- Black Bears for Recovery

Our Focus

Health and Safety

Bar Lab

In the study they all walk into a bar scene:

1. Given alcohol
2. No alcohol
3. Given seltzer
4. Told they were given alcohol but it was seltzer with alcohol on the rim

Our expectations of alcohol play a huge role in our experience with it

Facts

Nationally

- College students more likely to be heavy drinkers
- 2 in 5 students heavy drinkers (5+ drinks)
- Males more likely to drink heavily than females
- High risk drinking affects even those who don't drink
 - Other Students
 - Residents
 - Businesses
 - Communities
