DETERMINING THE SCOPE OF YOUR IMPLEMENTATION

In determining what will make most sense for our organization, consider the following:

- **Resources**
    - What is our current potential to commit financial resources to creating release time for training and other meetings?
    - What time will each of the faculty need to devote to this process?
    - What materials will we need?

- **Geography**
    - How spread out are your sites/departments?

- **Risks**
    - What will people have to give up in order to implement Sanctuary?
    - What will people be most afraid of?
    - What and who will need to change?

- **Limits**
    - Are there funding limitations?
    - Are there time limitations?
    - Are there staffing limitations?
    - Are there time limitations?
    - Are there resource limitations or guidelines?

- **Timing**
    - What will implementation look like? Will it be full implementation, staggered, a pilot?
    - Will there be a roll out or a "go-live" date?
    - What have you implemented before?
    - What mistakes can you learn from?
    - What worked well?
