accurate terminology of the profession; 9.) Student records must maintain appropriate progression through curriculum of program; 10.) all distance learning sites must provide comparable and equally accessible learning and instructional regression through curricular of program in the aboratory use.	2020

AUDITORS MANAGEMENT LETTER

INDEPENDENT AUDITOR'S REPORT

The Board of Trustees University of Maine System

Report on the Financial Statements

We have audited the accompanying financial statements of the business-type activities and the discretely presented component unit of the University of Maine System (the System), a component unit of the State of Maine, as of and for the years ended June 30, 2018 and 2017, and the related notes to the financial statements, which collectively comprise the System's basic financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audits. We did not audit the financial statements of the discretely presented component unit. Those statements were audited by another auditor, whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for the discretely presented component unit, are based solely on the reports of the other auditor. We conducted our audits in accordance with U.S. generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the discretely presented component unit were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audits and the reports of the other auditor, the financial statements referred to above present fairly, in all material respects, the financial position of the business-type activities and the discretely presented component unit of the System as of June 30, 2018 and 2017, and the respective changes in financial position and, where applicable, cash flows thereof for the years then ended in accordance with U.S. generally accepted accounting principles.

Emphasis of a Matter

Adoption of New Accounting Pronouncements

As discussed in Note 1 to the financial statements, in 2018, the System adopted Governmental Accounting Standards Board (GASB) Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions and GASB Statement No. 81, Irrevocable Split-Interest Agreements. The 2017 financial statements have been restated for the retrospective application of the new accounting guidance. Our opinion was not modified with respect to these matters.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that the Management's Discussion and Analysis and the required supplementary information related to the System's retirement plans as be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by GASB, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with U.S. generally accepted auditing standards, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audits were conducted for the purpose of forming opinions on the financial statements that collectively comprise the System's basic financial statements. The supplementary information presented in the Schedules of Activities is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audits of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with U.S. generally accepted auditing standards. In our opinion, the information is fairly stated in all material respects in relation to the basic financial statements as a whole.

AUDITORS MANAGEMENT LETTER

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 29, 2018 on our consideration of the System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the System's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the System's internal control over financial reporting and compliance.
