

The University of Maine Rural Integrated Behavioral Health in Primary Care (RIBHPC) Training Program Presents:

## Screening for Early Emerging Mental Experiences (SEE ME): A model for early detection of psychosis within integrated primary care

# FRIDAY, APRIL 1, 2022

## 10:30 AM - 12:00 PM

[Registration Link](#)

### Webinar Description:

Despite the prominent role primary care plays in the prevention of serious and chronic physical health conditions, its role in the early detection of and intervention in major mental health conditions has been peripheral, particularly in the U.S. Existing strategies, generally reliant on community education and help-seeking, continue to identify only a small fraction of people with psychotic disorders within the critical window associated with best outcomes. Screening for Early Emerging Mental Experiences (SEE ME) is a three-stage psychosis screening, triage, and engagement model designed to address this in U.S. integrated care settings. This workshop will provide an overview of SEE ME, a review of feasibility data and “KNOW THE SIGNS, FIND THE WORDS, MAKE THE CONNECTION” skills, and a chance to hear directly from individuals with lived experience of psychosis and a behavioral health clinician involved in the Maine feasibility project.

This project is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of an award totaling \$1.48 million dollars. The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement, by HRSA, HHS, or the U.S. Government. For more information, please visit [HRSA.gov](https://www.hrsa.gov).

### Workshop Objectives:

- Describe at least two arguments for and against psychosis screening within integrated care
- Describe the three stages of the SEE ME model
- Describe three specific skills that mental health clinicians imbedded in primary care can employ to improve early detection and intervention in serious mental health conditions
