AP Scholars Program
Advanced Diploma, June 2015

- Worked with and researched new technology designed to improve individuals' interaction with the environment.
- Designed and conducted experiments used to test different pieces of technology aimed to assist blind and visually impaired individuals.

- Worked with other members on staff to teach children how to swim.
- Managed meet entries for athletes on a weekly basis.
- Worked with child athletes on an individual basis to better understand individual constraints and create effective individualized programs.

- Worked with staff members ensuring pool safety and effective operation.
- Took chemical readings of pool water, recorded, and reported them to manager on an hourly basis.

STS 232: Practiced data manipulation and learned how to read results.
