

Student Symposium

Research and Creative Activity

Media Kit

The UMaine Student Symposium is the ideal annual event to experience the innovative, cutting-edge discoveries and new technologies that will help grow Maine’s economy and workforce.

Several hundred UMaine students showcase their research and creative achievement in a diverse range of disciplines. The community is encouraged to come and interact one-on-one with the undergraduate and graduate student presenters to learn more about UMaine projects that impact locally – and beyond.

The event is free and open to the public.
